44914 SERIES DUAL ROW, STANDARD VERTICAL CPI HEADERS

The Micro-Fit 3.0, CPI (Compliant Pin Interface) and Micro-Fit 3.0, BMI CPI (Blind Mate Version with Compliant Pin Interface) are vertical header product extensions featuring press-fit PC tails. CPI style (Press-Fit) pins require no soldering to the PCB and areused with 2.36mm (.093″) minimum thickness PCB's.

MX150L™ SERIES SEALED CONNECTOR SYSTEM

RoHS Compliant Available

molex

- Pre-assembled connector housings, seals, TPA components and mat-seal cap in one piece
- Integral terminal position assurance (TPA) insures that terminal leads lock on connector
- Environmentally sealed to IP67
- Integral locking latch

MX150L™ sealed connector system includes pre-assembled connector housings, seals, terminal position assurance components and mat-seal cap shipped in one piece to reduce labor and application costs. Voltage: 600V. Insulation resistance: 1000 MOhms.

PIN & SOCKET CONNECTORS

MX120G™ SEALED CONNECTORS

RoHS Compliant Available

molex

Features & Benefits
- Reduced 3.20mm (mating) pitch design
- Meets IP67 ratings with wide operating temperature range of -40° to +105°C
- High-vibration resistance up to 10G acceleration
- Single-piece construction of the female receptacle comprising a pre-assembled connector housing with matte silicone seal and seal-cap
- Mounted male header comes with a self-guiding slot for easy assembly into the ECU (Engine Control Unit) box

Applications
- Commercial Vehicle
- Industrial Automation
- Medical
- Solid State Lighting

Molex's **MX120G™ Connector system** is a highly compact, sealed, wire-to-wire and wire-to-board family of interconnects that delivers optimal performance especially in wet, high-vibration and wide-operating-temperature conditions. Designed for rugged, harsh environment non-automotive applications; the IP67-rated, **MX120G interconnect system** can be extended to exterior lighting applications that include traffic and overhead street lights; and is a more reliable and less expensive solution to pre-crimped wire-seal alternatives.

SRC SERIES SEALED RECTANGULAR CONNECTORS

RoHS Compliant Available

molex

- Pre-assembled connector housing, seals, rear cover and TPA ship in one piece
- Simple crimp, poke and plug application using standard MX150™ and MX150L™ terminals
- No need to crimp individual wire seals
- Sliding latch with cam action
- Integral Terminal Position Assurance (TPA) with new anti-scooping feature
- Integral, two-way matte seal plus interface seal with improved retention features
- Protective rear conduit interface for female connector
- Connector system retention greater than 200N
- Superior electrical and mechanical performance capabilities
- Unused circuits can be blocked using plastic seal plugs
- *Hand crimp tools purchased separately on page 1136*

The new generation SRC family offers a rugged, sealed, wire-to-panel (bulkhead) and wire-to-wire hybrid connection system designed for high circuit-count applications in harsh environments. The primary location for this system is as the firewall connector, situated between the cab and the engine, but SRC can also replace existing circular connectors in various in-vehicle applications. The SRC system uses proven MX150™ terminals with current ratings up to 18A and MX150L™ terminals with current ratings up to 40A. Flexible standard or mixed power/signal options are available. The MX150 and MX150L terminal systems provide cost savings by eliminating the need to purchase, handle and crimp individual wire seals. This proven terminal technology provides flexibility to increase circuit count and allows for simple field repair and replacement of headers and connectors.

- Insulation resistance: 100 Megohms min.
- Operating temperature: -40 to +125°C

48 Circuit Plug, Right Wire Output - Brown

32 Circuit Plug, Right Wire Output - Black

The CMC connector family from Molex is a sealed, high-density connection system developed for the transportation industry. It is designed to perform in high-conductivity applications and in harsh environments. CMC connection systems are used in power train applications including engine-control units (ECU's), compartment applications, gearboxes, electronic parking brakes and suspension controllers, together with body electronics applications in automotive and commercial vehicles. Standard CMC hybrid connectors hold two different terminal sizes, CP 0.635mm (.025") and CP 1.50mm (.059"). Power CMC hybrid connectors hold three different terminal sizes, CP0.635mm (.025"), CP 1.50mm (.059") and CP 2.80mm (.110").

- Nylon Housing, Rated UL 94V-2
- 0.145″ (3.68mm) Pitch
- Current: 5.0 A Max.
- Voltage: 250V
- Dielectric Withstanding Voltage: 1500 VACrms
- Operating Temperature: -40°C to +105°C

Pin and socket connectors feature friction lock and are panel and PC board mountable. Plugs and receptacles are available in free-hanging or panel mount wire-to-wire configurations. Polarized housings assure proper mating. Recommended panel thickness: 0.060″ (1.52) max. with grid spacing: 0.145″ (3.68). UL recognized E-29179, CSA certified.

565 SERIES WATERPROOF CONNECTORS

RoHS Compliant Available

EDAC INC

Specificatons:
- Insulator Material: PBT (UL94V-0)
- Contact Material: PB / Tin plating
- Wire Housing Seal: Silicone Rubber
- Current Rating: 3 Amperes maximum
- Contact Resistance: 10m maximum
- Insulator Withstanding Voltage: 100 VAC rms at Sea Level
- Insulation Resistance: 1000 megohms minimum at 500 VDC
- Operating Temperature: -40 to +105 Degrees C
- Waterproof Grade 4
- Insulation diameter from .039″ (1.0mm) to .067″ (1.7 mm) can be accommodated using different wire seals and contacts

Features:
- Fully waterproof connector
- Plastic latch provides locking mechanism
- Plug and Receptacle in 2, 3 and 5 contact positions
- Tools available for Contact Installation, Removal, and Crimping
- Able to carry current up to 3A

566 SERIES WATERPROOF CONNECTORS

RoHS Compliant Available

EDAC INC

Features:
- 2.0mm pitch, Rated Current: 2A Max
- Fully waterproof solution
- Available in wire-to-wire options
- Seals preassembled into housing, no external sealing required
- True Crimp and poke solution
- Available with wire already installed
- Waterproof caps available to cover unused holes
- Wire to board configuration also available

Specifications:
- Insulator Material: PBT (UL94V-0)
- Contact Material: Phosphor Bronze, Tin Plated
- Wire + Housing Seal: Silicon Rubber
- Circuits: 2, 3 and 4 pins
- Pitch: 2.0mm
- Rated Voltage: 250V
- Rated Current: 2A max
- Insulation Resistance: 1000 MΩ minimum per DC 500V
- Contact Resistance: 10 milliohms maximum
- Dielectric Withstanding Voltage: 1000 VAC rms
- Waterproof Grade: IP67
- Wire Seal Insulation Internal Diameter: 1mm to 1.25mm

567 SERIES WATERPROOF CONNECTORS

RoHS Compliant Available

EDAC INC

Features:
- 5.0 x 5.9mm Pitch
- Rated Current: 8A Max
- Available with wire already installed

Specifications:
- Insulator Material: PBT, UL94V-0
- Contact Material: Brass or Phosphor Bronze, Tin Plated
- Wire + Housing Seal: Silicon Rubber
- Circuits: 1, 2, 3, 4, 6 and 9 pins
- Pitch: 5.0 x 5.9mm
- Rated Voltage: 300V
- Rated Current: 8A max
- Insulation Resistance: 1000 Megohms minimum per DC 500V
- Contact Resistance: 10 milliohms maximum
- Dielectric Withstanding Voltage: 1700 VAC rms
- Operating Range: -40°C to +105°C
- Splashproof Solution Tested to IP52
- Wire Seal Insulation Internal Diameter from ∅0.067″ (1.7mm) to ∅0.122″ (3.1mm) can be accomodated using different wire seals and contacts

SMS QIKMATE TRIM TRIO™ BOARD MOUNT RECEPTACLES

RoHS Compliant Available

SOURIAU

Esterline Connection Technologies

Right Angle w/ Male Contacts

Right Angle w/ Female Contacts

These PC boardmount connectors enable QIKMATE and preassembled TRIM TRIO contacts to be PC board mounted, using conventional solder production techniques. They will then mate and latch with the standard QIKMATE plugs. All boardmount connectors are supplied fully loaded with pin or socket contacts, either in solid machined or stamped and formed contacts. Stamped and formed contact have selective tin plating on the solder tails, thus eliminating flux operations.

NECTOR S LINE CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- 7.5 mm outer diameter of plug to fit into 8 mm furniture holes
- Connector system available in wire-to-wire configuration
- Outlet and Plug assemblies with two contact positions
- Use widely known MQS contacts
- 6 way distributor with additional switch feature

NECTOR S line connector is designed according the IEC 60320 and UL 1977 standard for lighting industry applications, where size and easy interconnection are key requirements. It is installable in small fixtures into furniture, ceiling, wall and floors. Applicable in power connection and coupling between lamps such as lighting wiring in offices; kitchen, bathroom, shop and household furniture; display cabinets and mountable lighting.

ET POWER CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

Features
- Right-angle and vertical mounts available
- Low profile right-angle connector ≤ 8 mm above pcb
- 14-10 AWG wire range
- Refer to current v temp rise graphs for current capability
- Coding contacts for sense function
- Positive metal latch retention
- Up to 30 Amps per contact

Specifications
- Housing: Black glassfilled thermoplastic, UL 94V-0 rated
- Latch: Stainless Steel
- Power contacts: Gold plated Copper alloy

Designed for low-profile power distribution units requiring small form factor connector with high current, the ET power connector is a low loss, highly reliable and cost effective solution for cable-to-pcb applications. The connector is available in both a vertical mount and a right-angle mount, which stands at just 8 mm off of the board. A unique feature of the ET power series is integrated coding contacts which allow different electronic functions such as sense and enable to be designed into the PDU electronics with activation on full insertion of the cable connector. Crimp contacts from the industry proven "Standard Power Timer" range for use with 14 , 12, and 10 AWG wire. The cable connector has a positive latching mechanism providing no accidental un-mating even with pull forces up to 100N.

HELIOS H4 PLUG AND SOCKET SOLAR CONNECTORS

RoHS Compliant Available

Amphenol® Industrial

Specifications
- Rated voltage: 1000V (IEC/CEI), 600V(UL)
- Test voltage: 6kV for 1 minute, 10kV impulse (1.2/50uS)(IEC)
- Typical contact resistance: 0.25 mΩ
- Contacts: Tin plated copper
- Contact system: Machined/cold formed contact with RADSOK® insert
- Insulation material: PC
- Locking mechanism: Snap-lock, special unlock tool required to un-mate per NEC2008
- Cable strain relief: Compression gland with ratcheting gland nut
- Degree of protection: IP68 (1 meter, 1 hour) mated
- Safety class: II (IEC61140)
- Pollution degree: 2 (IEC60664)
- Overvoltage category: III (IEC60664)
- Flame class: UL94-V0
- Ambient temperature range: -40°C to +90°C

Features
- Fully intermateable with industry standard
- Meets all new NEC 2008 requirements
- Quick and easy secure snap lock mating
- Long-term UV and Ozone resistance
- Low contact resistance means low power loss
- Crimp contacts constructed of tin-plated copper
- Cable connectors are UL, TÜV, and CSA approved
- Panel connectors are UL and TÜV dual approval

HELIOS H4 PLUG AND SOCKET SOLAR CONNECTORS (CONT.)

The Helios™ H4 Cable connector is the premiere solar connector in the market today. It carries more amps, has a higher IP rating, and is fully intermatable with the industry standard connector. Meets the NEC 2008 standard "as is" no additional components required. The Helios™ H4 Panel connector is designed for applications that use solar inverters and combiner boxes. The panel connector meets NEC 2008 requirements without the need for extra locking collars or locking sleeves.

Female Coupler

Male Coupler

Male to Male T-Branch

Box Receptacle - O-Ring and Metal Nut

Box Receptacle - Flat Seal and Plastic Nut

Female to Male T-Branch

- Simple on-site processing
- Mating safety provided by keyed housings
- Semi-automatic assembly capability possible
- Multiple plugging and unplugging cycles
- Accommodates solar cable with different insulation diameters
- High current carrying capacity
- Wide temperature operating range
- TÜV and UL approved

SOLARLOK connectors deliver a flexible system solution for easy and reliable interconnections from photovoltaic modules to DC/AC converters. The male and female cable couplers are designed for high voltage and high current-carrying capacity in addition to the well established IP 67 sealing requirement in the photovoltaic industry. Mating safety is provided by polarity keyed housings, fully shrouded contacts, reliable high cycle life, and squeeze to release connection system. *Order specially designed solar cable separately online or call.*

Panel-Mount Connectors Cable-Mount Connectors

- Housing: Black unfilled PC
- Contact: Silver plated copper alloy
- Voltage (max.): Cable mount: 600 VDC; Panel mount 1000 VDC
- Current (max.): 30 A with 6.00mm² / 10 AWG cable
- Contact resistance: 5 mΩ max.
- Dielectric withstanding voltage: 2200 VDC
- Insulation resistance: 1000 MΩ min.
- Operating Temperature: -40°C to +85°C
- Panel connector IP rating: IP2X (unmated), IP67 (mated)
- Halogen Free
- Glow Wire Compliant

Molex's innovative SolarSpec™ pin (male) and socket (female) DC connectors are rugged and durable, IP67-sealed, SolarSpec™ DC connectors. They feature simple snap-lock mating and an internal locking mechanism for superior safety. Cable connectors are designed for direct connection to solar junction boxes, field installations and PV grid wiring. Panel mount connectors are intended for inverter applications and feature the same mating interface as standard Molex Solar-Spec™ DC connectors. There is no sealing grommet required on the panel side; the retention features in the housing are different and crimp terminals cannot be interchanged between different Molex DC connectors.

RADLOK POWER INTERCONNECT PRODUCTS

NEW

Amphenol® Industrial

- Voltage Rating: 1000V
- Current Rating: 70A - 400A
- Tool-Free Mechanical Locking
- High cycle durability (500 mating cycles)
- RoHS compliant
- Available in Black, Red, Orange (custom coloring available)

Tubular Lug Connector Feed-Thru Pin Busbar Pin

Power Interconnect products in today's market often require additional mounting hardware (e.g. washers, clamps, bolts, nuts, etc.) making them prone to costly labor expenses for installation and routine maintenance. Paired with Amphenol's RADLOK™ PIN, the single finger operation lock feature allows end users to connect any power distribution/storage system in a quick and secure manner. The RADLOK™ product line is the answer to industries where a custom, reliable, easy to install, rugged, and cost effective solution is required.

TRU-LOC® RUGGED ENVIRONMENT CONNECTORS

NEW

Amphenol® Industrial

Features:

- 2, 4, or 6 pin connector with 1.5mm RADSOK® featured contacts
- Plug body with secondary latch
- Fluoroelastomer main joint seal and silicone rubber wire seals to support IP67 rating
- Dielectric withstanding voltage is 1600 Vac RMS
- 13 Amp current rating
- Insulation resistance can meet 100 M Ohms
- Matting force less then 70N
- Contact retention between 60–80N
- Operating temperature can meet -40°C to +125°C, 100 cycles, 1 hour per cycle
- Durability is 20 mating cycles

PLUG

RECEPTACLE

The **Tru-Loc connection system** features Amphenol's exclusive RADSOK® contact system. The new Tru-Loc connector series is designed to perform in demanding environments, such as under valve covers on diesel engines and in high vibration sensor applications. Tru-Loc features a molded thermoplastic main plug body with secondary latch and a fluoroelastomer main joint seal that is resistant to many fluids, including diesel fuel.

RoHS Compliant Available

CINCH

P2406AB

For medium use in cable-to-cable and cable-to-panel applications. Polarized to prevent wrong-way insertion. Brass plug, phosphor bronze socket. Contact plating: cadmium. Plug prongs are 0.250″(6.35) wide, 0.055″(1.40) thick. Black molded phenolic insulation material. Formed metal hood with dielectric liner to prevent shorting. Cable clamps of zinc and clear irridite-plated steel used for strain relief. Current rating: 15A. Withstanding voltage: 1700VAC rms. UL recognized, CSA certified. *To order plugs and sockets with cable clamp at 90° simply change mfg. part no. suffix* **CCT** to **CCE**; to order plugs and sockets with deep brackets for recessed mounting change suffix to **DB**; for plugs and sockets *with shallow bracket for flush mounting change suffix to* **SB**.

COOPER Interconnect

Refer to the enlarged view drawing above to determine the components required. Note the identification letter, then order by the mfg. part no. alongside the desired combination of components and the number of contacts. For example, a male 5 contact connector with rear hood, cable clamp and lock sleeve requires components A, G and H. In the column for male 5 contact assemblies, AGH indicates **mfg. part no. 126-217**, which contains all three components.

TÜV Rheinland

Features:
- High Current
- Fully Polarized
- Positive Locks
- Low Engagement Force
- Wire-to-Board
- Metal Boad Retention Clip
- Surface Mount Compatible

Voltage: 600V. Current: 48A max. Contact resistance: 1.5mΩ (max.). Dielectric withstanding voltage: 2200V. Insulation resistance: 1000 mΩ (min.). Housing: Glass-filled, ⅙ nylon. UL 94V-0. Contact: Copper alloy. Plating: Tin over nickel. Operating temperature: -40°C to +105°C. UL recognized, CSA certified, TUV licensed.

MEGA-FIT® POWER CONNECTORS

NEW

RoHS Compliant Available

molex

Features & Benefits

- Power-dense design with high-current terminals, tight pitch and row spacing
- Terminal interface has six independent points of contact
- Extended barrel conductor crimp
- Sacrificial contacts - Allow system to be "hot plugged" at 48V/23.0A up to 30 cycles
- Fully isolated header pins and receptacle terminals
- Positive locking housing

Specifications

- 5.7mm Pitch
- Dual Row
- Voltage (max.): 600V
- Current (max.): 23.0A
- Contact Retention to Housing: 30N
- Operating Temperature: -40 to +105°C

Mega-Fit® Power Connectors deliver cutting-edge current density at 23.0A per circuit; terminals provide six independent contact points for long-term reliability in virtually every industry and application. The expanded current-carrying capabilities of up to 23.0A with Mega-Fit® power connectors enables one of the highest current-density options compared to existing mid-range power connectors. The innovative split-box terminal design offers six independent points of contact to provide long-term reliability through secondary current-path redundancy.

EPOWER SERIES CONNECTORS WITH RADSOK® TECHNOLOGY

Amphenol® Industrial

- Two or three circuit power
- Crimp, lug or bus bar termination
- IP2X on pin and socket
- Environmental IP67 rating
- Two HVIL circuits
- 1000 VDC rating
- 11.1mm RADSOK® technology for 300 to 400A current capability
- Strain relief for jacketed cable incorporated into shell
- Integrated EMI shielding
- Excellent vibration resistance
- All aluminum shell
- Multiple wire size capability: from 50mm² to 95mm²

ePowerconnector series are designed for the demanding requirements of hybrid, electric vehicles and utility trucks electrical systems. The product incorporates the patented RADSOK® technology for higher amperage, lower T-rise, less resistance and mating force. Meantime, it offers a 40% smaller footprint than three EMI shielding cable glands (based on 95mm² conductor size) and easier operation of termination with shielded cable by a washer compressing the shield to the inside surface of the shell. The connector series covers 2, 3, or 4 contacts. One ePower connector can replace three conventional connectors, saving space and cost. ePower 200 connectors operate at 600 VDC with a 200A rating, ePower 400 connectors operate at 800 VDC to 1000 VDC with a 200A to 500A rating.

PIN & SOCKET HIGH POWER CONNECTORS

POWERPOLE® SERIES CONNECTOR HOUSINGS

RoHS Compliant Available

APP Anderson Power Products

Features:
- High current capability up to 310 amperes
- Moldular housings have molded-in dovetails for stacking
- UL rated for circuit interruption (hot plugging)
- Genderless design uses APP's flat wiping contact technology
- Multiple colors provide coding to the wire and mating connector
- Durable design allows up to 10,000 mating cycles with silver plated contacts

Blocked Powerpoles

873 SERIES LUMI-NUTS™ LUMINAIRE DISCONNECT CONNECTORS

RoHS Compliant Available

WAGO

Features

- Rated 6A/600V
- Line side maximum current capacity = 20A
- Line side connector (male) accepts 18-12 AWG solid wire or 12-16 AWG stranded
- Load side connector (female) accepts 18 AWG solid wire
- Molded in color coding for easy circuit wiring
- 2 conductors per pole facilitates easy daisy chain to additional fixture/ballast
- Compact – fits through ½" knockout
- Mechanical locking latch
- Completely touch-safe (mated or unmated)
- Polyamide 6.6 housing rated UL94V-0
- Keyed connector is 100% protected against mis-mating

2 Pole

3 Pole

Push-wire Connector for luminaire disconnect as required by NEC 410.130(G) and CEC 30-308(4) for non-residential ballasted luminaries. Allows for safe servicing of fixtures & ballasts without exposure to electrical shock.

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Contact rating: 13A at 30°C T-rise
- Wire range: 14-18 AWG
- Contact type: Signal
- Contact size: 16

Precision formed pin and socket contacts. They are used in **M series, Special M series, G series, Metrimate, Metrimate Drawer**, and **CPC series 1 and 4** connectors. Contacts feature a high normal force which provides a low resistance in critical applications such as dry circuit signal conditions. Stainless steel spring. Crimp wire termination.

TE connectivity

Authorized Distributor

Rectangular Features

- High performance rectangular connector
- Available in 2, 4, and 12 positions
- Designed for use with wire seal boots and rated for use up to 50,000 ft. altitude
- Center jackscrew design for fast, reliable mating
- Aluminum shells are keyed and polarized, and are available with lightweight plastic backshell strain reliefs
- Provides excellent density in a rectangular profile for packaging flexibility.

Circular Features

- Available in various shell sizes: 9 (1Q1), 17 (2Q2), 19 (4Q4) and 25 (8Q8)
- Designed for use with wire seal boots for sealing and optimized alignment
- Front metal-shell design provides a full ground plane
- Lightweight composite rear shell available in size 19 for reduced weight
- Accepts standard backshells

A multi-signal contact system consisting of two differential pairs (matched impedance) used with quadraxial Ethernet and Fiber Channel cables. Available in shell size 8 (keyed); 24 AWG pin and socket contacts, Hex Crimp version as well as pin PCB tail solderable versions. Adaptable to a variety of connectors (ARINC 600, 404, DSubminiature connectors, MIL-DTL-38999 style, etc.) Designed for use in high speed applications such as Gigabit Ethernet, IEEE 802.3Z and Fiber Channel X3T11.2 for use on Commercial Avionics Systems, Aircraft Data Networks, Military Communications and In-Flight Entertainment Systems.

MOTORMAN HYBRID CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

Specifications

- IP65 (water & dust protection)
- 25g (physical shock)
- Electro-magnetic compatibility (EMC protection) in metal enclosure
- 2 x 20A / 600V @ 85°C (20A/600V/6kV2)
- 2 x 20A / 40V @ 85°C
- 1 x Ground (protection earth)
- 1 x Braid
- 5 x 2A / 40V
- 2 x Cat 5e (AWG 22)
- Reflow capable

Features

- Compact size of a traditional rectangular connector and hybrid construction (power, communication, signal)
- Several pre-customized models available for different customer environments
- Robust metal or plastic enclosures for tough industrial applications or economical less critical purposes
- Easy-to-open enclosure
- Space for two 4-pin Ethernet sockets, 5 power sockets, 5 signal sockets and 1 protection earth contact
- Cat 5e communication in heavy environment
- Usage of TE's MCON interconnection system and its stamped contacts

The Motorman hybrid connector integrates communication, signal and power transmission of locally controlled motors within a single compact rectangular connector. In addition, two fast Ethernet sockets enable motors to be networked, providing the benefit of real-time automation. The innovative design and compact size of the Motorman hybrid connector allows for significant space savings in comparison with traditional rectangular industrial connectors. It also helps to keep costs to a minimum by reducing the amount of overall cabling needed as well as shortening cable length.

1648133-1

Tyco Electronics offers a wide selection of blindmateable "drawer" connectors to suit modular equipment designs. Some of the benefits of the power drawer connectors from Tyco Electronics are the robustness of the housing designs and the durability of the contacts. High-end applications such as networking switches and servers want the lowest possible voltage drop across the connector. For these applications the high conductivity screwmachined contacts with either gold or silver plating offer the best performance. The contacts are the core of the ELCON drawer series connectors. For cost sensitive applications the different hybrid drawer connectors offer a wide variety of shapes and sizes aimed at keeping cost minimized and still providing a reliable separable interface. Regardless of the application, Tyco Electronics offers a wide variety of power & signal blind-mateable drawer connectors.

DWR-T820S-V233-01

DWR series CoolPower® Slim Drawer connectors combine performance, reliability and design flexibility making them ideal in today's medium to high current applications where cost and space are as critical as performance. This robust blind mating interconnect solution can accommodate a variety of mixed power and signal arrangements. High-temperature thermoplastic housing, rated UL94V-0. High-performance CoolBand size C88 phosphor bronze signal contacts, copper alloy power pins and beryllium copper/tellurium copper sockets in a number of termination and plating options. Current rating: power up to 60A Free Air, Signal 4A. Dielectric withstanding voltage: 2500 VDC. Durability: 250 mating cycles. Operating temperature range: -55°C to 105°C.

G20 SERIES ENERGY RAZOR® POWER CONNECTORS

RoHS Compliant Available

Amphenol Commercial Products

Power Plug

- Multiple contact design provides great contact reliability
- Blind-mating capability with guiding pin design
- Venting hole for great thermal performance
- Capability for expansion to 16 power pins and 24 signal pins
- Current rating: power 30A, signal 3A
- Contact resistance: 35mohms max. initial
- Dielectric withstanding voltage: power 2500VDC; signal 1000VDC

Power Receptacle

- Mating force (max.): power 800g; signal 100g
- Unmating force (min.): power 227g; signal 18g
- Contact retention force (min.): power 32N; signal 19N
- Durability: 200 cycles
- Voltage rating: 600VAC
- Operating temperature range: -20°C to +105°C
- UL recognized

G20 series Energy Razor® is an ideal power connector series for power distribution to provide power and signal control in one single connector. These connectors are extensively applied in AC/DC power supplies, power distributionboard or for board-to-board, panel-mount and rack-mount connections in server, storage, and telecommunication equipment. Black thermoplastic housing, rated UL94V-0. Copper alloy signal and power contacts feature selective gold plating in contact area, tin plating in solder area and nickel underplating overall.

GPCE SERIES ENERGY EDGE® POWER CONNECTORS

Amphenol Commercial Products

RoHS Compliant Available

- Low profile design saves valuable space
- Venting hole design for great thermal performance
- One-piece assembly is cost saving
- Capability for expansion to 56 power pins and 24 signal pins
- Vertical orientation
- Current rating: power 9A, signal 1.5A
- Contact resistance: 25mohms max initial
- Dielectric withstanding voltage: power 1800VDC; signal 500VDC
- Mating force (max.): power 0.98N; signal 0.22N
- Unmating force (min.): power 0.36N; signal 0.06N
- Contact retention force (min.): power 32N; signal 19N
- Durability: 200 cycles
- Voltage rating: power-to-power 100VAC rms; signal-to-signal 12VAC rms
- Operating temperature: 105°C max.
- UL recognized

GPCE34362411HR

GPCE24362411HR

GPCE series Energy Edge® is next generation power solution for power distribution. Power and signal contacts are incorporated into one single connector and is extensively applied in power distribution board or for board-to-board, panel-mount and rack-mount connections in server, storage, and telecommunication equipment. High-temperature thermoplastic housing, rated UL94V-0. High-performance copper alloy signal and power contacts feature selective gold plating in contact area, matte tin plating in solder area and nickel underplating overall.

C-146 SERIES RECTANGULAR INDUSTRIAL CONNECTORS

RoHS Compliant Available

Amphenol

Amphenol-Tuchel Electronics GmbH

Single Latch Bulkhead Mount Housing

Single Latch Bulkhead Housing with Spring Cover

Top-Entry Hood

Side-Entry Hood

- Screw Termination
- Voltage Rating: 400V
- Current Rating: 16-22A
- Contact Diameter: 2.5mm for 16-14 AWG

C-146 series connectors can be used for many applications, such as control and power distribution, test and measurement equipment, and machine tools. Constructed of die-cast aluminum and environmentally protected by means of different latch-locking styles, neoprene gaskets, and cable strain relief options. Feature silver-plated brass male contacts and silver-plated tin-bronze female contacts. Compatible and intermateable with other similar style products. Meets NEMA enclosures types 4 and 12. IP65 rated. UL recognized, CSA certified, VDE approved, SEV approved.

HAN-YELLOCK ® INTERCONNECT SYSTEM

RoHS Compliant Available

HARTING®

Assembled Connector using Side-Entry Hood and Carrier Hood with Slotted Pushbutton

Top-Entry Hood and Carrier Hood with Plain Pushbutton

- 2-Pc. hood with pushbutton locking mechanism
- Simple snap-in functionality
- Insert assembly from mating and termination side
- Contact bridging
- 25 Coding possibilities
- IP67 protected
- Shock- and vibration-proof
- Space-saving compact design
- Reduces material and wiring costs
- Easy assembly

Han- *Yellock®* heavy-duty industrial connectors provides secure transmission of data, signal and power while offering individual configuration options, optimal functionality and elegant, space-saving design. The innovative locking system makes connections and disconnections safe and quick – even under harsh industrial conditions. The locking takes place as the cable and device sides are simply joined together. The self-contained interface consists of a housing, bulkhead mounting, carrier hood with cover, modules, crimp pin contacts, multipliers, and accessories; *all ordered separately below.*

HAN-YELLOCK® 30 HOODS

Two-part powder-coated aluminum hood for easy wiring and testing. Features patented, vibration-resistant internal, latched locking mechanism that makes connections and disconnections safe and quick, even under harsh industrial conditions. Choice of side or top cable entry.

HAN-YELLOCK® MODULE AND MULTIPLERS

Han- *Yellock®* five-pin modules are snapped and locked into position manually in the hood and housing from the mating or termination side. Module accepts Han- *Yellock®* crimp pin contacts; *ordered separately below.* The potential multiplication moves capabilities from the control cabinet to the connector. Depending on requirements, the five contacts, each with a current carrying capacity of 20A, can be switched to 2, 3, 4 or 5-way links. Switching is via a five-socket multiplier that is snapped in on the mating side. The multiplier can be placed in the connector from either the cable side or the casing side. These assemblies are easily dismantled by using **mfg. part no. 11 99 000 0001** removal tool; *ordered separately below.*

HAN-MODULAR CONNECTOR SYSTEM

RoHS Compliant Available

HARTING®

The Han-Modular series is a new system of inserts designed to meet the specific requirements of individual customers. The individual contacts used in this system are all from existing well proven ranges and it is possible to use combinations of 1 to 12 modules depending on the size of the hoods and housings chosen.

HAN® NEMA 4/12 POWER CONNECTOR HOODS

RoHS Compliant Available

Single Lever, Side-Entry | Double Lever, Side-Entry | Side Lever, Side-Entry | Double Lever, Top-Entry

Hoods are in accordance with international standard IEC 529 (DIN40050) degree of protection IP 65, which complies in full with NEMA Type 4. Constructed of die-cast aluminum. Protect against windblown dust and rain, splashing water, and hose-directed water. For use in power utility, robotics, chemical plants, machine tool control, injection mold, industrial instrumentation, and conveyor equipment applications. Hoods with single lever mate with single lever.

CANNON DL/DLM SERIES PLASTIC AND METAL ZERO INSERTION FORCE CONNECTORS

RoHS Compliant Available

ITT

- ZIF Design Enables Rapid Mating with Minimal Contact Wear
- For Cable-to-Cable, Cable-to-Panel, and Panel-to-Panel Interconnections
- Ideal for Multi-Cycle and Circuit Applications

DL Series Plug | DL Series Receptacle

DL series rack and panel connectors feature zero insertion force (ZIF) design to enable long life and rapid mating. Ideal for any application requiring many cycles and circuits, for example, medical, instrumentation and computer use. Glass-filled thermoplastic connector housing, rated UL94V-1, features stainless steel insulator retainer and camshaft. Zero connector engagement force minimizes contact wear as well. Contacts may be hand or machine terminated. Current rating: 5A. Capable of 8 lbs. minimum contact retention, 1200VAC dielectric withstanding voltage. Operating temperature: –55°C to +105°C. 18 to 32 AWG wire range. *Order actuating handle kit for plugs separately* online. *Order crimp contacts and crimp tools separately* online. **DLM series** metal panel mount ZIF (Zero Insertion Force) plugs and receptacles feature a rugged nickel-plated aluminum alloy housing with a glass-filled thermoplastic insulator, rated UP94V-0. Shield-locking mechanism offers uniform mating pressure around the perimeter of the mated connector to create an EMI/RFI shield. Facilitates compliance of equipment to CE EMC directives. Intermateable with the **DL series** plastic versions for backwards/forwards compatibility. Order crimp contacts separately; *go online or call.*

Weidmüller

Bulkhead Housing Single Lever

Bulkhead Housing Double Lever

Base Housing with Cover Single Lever

Base Housing Double Lever

Features:
- IP65 to EN60529
- NEMA 4X class of protection
- Scratch-resistant, corrosion-proof, long-lasting
- Material: Cast aluminium alloy
- Color: Gray
- Clamp lock in different versions of rustproof stainless steel
- All housings are marked with part number
- All bulkhead housings come with affixed gasketss

Applications:
- General mechanical engineering
- Conveying equipment and plant engineering
- Packaging machines
- Lighting and stage equipment
- Fairground rides
- Process engineering
- Transport and traffic engineering

Weidmüller has further developed its IP65 housing. The result is an industrial housing of a new design that also has the properties corrosion resistance and long service life. These new HDC industrial housings even surpass previous stainless steel housings in all respects. All operation elements are made of stainless steel. A high-quality, multistage surface sealing provides safety for years.

HA Series Kit

HE Series Kit

Features:
- IP65 to EN60529
- NEMA 4X class of protection
- All housings are marked with part number

HDC kits are standardized sets of components for constructing a complete connector. Each kit includes male insert, female insert, hood housing, bulkhead housing, and cable gland.

MAX-M12 HIGH SPEED DATA CONNECTORS

NEW

Amphenol® Industrial

Features:
- HDM 12 Versions Available
  - -Plastic or Metal (for shielding)
  - -90° right angle and straight connector offerings
  - -3, 4, and 5 way circuit patterns
  - -A, B, D & P polarity codes – based on
- IEC 61087-2-101
- Available as stand-alone connectors & cable assemblies (standard and overmolded)
- Terminals capable of being terminated to: 0.8 mm2 (18 AWG) or 0.5 mm2 (20 AWG) conductors as defined by SAE J1128 and 0.75 mm2 and 0.50 mm2 conductors as defined by ISO 6722
- 444 N (100 LBF) pull force on cable
- Backward compatible with IEC 61076-2-101 (M12)
- More resistant to terminal damage
- Extreme environmental testing based on J2839 requirements
  - -High pressure wash down

Amphenol Industrial Products Group introduces the ruggedized M12 high speed data connector, the Max-M12. High speed data transmission connection systems have traditionally been implemented into commercial applications with little regard to high vibration, high temperature and overall harsh environment demands. With the increased implementation of these high speed Datalink connection systems into more heavy duty / harsh environment surroundings, the need for a more robust and ruggedized connection system has surfaced. Based on the IEC 61076-2-101 and SAE J 2839 standards the Max-M12 connection system makes it the perfect solution for the ultra rugged applications that sometimes exist in markets dealing with Heavy Equipment, Rail & Mass Transit, Process Control, Factory Automation, etc.

M8 AND M12 PANEL MOUNT AND FIELD SERVICEABLE CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

M8 Male Panel Mount Connectors | M8 Female Panel Mount Connectors | M12 Field Servicable Connectors | M12 Male and Female Panel Mount Connectors

The M8/M12 system fills the ongoing needs for sensor connection in Industrial Machinery and Factory Automation. A connection standard for many years, these products also find application outside of their traditional industries where a compact reliable connection system with environmental protection is required. Panel mount and field serviceable products are offered in solder cup termination.

NANONICS ENVIRONMENTALLY SEALED CIRCULAR CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Contact resistance: 0.003 - 0.008 Ω
- Current rating: 1A max. per contact
- Dielectric withstanding voltage: 500 Vrms at sea level
- Insulation resistance – 5000 megΩ min. (@ 500 VDC) at room ambient conditions.
- Magnetic permeability: 2 mu max.
- Temperature range: -55°C to +200°C
- Durability: 250 mates/demates

Nanonics environmentally sealed circular offering represents one of the industry's smallest and most reliable connector designs. These connectors are ideally suited for applications where high density and reliability, and reduced size and weight are serious design parameters. Along with these attributes, they also meet the immersion requirements of IP67, more specifically, one meter of water for two hours. Utilizing the same contact system and materials as the Dualobe® rectangular series of connectors, the circular connectors are manufactured to the performance specifications of MIL-DTL-83513.

Mfg. Part No.	Positions	Gender	Description	Stock No.	Price Each 1-4

CPC SERIES UV RESISTANT SEALED CIRCULAR CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

NEW

The new **Sealed CPC Series connectors** using UL F1-rated resin is ideal for UV resistance in outdoor applications. The UL F1 rating meets industry standards for long-term UV exposure, making the housings suitable for outside applications where parts are subject to frequent or extended periods of exposure to sun light. The new CPC is sealed to IP67 with no additional enclosure needed to protect the mated connector from water exposure, making it easier to install and lowering the cost of installation. The circular configuration requires less space than a rectangular-style connector with an equal number of contacts for an efficient use of space on your equipment.

AMP MINIATURE CIRCULAR PLASTIC CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Current rating: 5A maximum
- Operating voltage: 600V maximum
- Dielectric withstanding voltage: 200VAC minimum

Plug and Free-Hanging Receptacle

Miniature Circular Plastic Connectors (CPC) are available in wire-to-wire and wire-to-panel configurations. Choose from plugs and receptacle available in free-hanging or panel mount versions. Available in other contact positions; *go online or call.* Ideal for industrial, instrumental and transportation applications where size, contact density and environmental exposure are primary concerns. Black, thermoplastic 1-pc. housings offer good resistance to a wide range of chemical agents while the IP67 sealing helps prevent ingress of dirt or fluids. Prepositioned ¼ turn coupling ring with positive lock and alignment features. Utilizes Mini-Universal MATE-N-LOK® pre-tin plated, stamped-and-formed crimp contacts designed for up to 50 mating cycles; *order separately below.* Wire gauge: 22-18 AWG. *Order backshell/strain reliefs and application tooling separately below.*

AMP RIGHT-ANGLE CABLE CLAMPS WITH COVER FOR CIRCULAR PLASTIC CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Attachable Cover Provides Wire Insulation Protection
- Allows Wires to Be Moved in 360° Radius

Ideal for industrial machinery and instrumentation applications or any AMP® circular plastic connector application where a straight cable clamp is too long. Strain relief body uses a coupling ring to attach to the connector body allowing the harness assembler to position the direction of the wire assembly in a 360° radius. Features an attachable cover that provides wire insulation protection at the rear of the connector body. Constructed of black thermoplastic that's heat-stabilized, fire-resistant, self-extinguishing and rated UL94V-0.

Cable Clamp Protective Cap

For Series 1, 2, 3 and 4 metal shell CPC connectors. **Mfg. part no. 208945-X** cable clamps prevent excessive strain on cable/wire from being passed along to contacts inside connector housing. Zinc-plated aluminum alloy. Unassembled components include: body, 2 screws, 2 lock washers, 2 straps. Clamps thread directly onto metal shell plugs or receptacles. **Mfg. part nos. 211903-1** and **211904-1** are zinc alloy protective caps with nickel-plated metal bead chains for receptacles only.

TXR40 SERIES TINEL-LOCK™ ADAPTERS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Aluminum alloy housing, per QQ-A-225
- Olive drab cadmium finish
- Straight and 90° angle configurations

90° Angle Straight

Code 40 Tinel-Lock™ adapters are designed to terminate a braided cable shield and a heat-shrinkable lipped boot to MIL-C-38999, Series III and IV, Class C, F, K, and W, D38999/20, /24, /26. /40, /46, /47 circular connectors, and when mated provide a watertight seal meeting MIL-C-85049, Par 3.5.7 requirements. Manufactured from aluminum alloy with olive drab cadmium finish per QQ-P-416, Type II, Class 3 over electroless nickel for corrosion resistance in exposed environments. Features a Tinel-Lock™ ring marked with thermochromic paint that changes color when heated electrically and installation temperature is reached. Also available with high-conductivity electroless nickel finish, per MIL-C-26074, Class 4, Grade B, for optimum screening performance; *go online or call.*

RAYCHEM SIDE-ENTRY TINEL-LOCK RING

NEW

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Low profile, buckle-free termination provides smooth outer surface
- 1-piece nickel-titanium alloy construction with interlocking ends
- Uniform recovery force gives termination excellent mechanical and electrical properties
- Withstands temperatures up to 200°C
- Quick and easy installation with resistance heater or heat gun
- Thermochromic paint changes color to indicate when ring has been heated to full recovery
- Low DC connection resistance provides excellent 360° shielding termination
- Easily removable

Side-entry Tinel-Lock ring is a heat-recoverable metal braid terminator, which provides a method of joining a gross cable or harness shield to a connector backshell or other termination device, without prepositioning the ring on the harness. Designed for military and commercial aerospace, military ground systems, military, marine and commercial ships, as well as, offshore marine applications. Can be used for harness-over-braid termination, cable screen termination to the Tinel-Lock adapter, and for harness repair. Ideal for use with 34-36 AWG single layer braid. Connection DC resistance: 1mΩ max. Operating temperature: -65°C to 200°C.

SEB SERIES SIDE ENTRY BUSHINGS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- High-temperature resistant silicone, rated to 180°C
- Trim to fit capabilities — fits any size saddle clamp
- Thermally formed to naturally conform to circular wire bundles
- Flexible and fire resistant
- No adhesive layer for easy removal
- Reusable

Pre-coiled side entry reusable silicone bushings are designed to be used in high-temperature applications, such as non-environmentally sealed backshell (saddle clamp) and wire management bundles, where tape or other molded grommets are used. One silicone elastomer bushing strip replaces as much as 6 feet and 40 wraps of traditional silicone tapes. Conforms to MIL standards AMD-DTL-23053/10, MIL-PRF-46846 Type II Class 1, and RT-1140. Operating temperature range: -75°C to +180°C.

RAYCHEM SPIN LOCK VARIABLE-ANGLE BACKSHELLS

RoHS Compliant Available

TE connectivity

Authorized Distributor

45° Angle Heat-Shrinkable Molded Boot Version | Straight Saddle Clamp Version | 90° Angle Saddle Clamp Version

- Variable angle — straight, 45° and 90° cable termination using the same part
- Cost-saving design allows use one backshell for multiple applications
- Tinel-Lock™ ring system provides high-performance, low-resistance shield termination
- Choice of strain relief method — saddle clamp or heat-shrink molded boot for a sealed termination
- Constructed from durable aluminum alloy
- Available in two platings — olive drab cadmium or electroless nickel

Raychem Spin Lock variable-angle backshells for MIL Spec circular connectors enable straight, 45°, and 90° braided cable termination using the same part. The backshell's swivelling body rotates around the axis of the cable bundle and locks in position, minimizing stress on the wire bundle and providing more robust strain relief than other termination systems. Choice of saddle clamp version or heat-shrinkable molded boot version for a sealed termination. Manufactured from aluminum alloy in choice of two platings. For corrosion resistance in exposed environments, select olive drab cadmium plating per SAE-AMS-PQ-P-146. Or for optimum screening performance, select high-conductivity electroless nickel plating, per SAE-AMS-26074 Class 3 or 4, Grade A. All versions have the Tinel-Lock™ ring marked with thermochromic paint that changes color when heated electrically and installation temperature is reached. Ideal for military and commercial aerospace, defense, marine, and industrial applications, the Spin Lock backshells are compatible with MIL-C-38999, Series I, II, III and IV and other MIL spec circular connectors.

CIRCULAR CONNECTORS

ORDERING GUIDE FOR 97 SERIES STANDARD CYLINDRICAL, MULTI-PIN, THREADED CONNECTORS

Amphenol® Industrial

97 3101 A 28-21 P W (290)† (639)

Series Number
97 - Like MS, but Amphenol®

Shell Construction
A - Solid Backshell
B - Split Backshell (available in 3106, 3107, 3108 only.)*

Contact
P - Pin
S - Socket

Shell Finish
Leave Blank - For Standard Olive Drab Cadmium Finish
(639) - Clear Cadmium
(621) - Black Zinc Alloy
(689) - Electroless Nickel
(946) - Black Zinc Alloy Finish Plus Solder Contact Less Prefilled Cup (RoHS)

Shell Type
3100 - Wall Receptacle
3101 - Cable Receptacle
3102 - Box Receptacle
3106 - Straight Plug
3107 - Quick-Disconnect Plug
3108 - Angle Plug

Alternate Insert Position
Omit for Standard Position. **W,X,Y,** or **Z** for Alternate Positions, depending on Insert. Alternate Insert Positions are listed in parenthesis under each diagram in the Insert Chart at the beginning of this section.

Deviation
(290) Backshell for use with jacketed cable
Contact your local Newark InOne Sales Office for additional deviations.

Insert Number
(Consists of)

Shell	Configuration
8S, 10SL, 12S, 12†, 14S, 14, 16S, 16, 18, 20, 22, 24, 28, 32, 36	Code Numbers are listed under each diagram in the Insert Chart at the beginning of this section.

Review this example to correctly formulate the part number of your choice. See above explanation for more ordering information.
(† For use with Environmental connectors only;
* Contact your local Newark InOne Sales Office for availability.)

SERVICE RATINGS
Codes are listed in **[BRACKETS]** under each diagram in the Insert Chart.

Service Codes		INST+	A	D	E	B	C
Limiting Operating	DC	250	700	1250	1750	2450	4200
Voltages at Sea Level	AC (rms)	200	500	900	1250	1750	3000
Effective Creepage (nominal)	mm	1.57	3.18	4.75	6.35	7.92	25.40
Mechanical Spacing (nominal)	mm	...	1.57	3.18	4.75	6.35	7.92

*Army-Navy ratings for aircraft use; Transients were not considered in calculating these values; Limiting operating voltages of 50,000 feet (15,240M) altitude are approximately 25% of the sea level values.
- +Normally for low voltages and currents.

WIRE SIZE CODES

16	12	8	4	0

TEST CURRENT VALUES

Contact Size	16	12	8	4	0
Amperes	13	23	46	80	150

97 series medium- to heavy-weight, standard circular connectors feature non-rotating and non-reflective contact design that simplifies soldering and helps lower termination costs. Standard MIL-C-5015 contacts are silver-plated w/ pre-tinned solder cups. Single key/keyway polarization. High-grade aluminum alloy shell components feature strong threaded couplings. Diallyl phthalate inserts provide high arc and insulation resistance under both humidity and thermal stress. Your choice of 5 shell styles, environmental, solid or split shell construction, 128 contact arrangements (from 1 to 52 circuits) and alternate insert positioning. Standard, non-reflective cadmium-plated shell available in 3 finishes. Choose: olive drab chromate finish; shiny, clear cadmium-plated finish; or environmental-resistant black zinc cobalt finish. All shell finishes give the same high conductivity and resistance to corrosion. Operating temp.: –55°C to +125°C. Intermateable and intermountable with all **97 series** and MIL-C-5015 connectors. UL recognized File E115497; CSA certified File LR69183. has a completely equipped Amphenol **MS** assembly center which allows the quick shipment of complete connectors from an extensive component inventory.

HOW TO SELECT A 97 SERIES CIRCULAR CONNECTOR IN 6 EASY STEPS . . .
Once you have determined that a **97 series** circular connector is required, answer the questions in the following 6 steps to help formulate the part number of your choice.

STEP 1 *How many wires are you going to connect and what gauge?*
This will determine what insert to choose from. The Insert Chart *on pages 941-942* illustrate the inserts available.

STEP 2 *What kind of RECEPTACLE do you need?*
Series 3100 (wall mount) front mount through wall material. Threaded backend to attach cable clamp. **Series 3101 (cable mount)** for inline non-mounting applications. **Series 3102 (box or panel mount)** mounts from inside the box. No rear threads for cable clamps. See dimensional information on page

STEP 3 *What kind of PLUG do you need?*
Series 3106 (straight plug) is the standard. For space constraints use **Series 3108 (right angle plug)**. For quick disconnect use **Series 3107**.

STEP 4 *Do you need a Plug with SOLID or SPLIT Back Shell?*
Use solid **'A' class** for sturdy, easy to assemble applications. Use split **' B' class**, for when you need added room to solder or for inspection.See dimensional guide for 'B' class split backshell availability.

STEP 5 *Which connector gets the socket: the receptacle or the plug?*
Rule of thumb: The socket goes where the power is coming from (the hot side). 'S' = socket, 'P' = pin. See "How To Order"

STEP 6 *What kind of finish do you need?*
The standard finish is olive drab cadmium. See "How To Order" for other finishes.

HOW TO BUILD A 97 SERIES CONNECTOR

SHELL	+	INSERT ARRANGEMENT	=	CONNECTOR PART NUMBER	
97-3106A-18(850)	+	97-18-1S	=	97-3106A-18-1S	Std OD Cad finish - Non-RoHS
97-3106A-18 (621)(850)	+	97-18-1S	=	97-3106A-18-1S (621)	Black Zinc Alloy finish - Non-RoHS
97-3100A-14S(850)	+	97-14S-2P	=	97-3100A-14S-2P	Std OD Cad finish - Non-RoHS
97-3100A-14S(621)(850)	+	97-14S-2P (431)	=	97-3100A-14S-2P(946)	Black Zinc Alloy finish - Non-RoHS

•(850) designates shell only. No marking •Shell with (621) Black Zinc Alloy finish denotes RoHS for shell only
•Insert with (431) denotes contacts with solderless cups - RoHS •(621)+(431)=(946) RoHS compliant connector

97 SERIES SOLDER TYPE RECEPTACLES

Amphenol® Industrial

MS3100A wall mount receptacle

Solid shell construction is strong and conserves space. Includes integral polarizing key in front. Back shell is threaded for standard MS/AN fittings.

MS3101A cable receptacle

Solid shell construction is strong and conserves space. Includes integral polarizing key in front shell. Machined back shell is threaded for standard MS/AN fittings. Can be unscrewed for inspection or soldering.

MS3102A box receptacle

Solid shell designed for open wiring. Mounts directly on chassis, equipment or panel. Includes internal polarized key in front shell.

97 SERIES SOLDER TYPE PLUGS WITH SOLID SHELLS

Amphenol® Industrial

MS3106A straight plug
Sturdy, simple to assemble. Coupling ring machined from solid aluminum bar stock for high tensile strength. Mates with all types of MS receptacles. Front shell includes polarizing keyway. Back shell is threaded for standard MS/AN fittings.

MS3106A

MS3107A quick-disconnect plug
For fast connect/disconnect applications. Front shell has polarizing keyway. Mates with all types of MS receptacles. Back shell is threaded for standard MS/AN fittings

MS3107A

MS3108A angle plug
For use where space in front of panel or wall is at a premium. Swivel ring and plate combination allow cable take off at any angle relative to front shell polarizing key. Back shell is threaded for standard MS/AN fittings.

97 SERIES SOLDER TYPE PLUGS WITH SPLIT SHELLS

Amphenol® Industrial

MS3106B straight plug
Used for unusual conduit applications where soldering and inspection is the prime requirement. Back shell is threaded for all standard MS/AN fittings.

MS3107B quick-disconnect plug
For fast connect/disconnect applications. Front shell has polarizing keyway. Mates with all types of MS receptacles. Back shell is threaded for standard MS/AN fittings

MS3108B angle plug
Lightweight, roomy cavity, split longitudinally for convenient solder or inspection. Front shell is keyed to allow the 90° angle housing to be rotated and locked at any 45° increment.

Sizes 10S thru 14

Sizes 16S thru 40

97 SERIES WATER RESISTANT CABLE CLAMPS

Amphenol® Industrial

Water Resistant cable clamp assembly includes **AN3057** cable clamp, rubber bushing, washer and **AN3055** adapter. To assure best results, the plug must be ordered with deviation (417), which supplies a W washer on the shoulder of the plug shell. If an environmental type MIL-5015 E, F or R Class is required, consult your local Newark in One sales office.

97 SERIES/MS CONNECTOR CAP AND CHAIN ASSEMBLIES

Amphenol® Industrial

9760-10

9760-10P

Fit **97 series/MS** receptacles and plugs. Provide protection against live circuits and keep out dirt and dust. Olive drab cadmium finish with beaded chain for mounting. Caps for receptacles feature internal threads for use with **MS3100A, MS3101A,** and **MS3102A** receptacles, *go online or call.* Caps for plugs have external threads for use on plugs **MS3106** and **MS3108**, *go online or call.*

97 SERIES MS3057A CABLE CLAMPS

Amphenol® Industrial

For jacketed cable or wire protected by tubing. Both clamping halves float for maximum strain relief. To order clamp with bushing, add -1 suffix to the mfg. part number. For unjacketed cable or wire, *order* **MS3420** *rubber bushing separately on this page.* Two telescoping bushings supplied with shell sizes 24 and up.

Insert Arrangements

- Medium to Heavyweight Cylindrical
- Durable, Field-Proven Design
- Resilient Inserts
- Solder Contacts, Sizes 16-0 Accepting 22-0 AWG
- Operating Voltage: 3000VAC (RMS) Max. at Sea Level

MS/Standard connectors meet the latest performance requirements of MIL-C-5015. Feature threaded couplings and single key/keyway shell polarization, representing maximum simplicity in design. Applications include military ground support equipment, ordnance and shipboard installations. **NOTE:** The MS/Standard connectors are available in 4 Certified Service Classes: "A" Class is a solid shell version for general, nonenvironmental applications; "E/F" Class is an environmental resisting version with strain relief and designed for applications where the connector will be exposed to moisture, vibration and rapid changes in pressure and temperature; and "R" Class is a lightweight environmental resisting version that is shorter in length and lighter in weight than the E/F classes, offering a high degree of reliability under adverse conditions making it recommended for new design applications.

165 SERIES MINIATURE CIRCULAR CONNECTORS

RoHS Compliant Available

Amphenol® Industrial

24 # 20 7.5 Amp | 5 # 20 7.5 Amp | 9 # 20 7.5 Amp | 12 # 20 7.5 Amp | 14 # 16 17 Amp

Miniature connectors are ⅓ the size and weight of standard MIL-C-5015 connectors with the same number of contacts. Quick, positive bayonet coupling. O-ring seals in both plugs and receptacles make connectors pressure proof and water protected when mated and meet MIL-C-5015, Class C pressure specifications. Contacts are copper alloy with gold over nickel plate. Inserts are diallyl phthalate. UL recognized.

PRE-EARTH/FMLB CONNECTORS

RoHS Compliant Available

Amphenol® Industrial

- Pre-Earth (Grounded Contact) Design
- First Mate, Last Break Capability
- Class IP67 Protection In Mated Condition
- Conform to European Safety Standards
- Standard Black Zinc Plating
- CE Compliant

DL series Pre-Earth/First Mate Last Break (FMLB) connectors are designed for applications where a protective circuit from the ground contact to the shell is a safety requirement. Offered in straight plug and box mount receptacle styles. Main joint gasket between plug and receptacle shells provides superior moisture sealing. Certified to European safety standards for use in factory automation, machine tool, and process control applications. Meet MIL-C-5015 dimensions and performance where applicable.

ACA-B SERIES REVERSE BAYONET COUPLING CONNECTORS

Amphenol® Industrial

3102E Box Mount Receptacle | 3106E Straight Plug

Contact Arrangements
Mating Face View of Insert

- Quick positive coupling
- Waterproof
- High shock and vibration capabilities
- No locking required

ACA-B series connectors with reverse bayonet coupling are manufactured in accordance with MIL-C-5015 and VG95234. Designed for commercial and industrial environments requiring a rugged bayonet style connector for heavy duty power and signal applications. Resilient inserts provide high dielectric strength and moisture barrier. Shell: aluminum alloy with cadmium-olive drab finish. Insert: neoprene. Contacts: copper alloy with silver finish. Operating temperature: -55°C to 125°C. Electrical rating: 5A to 500A. Service rating: up to 400VDC. Mating cycles: 500.
ACA3102E-B box mount receptacles are certified "E" Service Class, envrionmental resisting, with grommet seal and strain relief backshell. Receptacle without threads for panel mounting includes four through mounting holes or optional metric holes. **ACA3106E-B** straight plugs are certified "E" Service Class environmental resisting, with grommet seal and strain relief backshell. Plug with cable clamp and telescopic bushing includes grommet and grommet sleeve.

AMPHE-POWER™ (MIL-C-5015) CONNECTORS WITH RADSOK® TECHNOLOGY

Amphenol® Industrial

Amphenol now offers RADSOK® technology in MIL-C-5015 cylindrical connectors for high current applications. Featuring a flat stamped, hyperbolic twisted contact grid in the socket, a 50% increase in current rating is achieved. See table below. This allows smaller connectors with more power. Amphe-Power 5015 **AC series** are durable, field-proven cylindrical connectors derived from the MIL-C-5015 family and feature a threaded coupling with resilient neoprene inserts and single key/key polarization. Amphe-Power **GT series** are reverse bayonet coupling connectors with an audible, tactile and visual full mating feature. Neoprene inserts and heavy duty, rugged shells. *More information on RADSOK technology available*, go online or call.

CIRCULAR CONNECTORS

PT-SE AND MS/PT-SE (MIL-C-26482) SERIES CRIMP-TYPE BOX MOUNT RECEPTACLES

Amphenol® Industrial

PT-SE and **MS/PT-SE series** crimp-type miniature box mount receptacles provide performance and versatility needed for applications demanding high-reliability and crimp removable contacts. Rear-insertable/front-release crimp contacts are held in position by an MS approved, spring tower retention system. **MS/PT-SE series** is qualified to MIL-C-26482, Series 1 and has all the same design characteristics and quality of the **PT-SE series**. Both series feature corrosion-resistant, electrically conductive cadmium-plated finish with an olive drab chromate after-treatment. Shell components are aluminum. Dependable 5-key/keyway polarization with bayonet lock coupling provides positive mating with no chance of cross-plugging. Spring tension provided by a wave washer in the coupling nut provides maintenance of interfacial seal between mating halves. Both the insert and main joint gasket are molded from resilient neoprene, providing excellent moisture sealing at the gasket and superior electrical isolation of the contact in the insert. Both pins and sockets are machined from a copper alloy and are gold-plated to eliminate contact corrosion and offer an indefinite shelf life. Socket contacts are a closed entry design. Both series feature environmental-resistant, open-wire sealing with nut and grommet for moistureproofing individual wires. **PT-SE** and **MS/PT-SE series** are intermateable and intermountable with all existing miniature cylindrical series connectors, except for the threaded coupling **PC series**; *order separately on page 952.*

PT06A AND PT06W SERIES (MS3116) STRAIGHT PLUGS

RoHS Compliant Available

Amphenol® Industrial

"A" (SR) Plugs

"A" Plugs

These miniature general-duty straight plugs have twice the number of contacts in half the space of a standard connector. Meet MIL-C-26482 specifications. Feature 5-key/keyway polarization with quick positive 3-point bayonet lock coupling system to provide positive mating without cross-plugging. Aluminum shell with corrosion-resistant, electrically conductive cadmium-plated finish with olive drab chromate after-treatment. Pin and socket solder contacts machined from low-loss copper alloy, gold-plated to eliminate corrosion. Socket contacts are closed-entry design. Molded neoprene insert and main joint gasket.

"A" GENERAL-DUTY PLUGS WITHOUT STRAIN RELIEF
Backshell is threaded for conduit attachment of MS3057 cable clamp; *order separately online or call.*

PT-SE, MS/PT-SE (MIL-C-26482) AND PT-SP SERIES CRIMP-TYPE STRAIGHT PLUGS

Amphenol® Industrial

PT-SE and **MS/PT-SE series** crimp-type miniature straight plugs provide performance and versatility needed for applications demanding high reliability and removable crimp contacts. Rear-insertable/front-release crimp contacts are held in position by an MS-approved spring tower retention system. **MS/PT-SE series** is qualified to MIL-C-26482, Series 1 and has all the same design characteristics and quality of the **PT/SE series**. Both series feature a corrosion-resistant, electrically conductive cadmium-plated finish with an olive drab chromate after-treatment. Shell components are aluminum. Dependable 5-key/keyway polarization with bayonet lock coupling provides positive mating with no chance of cross-plugging. Spring tension supplied by a wave washer in the coupling nut provides maintenance of interfacial seal between mating halves. Both the insert and main joint gasket are molded from resilient neoprene providing excellent moisture sealing at the gasket and superior electrical isolation of the contact in the insert. Both pins and sockets are machined from a copper alloy and are gold-plated to eliminate contact corrosion and offer an indefinite shelf life. Socket contacts are a closed-entry design. Both series feature environmental-resistant strain relief clamp and grommet for moistureproofing individual wires while providing added wire bundle support. **PT-SE** and **MS/PT-SE series** are intermateable and intermountable with all existing miniature cylindrical series connectors; *order separately on page 952*, except for the threaded coupling **PC series**.

MS/PT-SE Series 1 crimp type, miniature circular connectors are qualified to MIL-C-26482 and have all the same design characteristics and quality of the **PT series**. Feature aluminum shell components and corrosion-resistant, electrically-conductive cadmium plating with olive drab chromate after-treatment. Dependable 5 key/keyway polarization with bayonet lock coupling for postive mating. Spring-tension wave washer in the coupling nut provides maintenance of interfacial seal between mating halves. Molded neoprene insert and main joint gasket provides moisture sealing and electrical isolation of the contact in the insert. Pin and closed-entry socket contacts are machined from copper alloy and gold plated to eliminate corrosion. These crimp contacts are rear insertable/front release and are held in position by an MS approved spring tower retention system.

Insert Arrangements

Solder contact miniature cylindrical connectors meet the most critical application needs. Design versatility combined with high-reliability performance makes these series of miniature cylindrical connectors ideal for environmental sealing or pressurized applications. **MS/PT series** is qualified to MIL-C-26482, Series 1 and has all the outstanding design characteristics and quality of the **PT series** connectors; *order separately on page 953, on page 954 and on pages 954-955.* Features a corrosion-resistant electrically-conductive cadmium plate finish with an olive drab chromate after-treatment. Shell components are aluminum. Dependable 5 key/keyway polarization with bayonet lock coupling provides positive mating with no chance of cross plugging. Spring tension provided by a wave washer in the coupling nut provides maintenance of interfacial seal between mating halves. Both the insert and main joint gasket are molded from resilient neoprene providing excellent moisture sealing at the gasket and superior electrical isolation of the contact in the insert. Both pins and sockets are machined from a copper alloy and are gold-plated to eliminate contact corrosion and offer an indefinite shelf life. Socket contacts are a closed entry design. Intermateable and intermountable with all existing miniature cylindrical series connectors except for the threaded coupling **PC series. NOTE:** The MS/PT miniature

- IP65 Rated (Water-Resistant)
- Dust-Tight, Protected Against Jets From Any Directions

44 series high-performance environmentally-sealed connectors feature a resilient, 1-piece design incorporating crimp Poke-Home® contacts, *ordered separately below*, in six insert configurations. Primary and secondary mating seals and discrete wire seals resist liquids (for 14, 16 and 18 AWG; overall wire insulation diameter: 0.080" to 0.130" [2.03mm to 3.30mm]). Santoprene thermoplastic rubber housing. Ideal for auto/truck, marine, industrial, traffic control, security, and mining ventilation systems. Voltage rating: 250VACrms. Current rating: 8A continuous. Temperature range: –40°C to +125°C. *Order tooling separately below.*

MATRIX® MIL-C-26482 SERIES 2 MINIATURE CIRCULAR CONNECTORS

RoHS Compliant Available

Amphenol Aerospace

Wall Mounting Receptacle with Narrow Flange

Jam Nut Receptacle

Straight Plug

- Medium size rugged aluminum shells
- Available in three fluid-resistant finishes
- Environmentally resistant
- Quick positive 3-point bayonet coupling system
- Visual confirmation of complete coupling
- Eliminates mismating by the use of five key/keyway design
- Insertion/removal of contacts from rear eliminates damage to front that might affect sealing
- Contacts are qualified to SAE AS39029 requirements
- Contact sizes: 20 (24-20AWG), 16 (20-16AWG) and 12 (14-12AWG)
- Grommets constructed of tear-resistant elastomer
- Triple webbed sealing grommet at the rear of connector

Matix® MIL-C-26482, Series 2 miniature circular connectors feature a bayonet coupling with crimp rear insertable, rear releasable pin or socket contacts. Durable aluminum shells with corrosion-resistant olive drab cadmium-plated finish except where noted (*) electroless nickel finish and (+) black, non-conductive anodized finish. Durability: minimum of 500 mating cycles. Recommended operating voltage to 1,000VAC (RMS) at sea level. Operating temperature range: –65°C (–85°F) to 200°C (392°F).

MIL-DTL-38999 SERIES III CIRCULAR CONNECTORS FOR PC BOARD APPLICATIONS

Amphenol®

Wall Mount

Jam Nut

- Lightweight, compact, high density and high reliability cylindrical
- Operating voltage to 900VAC (RMS) at sea level
- Environmentally resistant
- Threaded, quick coupling in one complete turn
- Scoop-proof contact protection
- Designed for general duty as well as severe environmental applications
- Olive drab cadmium-plated connector shell
- Red band indicates fully mated; blue band indicates rear release contact retention system

MIL-DTL-38999, SERIES I LJT AND SERIES II JT SUBMINIATURE CIRCULAR CONNECTORS

RoHS Compliant Available

Amphenol Aerospace

Wall Mount Receptacle | Box Mount Receptacle | Jam Nut Receptacle | Straight Plug

- Lightweight, space-saving design
- Quick positive coupling — 3-point bayonet lock system
- Mismating eliminated with dependable 5-key/keyway polarization
- Gold-plated crimp pin or socket contacts
- For environmental applications

MIL-DTL-38999, Series I LJT and Series II JT subminiature circular connectors were developed to meet the needs of the aerospace industry, and provide the impetus for development of MIL-C-38999 specifications, which has been superseded by MIL-DTL-38999. Durable aluminum shells with olive drab cadmium-over-nickel plated finish except where noted (*) cadmium-plated nickel finish. Choice of gold-plated pin or socket crimp contacts installed or *order housings without contacts separately below.*

MIL-DTL-38999 SERIES III, TV TRI-START CIRCULAR CONNECTORS

RoHS Compliant Available

Amphenol Aerospace

- Threaded coupling
- Quick and complete mating in 360° turn of coupling nut
- Lockwire eliminated
- Crimp termination
- Scoop-proof contact protection minimizes contact damage
- EMI shielding
- Moisture and corrosion resistance

Wall Mount Receptacle | Jam Nut Receptacle | Straight Plug

MIL-DTL-38999 Series III, TV Tri-Start circular connectors offer the highest performance capabilities for both general duty and severe environment applications. Durable aluminum shells with olive drab cadmium-plated finish except where noted (*) stainless steel finish. Choice of gold-plated pin or socket crimp contacts installed or *order housings without contacts separately below.* Operating temperature range: -65°C to +200°C. Operating voltage to 900VAC (RMS) at sea level.

(195478)

D38999 QUADRAX TRI-START CIRCULAR CONNECTORS

RoHS Compliant Available

Amphenol Aerospace

TV06 Straight Plug

TV07 Jam Nut Receptacle

TVP00 Wall Mount Receptacle with Quadrax Contact

Features

- **Quadrax Contacts** consist of an outer contact with four strategically spaced inner contacts forming two 100 or 150 Ohm matched impedance differential pairs.
- **Differential Twinax Contacts** consist of an outer contact with two inner contacts spaced to form one 100 or 150 Ohm matched impedance differential pair.
- Recessed pins minimize potential contact damage

Amphenol® **Tri-Start MIL-DTL-38999 Series III Connectors** offer the highest performance capabilities for both general duty and severe environment applications. This series offers more versatility and options than any other interconnection family. Dynamic features for performance and reliability that were needed for military, aerospace and ground vehicle applications were designed into the Series III including rapid coupling via a triple-start thread, shell-to-shell or metal-to-metal bottoming, and improved EMI shielding. Durable aluminum shells with olive drab cadmium-plated finish, except where noted electroless nickel plated finish (*).

***Connectors do not include contacts**; *order quadrax and differential twinax pin and socket contacts separately below.*

D38999 TRI-START CIRCULAR CONNECTORS

RoHS Compliant Available

Amphenol Aerospace

TV06 Straight Plug

TV07 Jam Nut Receptacle

TV06 Straight Plug

Features

- Recessed pins minimize potential contact damage
- Improved interfacial seal design for Moisture Resistance
- Lockwiring Eliminated
- Quick Coupling
- Also uses standard MIL-DTL-38999 contacts, application tools, insert arrangements

TV07 Jam Nut Receptacle

TV00 Wall Mount Receptacle

2M MICRO-MINIATURE CONNECTORS

Micro-Miniature

The 2M Series product line is designed for interconnect applications requiring high performance and reduced size and weight. This smaller, high density, lightweight connector far exceeds the competition in quality and performance levels. The 2M Series is a superior and versatile connector designed and tested to mil-spec standards, comparable to MIL-DTL-38999. 2M is intermateable with Glenair's Mighty Mouse. The test results are available.

Amphenol Aerospace

2M801 DUAL-START ACME THREADS

Full mating in 1 ½ turns. Plug option for anti-decoupling mechanism. Plugs and receptacles come with either accessory threads or integral backshells. Includes PCB and hermetic receptacles, and 2M801 Dualok plugs. Contact terminations include crimp, PC tail, and solder cup, with others upon request. Custom and filtered configurations are available.

2M801-007 | -16 | NF | 6-7 | P | A

Series	
2M801-007	Integral Backshell for Direct Attachment of Cable Shield and Overmold
2M801-008	Plugs with rear accessory thread
2M801-009	Receptacle with Integral Backshell for Direct Attachment of Cable Shield and Overmold
2M801-010	Receptacle with Accessory Thread

Shell Style	
For Shell Styles 2M801-007, 2M801-008	
-16	Plug with Anti-Decoupling Spring
-26	Self-Locking Plug with Ratchet Mechanism
For Shell Styles 2M803-009, 2M803-010

2M805 TRI-START THREADED COUPLING

Offers the best EMI and vibration performance among the 2M connector family. Utilizes Tri-Start thread with 1-turn full mate coupling. EMI ground strap and shell-to-shell bottoming provide superior EMI shielding. Includes PCB and hermetic receptacles. Contact terminations include crimp, PC tail, and solder cup, with others upon request. Custom and filtered configurations are available.

CIRCULAR CONNECTORS

CANNON TYPES MS3106, MS3102, AND MS3101 (MIL-C-5015) CIRCULAR CONNECTORS

ITT

Type MS3106

Type MS3102

Type MS3101

Contact Arrangements
Mating Face View of Pin Insert Shown

MIL-C-5015 circular connectors operate in extreme environmental conditions of high altitude flight. Mfg. part nos. with **prefixes MS3106F** and **MS3101F** feature resilient grommets with internal restrictions in wire cavities that act as individual wire seals. They also include an integral cable clamp that provides strain relief, and mfg. part nos. with **prefix MS3106F** have an O-ring under the coupling nut. Aluminum alloy shells have olive drab chromate coating over cadmium plating. Silver-plated copper alloy socket or pin contacts rated 13A. Tinned solder pot termination. Polychloropene insulators. Temperature range: –55°C to +125°C.

Contact Arrangements

MIL-C-38999 series connectors offer high-density contact arrangements in a miniature circular shell. Originally designed for the especially demanding requirements of today's high performance military and commercial aircraft, these connectors are finding their way into applications needing extremely reliable interconnections, crimp-style connectors. All connectors include: contacts, a plastic insertion/extraction tool and wire hole fillers.

MIL-C-38999 SERIES I

Features include: total environment sealing, wide operating temperature range, quick mating, three point bayonet coupling, 100% scoop-proof shell design and EMI-RFI shielding. Operating temperature: **Finish B** - Olive drab chromate over cadmium over electroless nickel per QQ-P-416, -65°C to 175°C (-85°F to 347°F). **Finish F** - Electroless nickel per QQ-N-290, -65°C to 200°C (-85°F to 392°F).

MIL-DTL 38999 SERIES III HERMETIC CONNECTORS

- Hermetically sealed
- Environmentally sealed
- Screw thread
- Fixed solder pin contacts
- EMI protection
- QPL'd to MIL-DTL-38999

DEUTSCH

MIL-DTL-38999 series III hermetic connectors are especially adapted for severe environments (vibrations + temperature + corrosion + fire). Receptacles feature Deutsch developed direct glass-to-metal sealing, nickel or stainless finishes and solder cup terminated type, pin contacts. These receptacles mate with all qualified D38999 series III plugs. Shell material: stainless steel. Insert material: fused vitreous (glass). Operating temperature: -65°C to +200°C. Salt spray resistance: 500h. Vibrations tests: 43G variable at 200°C from 10 to 2000Hz.

Straight Strain Relief Backshell

Right-Angle Strain Relief Backshell

Dust Cap for Series I and II Receptacles

Dust Cap for Series I and II Plugs

Dust Cap for Series III Receptacles

Dust Cap for Series III Plugs

Straight and right-angle metal strain relief backshells available in olive drab chromate over cadmium over nickel finish (1000-hr. salt spray) or electroless nickel finish (fluid-resistant). Metal dust caps for plugs and flanged receptacles feature an olive drab chromate over cadium over nickel finish (1000-hr. salt spray). Meets MIL-C-38999 military specifications. Used with ITT/Cannon MIL-C-38999 connectors, Souriau MIL-C38999 connectors and Amphenol Amphi-Lite Commercial Series III connectors.

EN2997, MIL-DTL-83723 SEALED, SELF-LOCKING ELECTRICAL ENGINE CIRCULAR CONNECTORS

RoHS Compliant Available

DEUTSCH

Features:

- Stainless steel shell
- Thermo-setting and silicone insert — normal keying position
- Removable, gold-plated crimp contacts
- Self-locking system on all plugs
- Screw threaded coupling is environmentally sealed
- Anti-rotation system on 360° by tightening
- Long-duration salt spray resistance: 500 hours
- Shell-to-shell metal bottoming (plug and receptacle mated)
- Reduced elastomer barriers to use new and old generations of wires
- High temperature class: +200°C or +260°C

Sealed Plug

Sealed Square Flange Receptacle

➤ CONTINUED ➤

EN2997, MIL-DTL-83723 SEALED, SELF-LOCKING ELECTRICAL ENGINE CIRCULAR CONNECTORS (CONT.)

Standards and Quality Approvals:

- EN 2997
- In accordance with MIL-DTL-83723 (MIL-C-83723) Series III
- In accordance with NF-L-54143
- SAE AS39029 (MIL-C-39029)
- EN 3155
- ESC30
- SBAC ESC10
- Boeing BACC63

983 series fine-threaded, sealed electrical circular connectors with secure self-locking feature are ideally suited for aircraft engines, boosters, breaking systems, landing under carriages, APU and pylon applications. Designed for use in harsh environment areas. Sealed straight plugs and square flanged, wall mount receptacles are intermateable and interchangeable with connectors in accordance with MIL-DTL-83723 (MIL-C-83723). Sealed straight plugs with RFI grounding fingers offer electrical continuity between plug and receptacle.

MILITARY-GRADE CABLE CLAMPS FOR CIRCULAR CONNECTORS

Sunbank
www.sunbankcorp.com

Straight aluminum alloy cable clamps support cable or wire at the plug or receptacle and prevent twistng and pulling. Anodized in accordance with MIL-A-8625 or suitable hard anodizing process to meet the performance requirements of MIL-DTL-26500 and MIL-DTL-83723. All threads are in accordance with FED-STD-H28. Ideal for use with Class R and F MIL-DTL-83723 circular connectors including Cinch® Omega C48 series/MIL-C-26500 cylindrical connectors; *ordered separately, go online or call.*

Contact Arrangements
Mating Face View of Pin Insert

Environmentally sealed plugs and receptacles offer high-density contact arrangements in a miniature circular metal shell. Meet all MIL-C-26482 requirements and are intermateable, intermountable, and interchangeable with all MIL-C-26482 connectors, crimp or solder style. Feature aluminum alloy body with olive drab chromate over cadmium finish. Polycholoroprene insulators. Copper alloy crimp or solder pin and socket contacts with gold plating per MIL-G-45204 Type II. Plugs with pin contacts mate with socket contact receptacles and plugs with socket contacts mate with pin contact receptacles. Quick disconnect bayonet coupling for rapid positive mating and unmating. Moisture sealing is achieved by 4 seals: shell, peripheral, interfacial and wire. 500 cycles minimum mating life. Operating temperature: –55°C to +125°C. *Order crimp tool kit separately below when ordering crimp connectors.* **NOTE**: Shell size 8 layout is only available in solder type.

APD CONNECTOR SERIES (DIN 72585) (CONT.)

- Operating temp: -40°C to 140°C (-40°F to 248°F)
- Sealing: IP69K
- Mating cycles: 50 min
- Approvals: DIN72585

APD connectors are designed to work in the roughest environments. APDs are resistant to brake and transmission fluids along with oils, greases, salt, dirt and mud. Originally made to meet the European DIN 72585 requirements for connectors for heavy duty trucking industry, these connectors are finding their way into industrial equipment. These connectors have many high performance features including, quick mating bayonet coupling, lock wire holes for security and wire seals that are crimped with contacts. **NOTE: Code and color must match in order to mate.**

CANNON TRIDENT RINGLOCK® PLASTIC-SHELL CIRCULAR CONNECTORS (CONT.)

TNM Sealed Plug

TNM Sealed Flanged Receptacle

Trident Ringlock® circular connectors offer economy of plastic body with ruggedness of metal ring coupling. Thermoplastic body, rated UL 94V-0. Nickel-plated copper alloy coupling ring. Accepts standard Trident signal contacts, *ordered separately on this page.* Standard format requires male contact (pin) on plug side. Sealed receptacles come fitted with O-ring seal and when used with sealed cable clamps, *ordered separately on this page*, provide splashproof sealing to IP65. Intermateable and interchangeable with FCI Trim Trio™ circular connectors; *order separately on pages 994-995. Order crimp and extraction tooling separately on this page.*

TRIDENT NEPTUNE® METAL (TNM) CONNECTORS

TNM series of circular connectors is an extension of the standard Trident Neptune® and Ringlock® connector series but with advantage of RF shielding. **TNM series** connectors feature strong nickel-plated zinc alloy shells with a metal coupling ring for high-reliability and durability. Provide moisture sealing to IP65. When used with the shielded endbell, *order separately below*, the connector system provides complete RF shielding. Meets EMC requirements for cable-to-equipment or cable-to-cable applications. CE compliant. *Order Trident® signal contacts and tooling separately on this page.*

CANNON POSITIVE LOCK ENVIRONMENTALLY-SEALED CA-BAYONET CONNECTORS (CONT.)

3106 Straight Plug

3102 Box Mount Receptacle

CA-Bayonet MIL-C-5015 style connectors have positive, quick mating 3-point reverse bayonet lock coupling system. Completely sealed to withstand moisture, condensation, vibration, and flash-over. When connector halves are mated, rear sealing grommet and interfacial seal at front create an environmentally sealed assembly. Feature the same shell dimensions, contact layouts, and performance characteristics as the threaded coupling MIL-C-5015 connectors, but do not intermate. Standard plugs mate with box mount receptacles; *order separately below*. Available with pin or socket, solder pot silver-plated copper alloy contacts. Aluminum alloy body with olive drab chromate-over-cadmium finish. Polychloroprene insulator. Standard plugs have integrated cable clamp. Rated up to 13 amps. 500-cycle minimum mating life. Operating temperature: –55°C to +125°C. *Order wire hole fillers separately below.*

ENVIRONMENTALLY-SEALED SURE-SEAL® AND MINI SURE-SEAL® CIRCULAR CONNECTORS

RoHS Compliant Available

SURE SEAL CONNECTIONS
Manufacturer of high quality environmental connectors & accessories

Environmentally-Sealed and Rated to IP67, DIN 400 50

- **Drench It!** — submersible to shallow depths
- **Freeze It!** — operates in temperatures down to -40°F (-40°C)
- **Scorch It!** — operates in temperatures up to +221°F (+105°C)
- **Gunk It!** — wards off gas, brake fluid, and other chemicals

Both Sure-Seal® and Mini Sure-Seal® consist of a one-piece elastomeric molded body and multiple moisture seals that make these circular connectors ideal for applications where outside contaminants must be excluded. Meet or exceed DOT requirements for shock vibration, temperature cycling, salt-water spray and immersion, petroleum derivatives, and industrial gas. Water submersible, sealed to requirements of IP67 and DIN 400 50. Operating voltage: 400VAC. Current rating: 15A. Wire gauge: 18-20 AWG. Mating life: 50 cycles min. Operating temperature: -40°F to +221°F (-40°C to +105°C). Sure-Seal® current rating: 15 Amps; 14-18 AWG. Mini Sure-Seal® current rating: 8 Amps, 18-20 AWG. *Order tin-plated copper alloy crimp contacts, accessories and tools separately below.* **NOTE:** Insert views (shown above) from mating face of plug.

STANDARD-K® SERIES CIRCULAR CONNECTORS

Straight Plug Socket Contacts

Straight Receptacle (Mating Receptacle) Pin Contacts

WK-4 4 #16

WK-6 6 #16

GK-12 12 #16

Standard-K® quick-disconnect connectors are rugged, reliable, lightweight and economical. Do not require special tooling or wire preparation. Simple, foolproof assembly, using a soldering iron and a screwdriver. Body: aluminum alloy with clear chromate over cadmium. Insulators: diallyl phthalate or fabricated phenolic. Contacts: copper alloy with silver plating. Operating temperature: -67°F to +257°F. Available in a wide range of insert configurations with a mixture of both power and signal contacts; *go online or call.* **NOTE:** Insert views (shown above) from mating face of pin insert.

RT360™ INDUSTRIAL CIRCULAR CONNECTORS (CONT.)

- Nickel-plated zinc alloy housings
- Plugs and receptacles accept pin or socket contacts
- Gold flash plated crimp contacts
- Insulation resistance: 5000MΩ min.
- Durability — 500 matings and unmatings
- Vibration resistance per MIL-STD202 method 204
- Thermal shock per MIL-STD202 method 207
- IP67 rated

RT360™ industrial circular connectors are available in five shell sizes and 10 insert arrangements. Designed to be intermateable with other industrial standard connectors, such as the Souriau® TRIM TRIO® UTG and UTP connectors and ITT Industries/Cannon® Trident® series connectors. Feature nickel-plated zinc alloy shells with glass-filled thermoplastic inserts, flammability rated UL94-V0, and a standard NBR interfacial seal. 48-hour salt spray corrosion resistant per MIL-STD 202, method 101. Water protection IP67 per DIN 40050 in mated condition and in combination with sealed backshell. Operating voltage/current: 250V/13A with contact size 16 AWG; 150V/5A with contact size 20 AWG. Operating temperature: -40°C to +105°C. *Order contacts, cord grips, dust caps, panel gaskets, and tooling separately below.*

MotionGrade™ M23 and M40 connector systems offer such features as the FlexGrip™ backshell system and RockSolid™ contacts. These and other features combined with a simplistic design approach reduce initial procurement and assembly cost, while ensuring compatibility to all other existing standard layouts. Ideally suited for advanced servo drive encoder feedback applications, packaging, robotic, printing, machine tool, medical and automation environments where control signal transmission or power are required in a robust and compact delivery system.

AT SERIES CIRCULAR CONNECTORS

Amphenol® Industrial

Features

- Made of molded thermoplastic with Neoprene or Silicone Rubber seal.
- Jam nut and square flange mounting styles.
- Quick mating and unmating - reverse bayonet coupling.
- Environmentally sealed - sealed against moisture and contaminants.
- Contact retention system decreases installation costs and increases reliability.
- Heavy-duty industrial connector, economical connector selection.
- The 9 pin black receptacles are in accordance to the interface of the diagonostic connector of J1939/13.

TERRAPIN SCE2 MINIATURE CIRCULAR PUSH-PULL CONNECTORS

IP68 RoHS Compliant Available

Amphenol Pcd

Rear Panel-Mount Chassis Plug

In-Line Cable Plug

In-Line Cable Receptacle

Latch In-Line Cable Receptacle

TERRAPIN: The Next Generation of SCE Connectors from Amphenol

- Proven in USB 2.0 and Gigabit Ethernet applications
- IP68 sealed when both mated and unmated
- Optional latching mechanism or push-pull
- No separate backshell required
- Full range of accessories available; *go online or call*
- Alternate key positions available; *go online or call*

Intended for harsh environment applications and used extensively in soldier communications, Amphenol Terrapin is a miniature series of circular push-pull connectors. Within a rugged shell design Terrapin offers superior EMC performance and high environmental sealing to IP68. Resilient in severe situations the RoHS compliant black-silver

➤CONTINUED➤

TERRAPIN SCE2 MINIATURE CIRCULAR PUSH-PULL CONNECTORS (CONT.)

plating is both low luster and corrosion resistant. Featuring an optional locking mechanism, multiple shell sizes with up to 37 contacts and suitability for overmolding, Terrapin is an ideal choice for miniature connectors in military and other harsh environment applications.

REAR PANEL-MOUNT CHASSIS PLUGS — PUSH-PULL

Rear panel-mount chassis plugs are available for either PC tail or solder cup termination and mate with both push-pull or latch style cable receptacle; *order separately below.*

LUMINUS LIGHTING CONNECTORS

RoHS Compliant Available

Amphenol Pcd

- Insulator body: Polyamide 6/6
- Grommet: Silicone rubber
- Contact retainers: Stainless steel
- Temperature: -55 C° to 155 C°
- Accepts standard MIL-C-39029/56-57-58 contacts (not included)

Luminus is a compact, configurable interconnect with an easy, secure coupling mechanism and tough polyamide housing. Luminus is ideal for today's sophisticated commercial, military and industrial vehicle interior environments in which full-spectrum, adjustable, and LED lighting creates a more comfortable or productive atmosphere. Yet the rugged Luminus connector equally withstands the punishment of vehicle exterior and emergency lighting. Its small footprint and aircraft-grade cable-mount accessories allow for fast, efficient assembly.

STANDARD BUCCANEER® SEALED CABLE CONNECTORS

RoHS Compliant Available

bulgin a brand of Elektron Technology

- Sealed to IP68 when mated
- Overall diameter of 38mm
- Housing resistant to dust, oil and salt water
- Leading ground contact for 3 way versions
- Cable acceptance: 6-8mm; 3.5-9mm with alternative glands
- Color: Black

Buccaneer® environmentally sealed cable connectors are specifically designed for harsh applications where water, dust, oil or spray could present a hazard. These robust connectors are dust and waterproof to IP68. Mates with in-line and panel mount Buccaneer® sealed connectors; *order separately online or call.* Screw termination on 2, 3, 4, 6 and 7 way, crimp on 9 way, crimp or solder on 12 and 25 way. Order 12 and 25 way contacts separately; *go online or call*

STANDARD BUCCANEER® SEALED IN-LINE CABLE CONNECTORS

RoHS Compliant Available

bulgin a brand of Elektron Technology

- Sealed to IP68 when mated
- Overall diameter: 38mm
- Housing resistant to dust, oil and salt water
- Leading ground contact for 3 way versions
- Cable acceptance: 6-8mm, 3.5-9mm with alternative glands
- Color: Black

In-line environmentally sealed cable connectors are specifically designed for harsh applications where water, dust, oil or spray could present a hazard. Dust and waterproof to IP68. Mate with standard Buccaneer® sealed cable connectors; *order separately on this page.* Screw termination on 2, 3, 4, 6 and 7 way, crimp on 9 way, crimp or solder on 12 and 25 way. Order 12 and 25 way contacts separately; *go online or call*

6000 SERIES BUCCANEER® SEALED IN-LINE FLEX CABLE CONNECTORS

RoHS Compliant Available

bulgin a brand of Elektron Technology

- Push/pull latching mechanism
- 30° twist locking
- Sealed to IP66, IP68 and IP69K when mated
- For in-line cable connections
- Pin or socket versions
- Leading earth on 3 pole connectors
- Screw and crimp termination

Metal connectors mate with **mfg. part no. PXM6010** flex cable connectors, plastic connectors mate with **mfg.part no. PXP6010** flex cable connectors; order separately *on this page. Order contacts separately on this page.*

METAL FLEX CABLE CONNECTOR

PLASTIC FLEX CABLE CONNECTOR

METAL IN-LINE FLEX CABLE CONNECTOR

PLASTIC IN-LINE FLEX CABLE CONNECTOR

METAL FRONT PANEL MOUNTING CONNECTOR

PLASTIC FRONT PANEL MOUNTING CONNECTOR

FEATURES:

- Less than ¼ Turn locking mechanism
- Positive feedback on locking mechanism
- IP66, IP68 and IP69K when mated
- All metal body version: cast zinc alloy, nickel plated
- All plastic body version: UL94-V0 rated, UV stable, halogen free
- Flex, flexin-line & panel mount body styles, with sealing caps
- Polarisation and visual alignment features
- 2 to 32 poles - up to 25A, 600V rated
- 'Scoop proof' contacts

The **7000 Series Buccaneer®** - circular connectors that combine the ease of use of a quick coupling mechanism with proven environmental sealing for signal and mains power. Designed and independently tested to IP66, IP68 & IP69K standards, they are ideal for applications where ingress of dust and water must be avoided and where ease of connection, space and appearance are important considerations. **For crimp termination contacts sold separately.** *More options available; go online or call.*

- 1 Gbit-ethernet and 10 Gbit-ethernet when used with Cat 5e, Cat 6A or Cat 7 cables
- Crimp snap, 39029-style contacts for easy termination and field repairability
- Backshell integrated in plug body provides low profile, low weight strain relief and EMI protection
- T-shaped pin pattern improves SI through uniform crosstalk cancellation
- Compatible with multiple braid terminations, adaptor styles and seal boots
- Scoop-proof design
- Insert assembly mechanically retained for ≤ 25lb retention force
- Robust coupling ring mechanism
- Size 8 shell saves weight and space
- Insert material: thermoplastic
- Contact material: copper alloy

MIL-E-QUAL® CIRCULAR CONNECTORS

IP67 UL CSA RoHS Compliant Available

conxall Harsh Environment Connectivity Solutions A HEICO Company

MADE IN USA

Mil-E-Qual® connectors are the pastic equivalent to the military standard MIL-C-5015 connector series. The rugged super tough, UV resistant, plastic construction makes this connector suited for many different environments. With an IP67 rated construction, when mated, even harsh environments are not a problems for the Mil-E-Qual® connector series. The plastic construction makes this series of connectors a cost effective equivalent to metal versions of this connector. UL recognized, CSA certified.

MULTI-CON-X® AND MINI-CON-X® HARSH ENVIRONMENT CONNECTORS

RoHS Compliant Available

conxall Harsh Environment Connectivity Solutions A HEICO Company

IP67 UL

MADE IN USA

Watertight connectors designed for industrial, marine, construction and other harsh environment applications. Non-corrosive, high-impact, molded construction minimizes hazards of electrical shock and provides resistance in hostile outdoor environment. Also suited for a wide variety of non-environmental applications such as communication systems, medical, data processing and entertainment devices. Available in cable-end, panel mount, or cable-to-cable connections. Solder cup contacts have gold-over-nickel plating. Mfg. part nos. with **suffix -DC** indicates daisy chain grommet with three I.D.'s: 0.125″, 0.188″ and 0.25″. UL recognized. **NOTE:** When mating two cables, the cable-to-cable connectors need to be used in conjunction with the cable end connectors. For example: **mfg. part no. 5182-2PG-3DC** mates with **mfg. part no. 3182-2SG-3DC.**

MAXI-CON-X® HIGH DENSITY CONNECTORS

IP67 RoHS Compliant Available

conxall® Harsh Environment Connectivity Solutions A HEICO Company

MADE IN USA

Weathertight, high-density nylon-filled connectors have screw-machined solder contacts with gold-over-nickel plating. Flanged panel mount connectors are installed through back of panel and can be fastened by hex nuts, rivets or screws through four molded holes in flange. Mechanical type cable clamp securely grips cable. Rubber gland adds support and offers environmental protection in harsh environments. Cable end connectors include rubber grommet seal to fit up to 0.380" (9.6mm) cable diameter and o-ring; panel mount connectors supplied with hex nut and gasket. **NOTE:** When mating two cables, the cable-to-cable connectors need to be used in conjunction with the cable end connectors. For example: **mfg. part no. 15182-7PG-326** mates with **mfg. part no. 13182-7SG-321**.

CIRCULAR CONNECTORS

MICRO-CON-X® SUBMINIATURE CONNECTORS

RoHS Compliant Available

conxall® Harsh Environment Connectivity Solutions A HEICO Company

MADE IN USA

IP67

- Up to 7 contacts in a compact, lightweight thermoplastic design
- IP-67 ratng
- Meets NEMA 6P when mated
- Voltage rating: 600V
- Current rating:
  7.5A — 2 or 3 #20 contacts
  6A — 4 #22 contacts
  4A — 5 or 6 #26 contacts
  3.4A — 7 #26 contacts
- Operating temperature range: -40°C to +115°C

Environmentally sealed molded thermoplastic Micro-Con-X® connectors small enough to fit a 0.53" (13.5mm) opening. Construction reduces shock hazards and resists hazardous environmental conditions. Cable end version includes weathertight rubber grommet; panel mount version includes hex nut and rubber gasket. Panel connectors mount 0.43" (10.9mm) round or "D" shaped hole from behind and securely fasten with hex nut on front of panel. Choice of pin or socket copper alloy, gold-over-nickel plated solder or crimp contacts. **NOTE**: When mating two cables, the cable-to-cable connectors need to be used in conjunction with the cable end connectors. For example: **mfg. part no. 18282-2PG-311** mates with **mfg. part no. 16282-2SG-311**.

INDUSTRY STANDARD MINI-MIZER® CONNECTORS

RoHS Compliant Available

conxall® Harsh Environment Connectivity Solutions A HEICO Company

MADE IN USA

600V weathertight connectors for sensor, automotive, robotic, instrumentation and controls applications; comply with UL, CSA, NEMA, ANSI and NFPA standards. Provide moisture-tight connection under 6' water, making them perfect for harsh environments. Black anodized machine aluminum receptacle has epoxy-sealed contacts and mating plug includes metallic coupling ring. Gold-plated screw-machined brass contacts resist corrosion and perform in low current applications. Plugs with socket type contacts available in 3, 6 and 12' lengths; receptacles with pin type contacts are designated by (*) and include 1' leads. 16 AWG standard cable/wire size. UL recognized, CSA certified.

RoHS Compliant Available

Switchcraft® Harsh Environment Connectivity Solutions A HEICO Company

MADE IN USA

IP66 IP68

Fig. 1

Fig. 2

Fig. 3

Fig. 4

- Easy to assemble
- Cable clamp secures cable up to 0.38″ in diameter
- Boot seals cable diameters between 0.23 and 0.38″
- Brass nut secures cable clamp

Fig. 5

Fig. 6

Fig. 7

Ideal for process control, marine electronics, medical instrumentation, geothermal instrumentation, communications, transportation, general industrial electronics. Superior leakage protection. The contact area is double-sealed for excellent moisture and chemical resistance. Thermoplastic rubber body simulates closed entry contact system to prevent probe damage or accidental loss of spring retention due to misaligned or bent pins. Housing rated at UL94V-0 against flammability. Panel connector shell features a positioning keyway to prevent misalignments and a polarizing single "D" design for proper panel mounting and to prevent rotations. Made of thermoplastic polymer glass fiber. Rear boot and connector shell interior are thermoplastic rubber. Contacts are copper-base alloy, gold-plated over nickel underplate. O *rder* **type EN3CAP** *sealing cap separately below.*

MINI-CHANGE® ATTACHABLE CONNECTORS

RoHS Compliant Available

Woodhead

- Make cables the length you want
- Route cable without connector through tight spaces then add field attachable connector.

Mini-Change® connectors enable quick-disconnect wiring on specialty cables and pre-wired control system devices. Meets IEC IP68 enclosure classification. Field-wireable with a screwdriver.

C90 SERIES COMMERCIAL MIL-DTL-5015 CIRCULAR CONNECTORS

RoHS Compliant Available

HARWIN

Panel Mount Receptacle with Pin Contacts | Panel Mount Receptacle with Socket Contacts | Cable Plug with Pin Contacts | Cable Plug with Socket Contacts

- Intermateable with MIL-DTL-5015 (MIL-C-5015) connectors
- Full environmental sealing with backshell and sealing gasket — exceeds IP-67
- Zinc and black chromate-plated aluminum alloy shells
- Threaded coupling
- Silver-plated copper alloy pin and socket contacts
- Solder termination

C90 series high-reliability, rugged, circular connectors meet the high performance standards of MIL-DTL-5015 (MIL-C-5015), yet are priced to be cost-effective for commercial and industrial applications. Designed for use in harsh and demanding environments where vibration, moisture and pressure/temperature are extreme. Choice of free-hanging (inline) straight cable plugs and panel mount receptacles with four-hole flange. Free-hanging (inline) cable receptacles, other shell sizes and insert arrangements are available; *go online or call*. Current rating: 13A. Voltage rating: 10SL shells 500VAC/700VDC; 14S shells 200VAC/250VDC. Insulation resistance: 5000Mohm min. Recommended 16-22 AWG wire size. Operating temperature range: -55°C to +125°C.

PUSH-PULL SELF-LATCHING CIRCULAR CONNECTORS

LEMO® The Original Push-Pull Connector

IP50

B Series Cable Plug | B Series Panel Receptacle | S Series Cable Plug | S Series Free Cable Receptacle

- Designed for many indoor applications including medical, broadcast, industrial control, energy, test and measurement
- Security of the Push-Pull self-latching system
- Chrome-plated brass housing
- Gold-plated solder contacts
- PEEK multipole insulator
- Cable connectors include recommended collet for strain relief
- 360° screening for full EMC shielding
- Temperature range: -55°C to +250°C

These circular connectors feature a Push-Pull self-latching connection system that allows the connector to be mated by simply pushing the plug axially into the receptacle.This self-latching system allows for easy and quick mating and unmating. Plus it provides security against vibration, shock or pull on the cable, and facilitates operation in a very limited space. Rated IP50. UL recognized, CE compliant.

B SERIES — STRAIGHT PLUGS WITH CABLE COLLET AND PIN CONTACTS

B series connectors feature standard G keying that prevents errors in connector alignment.

SMARTCLICK™ WATERPROOF SENSOR I/O CONNECTORS

RoHS Compliant Available

OMRON ELECTRONIC COMPONENTS

Straight Solder Plug

Straight Solder Receptacle

Straight IDC Plug

Straight IDC Receptacle

- Rated at 4A / 250VDC
- Maintains compatibility with and degree of protection (IP67) as conventional, screw-type M12 connectors
- Turn ⅛ of a turn to lock (positive click indicates locking)
- Gold-plated brass contacts
- Connector with cable are UL approved
- Temp. range: -25°C to +70°C

INDUSTRIAL M12 CIRCULAR WIREMOUNT CONNECTORS, 3N104 AND 3N304 SERIES

3M

3N104-A000-S08BF

3N304-A000-S08BF

3N104-D000-S08BF

- Compact size; male connector: 45mm / female connector: 40mm
- Solder termination for 24 to 20AWG wire cable compatability
- Body material: thermoplastic
- Contact material: copper
- Contact plating: gold
- IP68 protection

For factory automation applications and other harsh environments these robust connectors are designed to provide IP 68 and EMI protection in compliance with IEC 61076-2-101. The solder cup allows a quick and easy termination to cables ranging from 24 to 20AWG saving time and enabling custom cable assembly lengths. Available in two different codes, A and D. Each code has a different interface that can only be mated with connectors of the same code.

JDX HYBRID MIXED POWER AND SIGNAL WATERPROOF CONNECTORS

IP68 RoHS Compliant Available

SOURIAU

NEW

Esterline Connection Technologies

- Single Connector Solution for simplified cabling
- Waterproof, IP68 (Mated and Unmated)
- Disengages at specified pull force levels for safe quick disconnects
- Robust to withstand Harshest Environments
- 3 Layouts Available for multiple applications
- Audible, Tactile and Visual mating confirmation
- Small footprint, allows access in tight applications
- 360° EMI Shielding

Plug

Receptacle

The **JDX** mixed power and signal connector offers the ability to integrate 2 or 3 power contacts with 6 to 8 signal contacts in one connector housing.

IP68/69K UTS SERIES PLASTIC SEALED TRIM TRIO™ CIRCULAR CONNECTORS WITH SCREW TERMINATION CONTACTS

RoHS Compliant Available

SOURIAU

Esterline Connection Technologies

Plug — In-Line Receptacle — Jam Nut Receptacle

- No special skills or tools required, only a screwdriver is needed to fit wires to the contacts
- Contacts accept a wide range of wires
- Rapid mating with ⅓ turn with an audible and sensitive "click", minimum 250 mating cycles
- Time saving in field installations, easy to use and assemble
- Extreme sealing performance: IP68/69K Dynamic
- High salt spray resistance
- Male connectors have a grounding contact
- Fully intermateable and interchangeable with the existing similar layout UTS crimp and solder versions

UTS series circular connectors with screw termination contacts combines extreme sealing performance, rapid and secure mating with the ease of wire termination. Requires only a screwdriver to fit wires to the contacts, making it incredibly user friendly and suitable for any field installation. Typical applications for **UTS series** connectors with screw termination contacts are lighting, traffic control, pumps, pool equipment, access control etc. Available for 12-4 and 14-7 layouts with female plugs and a male receptacle.

TRIM TRIO™ STRAIGHT CABLE CLAMPS WITH STRAIN RELIEF

RoHS Compliant Available

SOURIAU

Esterline Connection Technologies

Glass-filled thermoplastic polyester clamps attach to the cable side of the connector to support the cable or wire bundle, providing strain relief and absorbing vibration and shock otherwise transmitted by the cable to the contact.

Strain Relief Backshell

TRIM TRIO™ UT0 CABLE CLAMPS WITH STRAIN RELIEF

RoHS Compliant Available

SOURIAU

Esterline Connection Technologies

UT024AC

UT018JCL

CABLE CLAMP BACKSHELL WITH STRAIN RELIEF

Nickel-plated metal cable clamp with strain relief attaches to the cable side of the **UT0 series** connector to support the cable or wire bundle, provide strain relief and absorb vibration and shock. Other shell sizes available; *go online or call.*

Mfg. Part No.	For Use With Shell Size	Max. Cable Dia. (mm)	Stock No.	Price Each 1-9	Price Each 10-24

CIRCULAR MINI DIN PLUG SINGLE-ENDED CABLE ASSEMBLIES

CINCH

Pre-assembled single-ended cable assembly meets FCC requirements for EMI/RFI suppression. Features phosphor bronze contacts with standard plating of gold flash over nickel underplate. Current rating: 1A at 100VAC; 2A at 12VDC. Contact-to-contact resistance: 30mΩ maximum. Insulation resistance: 500MΩ minimum at 500VDC. 0.197″ (5.0) OD black, PVC cable jacket over 28 AWG stranded wire conductors. Nylon plug insulator, rated UL94V-0 with black PVC plug overmold. Molded-in strain relief. Operating temperature: -40°C to +70°C. UL recognized, CSA certified.

Authorized Distributor

Standard Receptacle (2 Mounting Holes)

Standard Receptacle with Front Metal Shield

- Nylon Housing, Rated UL94V-0
- 0.063″ Diameter x 0.250″ Deep Mounting Holes
- Tin-Plated Brass Contacts

Receptacle with Front Metal Shield (2 Mounting Holes)

Plug Assembly

PC board receptacles available with or without tin-plated brass front shield. Plugs are interchangeable/intermateable with other DIN standard connectors, and meet or exceed DIN specification 41524 for 5-position and 45322 for 6-position plug. A complete plug assembly requires: one black nylon plug housing with tin-plated brass shield; tin-plated brass ferrule; cord guard; and 50μ″ snap-in contacts; *all ordered separately below.* 100μ″ silver-over-copper plated pin contacts available; *go online or call.* Application tools, including ferrule tool to crimp ferrule to shield, *ordered separately below.* UL recognized, CSA certified.

convertCON XLR CONNECTORS (CONT.)

convertCON series is the first unisex XLR cable connector with all the benefits of the XLR **XX series**. No matter if you want to connect a female or male chassis connector, **convertCON** fit's all! The gender is easily selectable without any tool. Simply slide the housing back and forth. No adapter is needed anymore. Connector offers gold contacts and the termination onto the cable is as easy as with Neutrik's well established **XX series**. The new **convertCON** is branded with a unique hologram, which guarantees a genuine and authentic Neutrik product.

NEUTRIK

Fig. 1 Fig. 2 Fig. 3 Fig. 4

Fig. 5 Fig. 6 Fig. 7 Fig. 8

Compact, uniquely styled die-cast shell with internal thread that mates with external thread on boot to eliminate thread exposure found on other XLR connectors. Improved chuck type strain relief increases retention force and makes assembly easier and faster. Female connector incorporates new cage type contact with seven independent contact points for lower contact resistance and higher connection integrity. Current rating: 16A per contact. Wire size: 14 AWG. Die-cast zinc shell with nickel finish, except **B** and **BAG suffix** which are black chrome. Male connectors have brass contacts and female have bronze. Male connectors have brass silver-plated contacts, except **B suffix** which are gold-plated. Female connectors have bronze silver-plated contacts, except **B suffix** which are gold-plated. All **XX series** XLR connectors come standard with black (-blk) color-coded ring; *other colors available, go online or call.*

XX SERIES CABLE CONNECTOR - EMC

The EMC-XLR cable connector is the answer for a noise-safe audio signal connection. 3 pole male / female XLR cable connector with capacitive cable shield - shell connection to avoid RF-interference an LF-noise. 360° shield contact on female connector ensures best possible shielding and chassis contact. EMC connectors can be mated with **DLX series** XLR panel mount connectors.

SPEAKON® CONNECTORS

Speakon® connectors are used in professional speaker and amplifier applications. Termination can be either soldered or solderless screw-type terminal compression on cable mount versions; solder or quick disconnect on panel mount versions; and horizontal termination on PC board mount version. Field repairable, no special tools required. Meets IEC65, IEC348 safety standards. *Order coupler **NL4MMX** for linking (extending) cable separately below.*

SPEAKON® SPX SERIES PROFESSIONAL LOUDSPEAKER AND AMPLIFIER CONNECTORS

RoHS Compliant Available

NEUTRIK

- 3 pieces
- Strain relief accepts a wide variety of cable diameters (6-14mm)
- Handles 50A @ 50% load, 40A rms continuous
- New ergonomic design
- Larger latch and rear boot for easier handling

NL4FX NL4FRX NL4MP-UC

SPX series Speakon® connectors feature a higher current rating for usage with high-powered speakers and amplifiers carrying more than 1000 Watts. Assembly is fast and easy with less parts to handle and a redesigned insert that does not require any special tools. A unique design allows user to take a straight connector and convert it into a right angle, without disconnecting the cable, by using the "quick-change" conversion kit; *order separately below.* PBTP housing is flammability rated UL94-HB. Rated current per brass contact: 40Arms continuous. Rated insulated voltage: 250VAC. Insulation resistance: > 1GΩ. Dielectric strength: 4kV peak. Wiring: screw-type terminals or soldering (complies with IEC 68-2-20). Temperature range: -30°C to +80°C.

- All-metal housing
- Meets IP54 protection class
- Precise "quick-lock" system
- Easy to assemble
- Mates with all 4-pole Speakon® connectors

NLT4MP NLT4FX-BAG NLT4MX

STX series Speakon® 4-pole lockable connectors are designed for loudspeaker/amplifier applications in harsh environments. Choice of male and female cable- and chassis-style connectors that feature durable, zinc die -cast metal housings available with nickel or black finish. Cable connectors have 1-pc. chuck design with bushing that handles cable O.D. range of 0.35-0.63″ (9-16mm) with a maximum wire gauge of 10 AWG. Female chassis connectors feature solder cups. All are solder wire terminated except **mfg. part no. NLTP4MP** which features flat tabs for Faston® (0.25″ x 0.03″). Chassis connectors feature a 4-hole flange for mounting. Built-in gaskets make these connectors weatherproof to IP54 class protection (when mated together). Rated: 40A rms continuous per contact/250VAC insulation voltage. Quick-lock with latch retention. Temperature range: -30°C to +80°C. Flammability rated: UL94HB.

PC BOARD MINIATURE 0.137" (3.5) JACKS

MADE IN USA · RoHS Compliant Available · Switchcraft® Harsh Environment Connectivity Solutions A HEICO Company

Fig. 1 Fig. 2 Fig. 3 Fig. 4

Mono 2 and stereo 3 conductor jacks for IEC or JIS standard 3.5mm plugs. Mount in 0.062" (1.57) thick PC boards. Vertical jacks are 0.492" (12.5) high max., 0.314" (8.0) centers and mount on 0.334" (8.5) centers. Horizontal jacks are 0.244" (6.2) high max. and mount on 0.480" (12.2) centers. Threaded bushing except **35RAPC4BHN2** non-threaded. **Mfg. part no. 35RAPC7JS** minature 1.37" (3.5) 3-conductor, dual stereo phone jack in a single vertical-mount footprint. Mates with 1.37" (3.5) finger plugs. Board retention pins accommodate PC board 0.050-0.080" (1.27-2.03) thick. Single screw panel mounting hole. Available with EMI/RFI 0.016" (0.41) pre-tinned brass shield. Polymer housing rated UL94V-0. Shunt, tip and ring terminals are 0.016" (0.4) silver-plated brass. Dielectric withstanding voltage: 500VAC. 0.592" (15.04) wide x 1.05" (26.67) high x 0.54" (13.72).

RF PHONO PLUGS AND JACK

MADE IN USA · RoHS Compliant Available · Switchcraft® Harsh Environment Connectivity Solutions A HEICO Company

3507 · 3505FX · 3502AAU

Mfg. part no. 3507 2-conductor RF phono plug has nickel-plated brass body and screw-on handle. **3505F** 2-conductor phono jack mounts panels up to 0.172″ (4.37) thick. **3502** plug has a larger cable clamp providing increased strain relief for larger cable. Longer cable clamp for easier plug assembly. Knurled handle provides increased gripping surface for tightening and withdrawal of plug.

Mfg. Part No.	Description	Stock No.	Price Each 1-9

RIGHT-ANGLE PHONO (RCA) PLUGS

MADE IN USA · RoHS Compliant Available · Switchcraft® Harsh Environment Connectivity Solutions A HEICO Company

These plugs feature an easy-to-assemble 3-piece construction: a handle, insulator, and plug assembly. Solid-pin design and large solder terminals make termination fast and easy. The reduced profile makes them perfect for use behind equipment where space is at a premium. Knurl on back of handle provides ergonomic gripping surface to tighten plug. Used in such markets as audio, broadcast studios, audio cable assembly manufacturers, instrumentation and test equipment.

Mfg. Part No.	Description	Stock No.	Price Each 1-9

LITTEL-JAX® PHONE JACKS

MADE IN USA · RoHS Compliant Available · Switchcraft® Harsh Environment Connectivity Solutions A HEICO Company

11, C11X · 13 · 12A · 12B, C12BX

Feature notched insulating washers that mechanically interlock springs and solder lugs. "V" bend in tip spring firmly holds mating phone plug, listed in table below; *ordered separately on page 1009*. Mount in single 0.375″ hole in panels up to 0.156″ thick, except **mfg. part no. L-11** in panels up to 0.25″ thick. **C11X** and **C12BX** have locating pin (non-turn device).

AUDIO/VIDEO CONNECTORS

IP66-IP68 / NEMA 250 (6P) SEALED POWER JACKS AND PLUGS

MADE IN USA RoHS Compliant Available Switchcraft® Harsh Environment Connectivity Solutions A HEICO Company

Solder Lug Panel
(Shown with JCAP Sealing Cap)

Straight PC

Right-Angle PC

- Rated IP66, IP67, IP68 / NEMA 250 (6P) when mated
- Current rating (carry): 5A
- Available in multiple pin diameters
- Made in U.S.A.

Power Plug

Sealed power jacks and plugs are designed for a variety of applications, including outdoor power supplies where a weather-resistant connection is needs; medical equipment where a waterproof power plug is required and lighting connections where a harsh environment connector is needed to provide a reliable sealed connection.

POWER JACKS

Power jacks feature split center pin shaped to hold mating plug firmly. Right-angle versions offer "kinked" PC terminals for better board retention. Automatic switch over from AC to DC permitted by sleeve shunt spring. Rigid thermoplastic housing and insulators. Copper alloy terminals and bushing with assembled, lubricated O-ring. Hardware supplied. Dielectric withstanding voltage: 500VAC max. To protect jack when not in use, *order* **mfg. part no. JCAP** IP-rated *sealing cap separately below.*

PC BOARD RIGHT-ANGLE LOCKING POWER JACKS

RoHS Compliant Available Switchcraft® Harsh Environment Connectivity Solutions A HEICO Company MADE IN USA

Right-angle locking power jacks for PC board mounting. Three copper alloy pins available in 0.080″ and 0.100″ diameters. Center split pin shaped to hold mating plug firmly. Kinked terminals allow easy, snap-in PC board mounting. Sleeve shunt spring permits automatic switchover from AC to DC. Threaded bushing allows use of both standard and locking power plugs. Choice of standard long bushing (0.219″) or longer bushing (0.319″) to accommodate thicker panel mount applications and plugs with 0.475″ long fingers. Molded plastic housing. Copper alloy mounting bushing, hex nut, spring, and terminals. Contact rating: 5A, 12VDC resistive. Ideal for applications where a locking feature is needed, such as portable computers, cellular phones, DC-powered hand-held instrumentation, and battery chargers.

91 SERIES MICROPHONE CONNECTORS

COOPER Interconnect

Fig. 1

Fig. 2

Fig. 3

91 series 3-, 4- and 6-contact connectors, designed primarily for audio equipment, find extensive use with all types of portable equipment. Cord protector spring ID on 3 contact units = 0.281″ (7.14); on 4 and 6 contact units = 0.385″ (9.78). Connectors feature positive screw-type coupling ring connection and squeeze-type clamp cable grips. Shells are chrome-plated brass, with molded black phenolic dielectric. Voltage rating: 600Vrms. Current ratings: female contacts, 3A; male contacts, 5A. Voltage breakdown: 2000V.

Cable Mount

Panel Mount

Ideal for use in communications equipment where the highest reliability is required under the most severe environmental conditions. 5- and 6-contact versions are lightweight and designed to meet MIL-C-55116 specifications. 10-contact versions meet the latest MIL-C-10544 specifications. All feature easy mating using a twist-lock motion. Nonrigid, spring-loaded contacts provide a positive electrical connection with minimum voltage drop. Cable mount version available with solder cup or crimp contacts.

HDMI Cable Assembly

Tyco Electronics' connector incorporating High-Definition Multimedia Interface (HDMI™) technology is an interface for consumer electronics products such as digital television, set-top boxes and DVD players. HDMI's 19 positions and 5 Gbps of bandwidth supports standard, enhanced, or high-definition video, plus multi-channel audio on a single cable. HDMI connectors and cable assemblies replace existing audio and digital cabling in one assembly. Features a friction lock design that provides secure electrical contact and smooth cable insertion/extraction.

HDMI CONNECTORS

RoHS Compliant Available

FCI

Specifications
- Housing: Copper Alloy
- Shell: Copper Alloy
- Contacts: Gold plated Copper Alloy
- Insulation Resistance: Unmated > 100 Mohm; Mated > 10Mohm
- Current Rating: 0.5 A minimum
- Contact Resistance: 30 mohm maximum
- Voltage Rating: 40 VAC maximum
- Durability: 10,000 cycles
- Temperature Range: -55°C to +85°C

Features:
- Choice of partial SMT/PIP or full SMT mounting style
- Metal shell for better EMI Shielding protection, especially for the straight version
- HDMI 1.3a compliance
- Low impedance mismatch
- Straight version features additional grounding pins for enhanced EMI performance
- Backward compatible with DVI

HDMI (High Definition Multimedia Interface) is the ext generation interface replacing the existing DVI connector. It is commonly seen in consumer electronics products, such as digital television, DVD players and set top boxes. HDMI is backwards compatible with DVI and is much smaller and more user-friendly. The connector system supports the transmission of uncompressed video and audio along a single cable at 5Gbs. The right angle version is available with full surface mount (SMT) soler tails and pegs or SMT solder tails and through hole pegs, with or without flange and plating contact options. In addition a straight solder version is available with enhanced EMI shielding performance.

Mfg. Part No.	Description	Stock No.	Price Each 1-9	Price Each 10-24

MICROCROSS™ DIGITAL VISUAL INTERFACE (DVI) CONNECTOR SYSTEM

RoHS Compliant Available

molex

Microcross™ DVI I/O connectors from Molex offer the standard digital interface for connecting a host device and display device to support high-resolution digital and/or analog video functions. Crossing ground blade design and LFH™ (low force helix) shrouded contacts support over 1.65Gbps per differential pair (for 9.9Gbps over a dual link implementation) and 2.5GHz support for the analog interface. By providing a single high-performance interface, board I/O space is saved and lower system costs are achieved. The interface provides added benefits of a high-cycle life interface for mobile applications and the improved EMI performance needed for high-speed links.

RECEPTACLE HEADERS

Feature glass-filled thermosplastic housing, rated UL94V-0. Copper alloy contacts with gold flash plating. Voltage: 40V. Current: 1.5A. Operating temperature: -20° to +85°C.

AMP 50-OHM BNC PLUGS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- MIL-Style is built with teflon dielectric material
- Commerical-Grade connectors have polymethylpetene or polypropylene dielectric material

Bayonet-locking coupling provides highly reliable, quick connect/disconnect coaxial connections and low VSWR. Fully intermateable with comparable BNC UG/U connectors. Crimp versions are MIL-C-39012 Category B Type, many dual crimp versions meet or exceed all requirements in specifications MIL-C-39012, Class II, Category B. *Order hand tools, listed in table below, or order separately online or call.*

Authorized Distributor

- MIL-Style dielectric material is teflon
- Commercial-grade dielectric material is polymethylpentene or polypropylene

Bayonet-locking coupling provides reliable, quick-connect/disconnect coaxial connections and low VSWR. Working voltage: 500Vrms. Dielectric withstanding voltage: 1500VAC. Frequency range: single crimp 0-2.5GHz; dual crimp, 0-4GHz. Crimp versions are MIL-C-39012 Category B Type. *Order hand tools separately online.*

Fig. 4

Designed for use in telecommunications. Mate with standard 50-ohm BNCs without damage. BNC-T1 provides constant 75-ohm performance with low VSWR DC to 4GHz. BNC-T2 is usable with low reflection DC to 1GHz. For applications above 1GHz, manufacturer recommends BNC-T1. *Order die sets separately online or call.*

TRUE 75-OHM HDTV BNC CONNECTORS

RoHS Compliant Available

KINGS by WINCHESTER ELECTRONICS

- Voltage Rating: 500VRMS
- Contact Resistance: Center 0.0014-Ohm, Outer 0.002-Ohm
- Insulation Resistance: 5000MΩ
- Flammability Rated: UL94V-0 (Center Conductor Insulator)

BNC Plugs

BNC Plugs Dimensions

2065 series BNC connectors are TRUE 75-ohm connectors designed to terminate the most commonly utilized coaxial cable in the broadcast industry. Meet the industry's stringent HDTV standards and feature a full crimp design. Field installable with ratchet-style crimp tool and die sets; *order separately below.*

75-OHM BNC PLUGS

30-PC. UNIVERSAL COAXIAL ADAPTER KIT

RoHS Compliant Available — multicomp

Mfg. part no. 8589-0863 30-piece universal adapter kit allows mix and match of any 2 male or female coaxial fittings. Each connector has a common end and a universal end. Simply choose the 2 common connector ends needed and screw them together with the universal adapter. Kit contains 6 universal adapters, 2 each of the following: BNC male adapters, BNC female adapters, N male adapters, N female adapters, SMA male adapters, SMA female adapters, TNC male adapters, TNC female adapters, UHF male adapters, UHF female adapters, mini-UHF male adapters and mini-UHF female adapters. All parts are silver plated with gold contacts and Teflon® insulation. Features handy zippered storage case.

UPL2000 Series

UPL2000 series high-frequency, true 75-ohm BNC crimp plugs are designed to handle high bit-rate digital video signal transmissions in conjunction with low-loss coaxial cable used in broadcast applications. Deliver long-term field performance at high frequency for error-free transmission of digital signals over the entire bandwidth utilized by HDTV signal transport. Fully enclosed, heat-treated beryllium copper outer conductor spring improves EMI/RFI suppression and reduces signal loss. Black nickel-finished shell with machined PTFE insulator for superior RF electrical performance. Captivated and locking center contact plated with 50μ" gold over nickel over copper over brass. Gold-flash palladium, nickel-plated beryllium copper outer contact.

Launch the signal off the PC board in any direction through a bulkhead or motherboard. Reduce board space, cable bend and mating torque forces on the PC board. **Mfg. part no. UBJ27** insulated bulkhead jack features heat-treated beryllium-copper contact with 50μ" gold plating. Simple construction designed for fast and easy assembly. Close tolerances. **Mfg. part no. UCBJ20F** has a straight flange mount with 4 solder legs for torque support. **Mfg. part no. UCBJFF20CP** has a 45° flange mount with compliant pins for solderless installation and screw holes for mounting. **Mfg. part no. UCBBJR229** has right-angle bulkhead mount with four legs and a "D" hole for torque and axial force. **Mfg. part no. UCBJE20-1** has a side-launch card edge mount. Solders to the card edge traces. Reduces space requirements between daughterboards. Designed with solder slots to reduce insertion and return loss compared to solder legs.

Amphenol® RF

Fig. 1

Fig. 2

Nonconstant impedance connectors for 78- and 95-ohm twin conductor cable. Improved shielding for use in balanced low level and high sensitivity circuits. 2 non-intermateable constructions available: BNC units (type numbers with **prefix 31**) are polarized contact design (1 male,1 female), 2 stud bayonet coupling, captivated contacts, 0-100Mhz, 100V peak voltage. Others polarized key/keyway construction, threaded coupling, 0-200MHz, 500V peak voltage.

50-OHM MINIATURE THREADED WEATHERPROOF TNC COAXIAL CONNECTORS

RoHS Compliant Available

Amphenol® RF

Fig. 1 Fig. 2 Fig. 3

Fig. 4 Fig. 5 Fig. 6

- Impedance: 50Ω
- Frequency range: 0-11GHz

TNC are miniature, threaded weatherproof units with a constant 50 Ω impedance and they operate from 0 - 11 GHz. Ideal for use in cellular and mobile communications, and test and measurement equipment. Also used in airframe, aerospace and radar applications where extreme vibration is a factor. Reverse polarity is a keying system accomplished with a reversed interface which ensures that a reverse polarity TNC does not mate with a standard TNC connector. May

➤CONTINUED➤

50-OHM MINIATURE THREADED WEATHERPROOF TNC COAXIAL CONNECTORS (CONT.)

be used in applications where keying is necessary to eliminate mis-matching from mating with a standard connector. MIL-STD-348 interface ensures high quality and premium performance. Crimp-crimp termination allows easy and quick assembly. *Order tools and die sets separately*, go online or call.

HD-BNC HIGH-DENSITY BNC CONNECTORS AND ADAPTERS

RoHS Compliant Available

Amphenol® RF

HD-BNC Straight Cable Plug

034-1024

034-1018

Smallest BNC in the Industry

- 51% smaller footprint than standard BNC, 39% smaller than Mini-BNC
- Allows four times the density as the standard BNC
- Bayonet positive locking coupling allows for quick and easy connect/disconnect
- True 75Ω impedance for higher performance and reliability
- Fits traditional broadcast cable
- SMPTE compliant — Meets 292M and 424M standards

HD-BNC high-density BNC connectors and adapters are engineered to enhance electrical and mechanical performance. Features the trusted, push-and-turn interface of a standard BNC, providing tactile feedback and a positive lock for quick and guaranteed mating. Uses the same cable prep and termination specifications of standard BNC connectors making their changeover seamless. Brass male contacts and beryllium copper female contacts, both plated with AmorPHous (gold). Nickel-plated beryllium copper outer contacts. Nickel-plated brass bodies and hardware except PCB connectors which are gold plated. Applications include broadcast, digital video (HDTV), telco central office, instrumentation, DS3/DS4, custom cable assemblies, networking routing and switching, military/aerospace, medical equipment, and satellite headends. Voltage rating: 170Vrms. Frequency range: 0 to 6GHz. Dielectric withstanding voltage: 500V. *Order assembly tooling separately below.*

RF COAX – SUBMINIATURE

HD-BNC HIGH-DENSITY BNC CONNECTORS AND ADAPTERS (CONT.)

ASSEMBLY TOOLING

Mfg. Part No.	Description	Stock No.	Price Each 1-9
● 227-1490	Spanner Nut Tool	25T1454	48.28
● 227-T2000	Mating Tool #1 for High-Density Cable	25T1453	91.63

(192438)

901 SERIES 50-OHM SMA COAXIAL JACKS

RoHS Compliant Available

Amphenol® RF

Fig. 1

Fig. 2

Fig. 3

50-ohm SMA connectors are semi-precision connectors with electrical performance from 0 to 18GHz. Built in accordance with MIL-C-39012. Applications include base stations, instrumentation, process control, Mil/Aero, telecom and PC/LAN. *Order* **mfg. part no. 227-944** crimp tool separately *on page 1062*. Die sets for crimp tool available *on page 1062*.

RF COAX – SUBMINIATURE

903 SERIES 75-OHM HIGH-DENSITY, SMB COAXIAL PC BOARD JACK RECEPTACLES

RoHS Compliant Available

Amphenol® RF

Fig. 1 Fig. 2

PC board jack receptacles feature 4 leg/blunt post terminals. Gold-plated body and contact. TFE fluorocarbon, red insulator. SMB 75-ohm high-intensity subminiature coaxial connectors conform to the requirements of MIL-C-39012. Feature quick connect/disconnect snap-on mating. Operate to 4GHz with low reflection and are usable to 10GHz. Voltage rating for RG-188U cable: 335V. Dielectric withstanding voltage: 1000Vrms. Temperature range: –65°C to +165°C.

SSMT surface mount interconnect system is designed to provide superior electrical and mechanical performance for wireless communication applications. The mated SSMT interface allows 360 degrees of rotation providing maximum PCB design flexibility. It has been designed to provide optimal retention for applications where shock, vibration or cable flexure may be encountered. Force to disengage by cable load (cam-out) exceeds 300 grams.

50- AND 75-OHM MCX MICROMINIATURE SNAP-ON CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Frequency range: DC to 6GHz
- Voltage: 335V (VRMS max.)
- Contact current max: 1.5A DC max.
- Mating cycles: 500 min.
- Temp. rating: -65°C to +165°C

MCX microminiature snap-on connectors offer an excellent blend of size, durability and performance for applications in GPS, automotive and wireless communications. 30% smaller than traditional snap-on SMB connectors, these MCX connectors offer greater packaging density and weight reduction. The snap-on interface facilitates assembly, eliminating the need for a threaded connection, and providing full engagement. These MCX connectors are fully mateable with standard MCX connectors and conform to the CECC interface specifications. Available in a broad range of standard configurations for commercial applications.

RoHS Compliant Available

Amphenol® RF

908-43200

908-22101

908-41400

Microminiature connectors are designed for high-density, lightweight coaxial applications, such as wireless data, communication, and instrumentation. Feature a low-mated profile to help meet critical height requirements. Positive snap-on mating provides retention through 500 mating cycles. Connectors are compatible with all MMCX designs and accommodate industry-standard coaxial cable. Impedance: 50 ohms. Frequency range: DC-6GHz. Voltage rating: 170Vrms. Dielectric withstanding voltage: 500Vrms.

Straight and right-angle 50-ohm plugs and straight jacks accept a wide assortment of cable. Surface mount connector is also offered. Brass body plated in nickel or gold. Features a PTFE insulator, silicone rubber gasket, seamless copper tubing alloy crimp ferrules, and solder inner terminal. Low-insertion force brass male and beryllium copper female contacts, both plated with 30μ″ gold. Solder-to-body termination. Low-profile design saves valuable PC board space. Quick-connect/disconnect with snap-on mating. Broadband performance with low reflection. Frequency range: 0-6GHz. Voltage rating: 335Vrms. Dielectric withstanding voltage: 1000V. Operating temp. range: -65°C to +165°C.

Amphenol® RF

Straight Crimp Plug

Right Angle Crimp Plug

- Broadband Performance with Low Reflection DC to 6 GHz
- Quick Connect/Disconnect Snap-On Mating Reduces Installation Time
- Surface Mount PC Board Allows User to Automatically Place Connectors on Board
- 30% Reduction in Size Over SMB Series Connectors

Surface Mount Jack

Offer reduced size, weight, durability in the telecommunications and networking marketplace, and a performance of up to 6GHz with low reflection. Require less space than the SMB series. By reducing outer diameter by 30% the 75Ω **MCX series** achieves a lower profile and saves valuable board space.

BNC HIGH DEFINITION BROADCAST CONNECTORS

RoHS Compliant Available

BELDEN SENDING ALL THE RIGHT SIGNALS

Features
- True 75 Ω performance
- Superior return loss through 4.5 GHz
- Extended BNC head knurl nut design to ease identification and installation
- Excellent holding force exceeding 100 lbs, depending on cable type
- Fast installation compression connectors with 1-piece design
- Polished Nickel Finish

Belden Brilliance® Broadcast High-Definition BNC Connectors designed specifically for Belden Brilliance® Broadcast and Professional A/V coaxial cable; *ordered separately on page 1192.* HD Brilliance Connectors maximize broadcast signal integrity, quality, performance and durability. All Belden HD Brilliance connectors exceed SMPTE return loss standards, providing excellent headroom and true 75 ohm performance.

DB™ DOUBLE BUBBLE COMPRESSION CONNECTORS

BELDEN SENDING ALL THE RIGHT SIGNALS

Features
- BNC, RCA, and F compression connectors
- RG-59, RG-6, plenum, and security (CCTV) sizes
- Patented "double bubble" connection
- True 360° compression technology
- Patented non-blind entry design

DB BNC

DB RCA

➤ CONTINUED ➤

DB™ DOUBLE BUBBLE COMPRESSION CONNECTORS (CONT.)

DB 360 Compression Connection System creates two 360° compression connections (one interior and one exterior) providing a permanent, "double bubble" connection. The Radial Bubble Compression Tool and DB 360 compression connectors work as a complete system to provide a secure, reliable solution to all your custom security installations. Ideal for security cameras and other exposed wiring installations. The unique double bubble connection provides superior protection against moisture migration limiting poor signal quality due to the elements. *Order Belden Brilliance® broadcast coaxial cable on pages 1192-1194.*

1.0/2.3 SERIES CONNECTORS

RoHS Compliant Available

Amphenol® RF

Fig. 1

Fig. 2

Features:
- Push-Pull Coupling with Patented Locking Mechanism Allows Quick Installation
- Push-Pull Offers Safe Coupling
- Eliminates Cross-Threading Problems and Field Problems
- Connectors Can Be More Densely Packed, Saving Panel Space

Applications:
- Base Stations, Cable Assemblies, Components (Filters), Datacom, Routers, Switching Equipment, Telecom

The compact design of **1.0/2.3 series** connectors permit dense packing. Ideally suited to applications where space is limited. Threaded coupling provides positive mating and locking. Connectors are 50-ohm units operating from 0-10GHz. *Adapters ordered seperately; go online or call.*

F-TO-BNC BETWEEN-SERIES ADAPTER

- 100% Reliability and Performance
- True 75Ω Design
- Return Loss Attributes
- Industry-Standard Strip Dimensions

EMERSON. Network Power

Trompeter Connectivity Solutions

Mfg. part no. AD1300 F-to-BNC adapter for upgrading a low-performance F connection to a high-frequency BNC connection. Delivers carrier class performance from cable appliances. Ideal for HDTV set-top boxes, cable modems, direct-to-home satellite receivers, DVD players, VoIP telephone and other consumer appliances where signal degradation can affect performance.

RF TWINAX/TRIAX ADAPTERS

EMERSON. Network Power

Trompeter Connectivity Solutions

70 series twinaxial/triaxial connectors are concentrically designed with 2 concentric contacts isolated from each other, the center contact, and the shielding connection. They are used in digital data bus, MIL-STD-1553B (airborne/ground, primary/redundant) base-band circuits, and video pair applications (FLIR). Connectors do not require mechanical alignment for mating. Nominal impedance non-constant. Frequency range: 0-500MHz. Voltage rating: 400V (100V @ 70,000). Insulation resistance: 5000MΩ. Temperature range: -65° to +165°C.

COAX CRIMP TOOL KIT

DURATOOL

Kit includes 1 rugged interchangeable die tool frame with 2 mounting screws for easy die set change over and the following 4 interlocking die sets: **CTD-8565-02** which crimps the center pin to 0.042″ square or 0.068″ hex and ferrule on small cable to 0.128″, 0.151″, or 0.178″ hex; **CTD-8566-02** die which crimps the center pin to 0.042″ square or 0.068″ hex, RG-58 ferrule to 0.213″ hex and RG-59 ferrule to 0.255″ hex; **CTD-8567-02** die which crimps the center pin to 0.042″ square or 0.068″ hex, RG-59 ferrule to 0.255″ hex and 8281 ferrule to 0.324″ hex; and **CTD-8569-02** die which crimps the center pin to 0.068″, 0.080″, or 0.100″ hex and RG-8 ferrule to 0.429″ hex. Plus a cable stripper to provide 2- and 3-level stripping on RG-58, -59, and -62 coaxial cable and a sturdy storage case. Ideal for R&D facilities.

COAX CRIMP TOOL KIT

DURATOOL

8455-0663 coax kit features full-cycle mechanism which allows terminations to conform to industry standards. Die sets interlock to align crimp cavities and are easily interchanged with 2 mounting screws. Kit includes crimp tool frame, RG-58 and RG-59 die set, RG-58 and RG-59 die set with mini-center contact crimp, 3-level stripping tool, 10 RG-58 BNC connectors, 100 RG-59 BNC connectors, and a foam insert in a durable plastic case.

LC2+ METAL FIBER OPTIC CONNECTORS

RoHS Compliant Available

molex

- Housing: Metal
- Latch: Metal
- Ferrule: Zirconia Ceramic
- Durability: Minimum 200 mate/demate cycles
- Operating Temperature: -50°C to +150°C

Molex offers the industry's only metal-housing LC2+ connectors, the ideal high-performance, discrete-fiber solution for use in severe operating environments in industrial, telecom, military and medical applications. LC2+ connectors are the next-generation solution to the highly popular LC connector interface and meet all FOCIS 10 specifications.

Fig. 3

- Saves 30% Installation Time
- Saves 50% Wiring Time

SNAPTRACK® is a nonconductive, rigid extruded PVC chassis for mounting socket assemblies and custom circuit boards. Mounts panels with rivets, screws or double-faced tape. PC boards snap-in from front and are held securely by integral ribs that absorb shock when PC board is flexed. SNAPTRACK® allows convenient PC board removal for field servicing. Slots on 2" (50.8) centers for fast, easy installation.

OTB-351 SERIES THRU-PANEL TERMINAL BLOCKS

RoHS Compliant Available

BLOCK MASTER BLOCKS™
World Class Terminal Blocks

Features:
- SEMS screws
- Plastic finger-safe cover included
- Suitable for power supplies, industrial controls, motor drives, variable-speed controls

Specifications:
- Spacing: 8.5 mm
- Housing Material: Polycarbonate
- Terminals: Brass w/ Nickel plating
- Operating Temperature: -30 °C to +80 °C
- Wire Size: 12 - 22 AWG
- Rated Voltage: 300 V
- Rated Current: 20 A

Fig. 4

Barrier strips are UL94V-0 glass-filled flexible thermoplastic. Choose from 4 terminal styles: printed circuit bottom-side, insulated solder turret bottom-side, no printed circuit terminals, and insulated quick-connect. Terminals are welded, resulting in no solder joint fatigue caused by twisting the tails. Terminals are tin-lead plated brass with 6-32 x ¼ phillips/slotted screws. 0.66″(16.8)H x 0.63″(16.0)W. UL recognized, CSA certified.

XB SERIES IEC TERMINAL BLOCKS — DIN RAIL MOUNT

RoHS Compliant Available

Terminal Blocks

Ground Blocks (Green/Yellow)

Fuse Terminal Block (Black)

Features

- Screw-locking maintenance-free design prevents screws from backing out
- Metal surfaces protected with lead-free, galvanic nickel or tin plating
- Multiple conductors can be connected in same clamping mechanism, saving space
- Front connection design allows easy wiring in tight spaces
- Flexible plug-in bridge system
- cULus recognized, CE compliant

Terminal Block Colors
Black, White, Red, Orange, Blue, Grey
Yellow and Green (not shown)

XB series IEC DIN rail terminal blocks are constructed for long use under demanding conditions. These modular terminal blocks are designed to conserve space, while allowing maximum flexibility and simple installaltion. Select from a full line of **XB series** terminal blocks complete with universal accessories; *all ordered separately below.*

SCREW CONNECTION, SINGLE LEVEL THROUGH-FEED TERMINAL BLOCKS

Mfg. Part No.	Terminal Width (mm)	Color	Wire Size	Stock No.	Price 1-9

C383 SERIES DISCONNECT FUSE HOLDERS

RoHS Compliant Available

- Finger-safe design per IEC standards
- Easy to adjust position on rail
- Quick change of fuse -- no tools required
- Vented design runs cool
- Lockout/tagout compliance
- Mounts directly on standard TS35 DIN rails
- UL listed, CSA certified, CE compliant

C383 series disconnect fuse holders offer 600V fused circuit protection and subsequently "no load" switching. Compact design is perfect for where positive, safe circuit protection is required and space is at a premium, such as switchboards, panels and control consoles. White molded phenolic housing with silver-plated contacts. **Mfg. part no.**

LINERGY TR SERIES SCREW TERMINAL BLOCKS

NEW

RoHS Compliant Available

Schneider Electric

Passthrough | Grounding Type | Double Deck | Disconnect (Fused)

- Fast and easy installation
- Multiple connection options
- International standards and RoHS compliance
- Extensive connection and test accessories

Screw technology terminal blocks are components that are well established throughout the world and are suitable for the majority of connection applications, due to their wide range of functions and connection possibilities. **NSYTRV** terminal blocks help ensure quality and operational availability of equipment. In addition to these advantages, they optimize the setup and operation of installations, due to their simplicity and integrated functions. **NOTE:** Disconnect (fused) terminal blocks carry a 6.3x32mm G-fuse cartridge.

G SERIES NEMA TYPE TERMINAL BLOCKS AND END BARRIERS

RoHS Compliant Available

Schneider Electric

Each section of **G series** terminal blocks requires one end barrier, *ordered separately below*. Terminals and end barriers have molded nylon construction with 125°C maximum service temperature. All blocks mount on **mfg. part no. 9080GH** and 35mm DIN 3 channel except **mfg. part no. 9080GK6** which mounts on **mfg. part no. 9080GH** channel or mounts directly. Maximum voltage: 600V. **Mfg. part no. 9080GF6** features fuse block with beryllium-copper clips and wrap-around fuse puller.**GR, GK** and **GM** available in assorted colors. UL recognized, CSA certified. *Order mounting channel, jumpers and marking accessories; go online or call.*

TOPJOB®S SERIES DIN RAIL MOUNT FUSE, DISCONNECT, & TEST TERMINAL BLOCKS

RoHS Compliant Available

WAGO

Pivot Fuse Terminal Block | Carrier Terminal Block | Fuse Plug

- Terminal block width: 5.2 mm
- 6.2 mm includes end plate for fuse disconnect (pivot style)
- AWG: 22-12 (14 AWG max with ferrule)
- Rated Voltage/Current: Dependent upon fuse or indicator

TOPJOB Series Fuse, Disconnect & Test pluggable rail mounted terminal blocks feature 100 % spring clamp technology and offers many advantages to the user since the function and the wiring are accomplished by two separate parts. This includes no additional cost for assembly and wiring and no risk of accidental contact with live parts during disconnection of fuse plug as it is completely separated from the carrier terminal block. This allows for quick and safe exchange of the fuse away from current carrying parts and allows the fuse plug to be taken away during service and avoids unintentional reclosing of the circuit by another person. Additional features include two touchproof test slots, an optional LED blown fuse indicator, and an option to use shorting link rather than a fuse as a disconnect plug.

TOPJOB® S 2006 SERIES RAIL MOUNTED TERMINAL BLOCKS

RoHS Compliant Available

- 600 V, 30 A
- For conductors rated AWG 20 to AWG 8
- Terminal block width 7.5 mm

TOPJOB®S DIN 35 rail-mounted terminal blocks with CAGE CLAMP®S technology are the smallest on the market resulting in a space saving of up to 30%. Stripped solid conductors, stranded conductors with ferrules, or ultrasonically "bonded" conductors are easily connected by simply pushing the wire into the wire entry - no tools. Connecting stranded conductors without ferrules or small cross-sectional conductors that cannot be pushed in, is done similar to the original CAGE CLAMP®, using a screwdriver. In all cases, the conductor is removed using a screwdriver, like the original CAGE CLAMP®.

280 SERIES DIN RAIL TERMINAL BLOCKS

RoHS Compliant Available

DIN-rail mount terminal blocks feature CAGE CLAMP® spring pressure wiring technology that operates by inserting a screwdriver, inserting a stripped conductor (solid or stranded) and removing the screwdriver. Insulation housing: polyamide 6.6 to UL94V-0 (rated 105° C). Current bar is lead-free tin-plated copper alloy. Clamp is stainless steel.

811 SERIES CLASS CC AND 10X38MM FUSE HOLDERS

RoHS Compliant Available

- Class CC and 10x38mm photovoltaic or midget styles
- Available as 1-, 2-, or 3-pole configurations
- With or without LED indication
- Maintenance-free Cage Clamp® connection technology
- IP-20 finger safe / touch safe
- Easy DIN-rail mounting
- Quick and easy fuse replacement
- Wire size: 14-6 AWG solid/stranded
- UL listed, CSA certified

811 series fuse holders feature an intuitive lever actuation of the Cage Clamp® maintenance-free, vibration-proof and corrosion-resistant connection technology to accommodate Class CC, photovoltaic 10x38mm and midget style 10x38mm fuses.

Weidmüller

Expanded marking options; ideal for use with PLC circuitry. Vibrationproof clamping system made from corrosion-resistant, zinc-plated steel. Polyamide thermoplastic molding combines UL94V-2 rating with an operating temperature range to 232°F. UL recognized, CSA certified, VDE approved. *Order terminal block accessories separately on page 1078.*

THERMOCOUPLE FEED-THRU TERMINAL BLOCK AND END PLATE

RoHS Compliant Available

Weidmüller

For TS 35 DIN rail mounting. Thermocouple (TC) terminal blocks are designed for use in temperature measurement circuits. To provide TC wiring continuity, current bars of terminal are made of same dissimilar metal of TC wire, which increases accuracy of signal. UL listed, CSA certified, VDE approved.

TERMINAL BLOCKS – DIN RAIL

DEKAFIX MARKING TAGS

RoHS Compliant Available

Weidmüller

Use to mark terminal blocks and assemblies. White Dekafix tags are printed with large, black numbers, symbols, or characters. Tension clamp feed-through terminal blocks can hold 1 Dekafix tag on each side of the block, in addition to a center marking area. **W series** terminal blocks can hold 2 Dekafix tags on each side. To select the proper tag, make sure the width of the tag is no greater than the width of the terminal block. Both horizontal and vertical printing are available. Print on all tags is rubproof and oilproof. Other styles and custom printing available; *go online or call.*

Feed Thru Terminal Block

Disconnect Terminal Block

Fused Terminal Block

With its fasis WKFN series Wieland Electric offers you a complete range of DIN rail terminal blocks with spring clamp wire termination. The portfolio comprises feed-through and ground blocks with 2, 3 or 4 termination points, two-tier and three-tier blocks, single-tier and two-tier knife-edge disconnect blocks as well as fuse blocks. There are also function blocks with application-specific diode circuits available. fasis WKFN has been designed for use in machine and system engineering as well as for hazardous areas. UL recognized, CSA certified, CE compliant, VDE approved.

wieland

NEW

Feed-Thru Terminal Block

Fuse Terminal Block

Heavy Duty Jumper

Wieland's new WT series features the most advanced push-in jumpering system in the industry. WT/WKN terminals are available for designs requiring up to 335A and 22 AWG to 350 MCM conductors. UL recognized, CSA certified, CE compliant, VDE approved. *Order accessories separately online or call.*

FEED-THRU TERMINAL BLOCKS
Available in colors for circuit identification; go online or call.

2SV SERIES SUBMINIATURE SCREWLESS TERMINAL BLOCKS

RoHS Compliant Available

TE connectivity

Authorized Distributor

2SV series screwless vertical mount terminal blocks are 0.45″H x 0.2″D (11.43 x 13.21). Wire range: 18-24 AWG. 20A, 300V UL recognized; 20A, 150V CSA certified (except 24AWG). Solder terminal connections on 0.2″ (5.08) centers. Handle multiple wires per terminal. Thermoplastic polyester body, flammability classification UL94V-0. Acid-tin plated copper alloy terminals. Standoffs for flux removal.

6G38 SERIES ⅜″ SECTIONAL TERMINAL BLOCKS

RoHS Compliant Available

MARATHON SPECIAL PRODUCTS

- 600V AC/DC, 40A
- 32 Circuits per foot
- ⅜″ centers
- Wire range: 10-22 AWG stranded; 10-14 AWG solid
- Flat panel mount or 35mm DIN rail mail versions
- Meets IP-20 (IEC 60529) touch protection requirement
- UL recognized file no. XCFR2.E62806
- CSA certified file no. LR19766
- CE compliant

6G38TSKKF

6G38TSKKDIN

6G38 TSSK series sectional terminal blocks are made up of individually molded units with electrically conductive members which, when assembled together, make up the block producing the required number of circuits. Each unit features a Kant Kut tinned-plated copper tubular screw connector and #10-32 nickel-plated steel screw with stainless steel wire protector. Gray thermoplastic insulator base is flammability rated UL 94V-0. Accepts single and multiple wire combinations. Wire termination torque: 16 in.-lbs. Choice of flat mount base for direct mounting to the panel or DIN rail mount that will fit on a standard 35mm DIN rail. *Order accessories separately below.*

3.50mm MA SERIES EURO STYLE TERMINAL BLOCKS

RoHS Compliant Available

multicomp

MA series wire-protection clamps provide precise, cost-effective, and compact wiring solutions. The simple clamping mechanism reduces the product cost. The 2 & 3 pole modular designed terminal blocks can be quickly and easily joined together to produce higher pole number assemblies. MA series allow screw connections for conductors up to 12 AWG without soldering. MA series utilize brass contacts for wire connection which allows the product be maintenance free, vibration resistant, and offers outstanding corrosion resistance, and high reliability. When the clamping screw is tightened, it pushes the leaf spring onto the conductor until a secure connection is achieved. The leaf spring prevents the screw from the digging into the conductor and damaging individual conductor stands. MA series terminal blocks meet the approvals of UL, CE and VDE.

3.50mm MB SERIES EURO STYLE CAGE CLAMP TERMINAL BLOCKS

RoHS Compliant Available

multicomp

MB Series printed circuit terminal blocks provide highly reliable screw connections on industrial printed circuit boards. MB series variants share a robust moving cage principle with a generously dimensioned insertion space for conductors up to 12 AWG. The flat base of the clamping unit ensures that even the thinnest connection leads can be clamped properly. When the clamping screw is turned, a clamping yoke rises in the component housing until the thread is firmly held between the current bar and clamping yoke. The stable design of the clamping parts allows the creation of gas-tight connections. This mean that the contact conditions can be kept stable over a long time even in aggressive atmospheres. MB series allows the terminal screw to be reliably held in place even in the case of vibrations. At the point of maximum permitted torque, the upper thread-overlap of the yoke opens causing a locking action to be exerted on the screw. MB series terminal blocks meet the approvals of UL, CE and VDE.

MA SERIES EURO STYLE TERMINAL BLOCKS

RoHS Compliant Available

multicomp

MA331 | MC24356, MC24360, MA412 | MA522 | MA524

MA series wire-protection clamps provide precise, cost-effective, and compact wiring solutions. The simple clamping mechanism reduces the product cost. The 2 & 3 pole modular designed terminal blocks can be quickly and easily joined together to produce higher pole number assemblies. MA series allow screw connections for conductors up to 12 AWG without soldering. MA series utilize brass contacts for wire connection which allows the product be maintenance free, vibration resistant, and offers outstanding corrosion resistance, and high reliability. When the clamping screw is tightened, it pushes the leaf spring onto the conductor until a secure connection is achieved. The leaf spring prevents the screw from the digging into the conductor and damaging individual conductor stands.

MB SERIES EURO STYLE TERMINAL BLOCKS (CONT.)

MB532 | MB612

MB Series printed circuit terminal blocks provide highly reliable screw connections on industrial printed circuit boards. MB series variants share a robust moving cage principle with a generously dimensioned insertion space for conductors up to 12 AWG. The flat base of the clamping unit ensures that even the thinnest connection leads can be clamped properly. When the clamping screw is turned, a clamping yoke rises in the component housing until the thread is firmly held between the current bar and clamping yoke. The stable design of the clamping parts allows the creation of gas-tight connections. This mean that the contact conditions can be kept stable over a long time even in aggressive atmospheres. MB series allows the terminal screw to be reliably held in place even in the case of vibrations. At the point of maximum permitted torque, the upper thread-overlap of the yoke opens causing a locking action to be exerted on the screw.

804 AND 805 SERIES PCB TERMINAL BLOCKS WITH INTEGRATED PUSHBUTTON

RoHS Compliant Available

WAGO

805 series

804 and **805 series** PCB terminal blocks feature low profile side entry with an integrated pushbutton operator. Solid, ferruled, or prepared conductors can be simply pushed in to terminate. For stranded conductors, first depress the pushbutton to open the spring. For release of any conductor, depress pushbutton. Cage Clamp® 'S' termination technology provides fast, vibration-proof, and reliable connections that are maintenance-free. Staggered pin alignment increases stability on PCB and maximizes creepage/clearance distances for increased voltage ratings. Additional pole configurations available; *go online or call.*

2716 AND 2706 SERIES LEVER-OPERATED PCB TERMINAL BLOCKS

RoHS Compliant Available

WAGO

2716-10x 2716-20x 2706-10x 2706-30x

2716 and **2706 series** PCB-mount terminal blocks feature the industry's only lever-operated Cage Clamp® termination design for tool-free, maintenance-free termination of conductors 20-6AWG. Simple and efficient, the integrated lever minimizes operator strain and wiring times while reducing torque exerted on PCB's. **2716 series** configurations include 10mm and 15mm pitches in 2-5 poles without jumper slots. **2706 series** configurations include 7.5mm and 12.5mm pitches in 2-5 poles without jumper slots. Both series contain an integrated test port for easy probe access with direct contact to the current bar for accurate, hands-free troubleshooting. Other pole configurations either with or without jumper slots for commoning are available; *go online or call.*

862 SERIES CHASSIS MOUNT TERMINAL BLOCKS

RoHS Compliant Available

WAGO

Chassis-mount terminal strips feature convenient pushbutton-operated CAGE CLAMP® spring pressure wiring technology. Rated 600V/5A, 300V/20A. Accept 20-12 AWG wire. Insulation housing: polyamide 6.6 to UL94V-0 (rated 105° C). 2 conductors per pole. Current bar is lead-free tin-plated copper alloy. Clamp is stainless steel.

LM SERIES 3.5mm SCREW CLAMP SINGLE-LEVEL AND DOUBLE-LEVEL TERMINAL BLOCKS

RoHS Compliant Available

Weidmüller

- Low Profile Design
- Small 3.5mm Pitch
- Can Be Dovetailed Together

90° Single 90° Single 135° Single

Features a gastight, vibration-resistant clamping yoke wire termination. Small 3.5mm pitch and low profile make these terminal blocks ideal for high-density applications where space saving is critical. 2- and 3-pole blocks can be dovetailed together to maker higher pole versions. Accepts wire size: 22-14 AWG. UL rated at 300V, 10A. Color: black. Also available in orange; *go online or call.*

8142 SERIES 2-PC. PC BOARD DISCONNECT TERMINAL BLOCKS

RoHS Compliant Available — wieland

Terminal Block

Solderable connector strip for 0.197″ (5.00) spacing allows connection and disconnection of up to 24 poles to and from printed circuit boards in one simple plugging operation; *go online or call for pole sizes not listed.* Wires connected to flush-mounted strip by screws having wire protection spring. Two connector pins available: 1.3mm diameter above board and 1.0mm diameter below board or 1.3mm diameter above board and 1.3mm diameter below board. 1.0mm pin strips are compatible with either through-hole or reflow solder processes. Tin-plated socket contacts. Pin strips can be field cut to desired length.THR versions are also available: please call for details. 15A, 300V, 12-22 AWG. UL recognized, CSA certified, VDE approved. **NOTE:** Parts listed are unmarked. Marked parts also available; *go online or call.*

5MM AND 5.08MM MODULAR PC BOARD TERMINAL BLOCKS

RoHS Compliant Available

wieland

- 300V, 30A, 12AWG
- 2-24 pole configurations
- Marked or unmarked

All can be interlocked to form different configurations. Fully enclosed parts, nickel-plated brass cage clamps, test point provisions. Field rated a 300V, 20A. Made of polyamide 6.6 UL94V-0 rated material. Available with or without insulating plate, with or without fixing bolt. For versions not listed below; *go online or call*.

COMPACT TERMINAL STRIPS

RoHS Compliant Available

wieland

Extremely compact terminal strips for panel and surface mounting. Polyamide 6 insulating body with nickel-plated connectors, supplied with self-locking screws to prevent loosening of contacts. Phosphor bronze wire guards. Zinc-plated steel clamping screws. Metal parts enclosed or recessed for safety. Rated: 250V, 20A, 22-12 AWG maximum. UL recognized, CSA certified, VDE approved 0110 Gr. C.

DIVISIBLE EUROPA STRIPS

RoHS Compliant Available

wieland

- Phosphor bronze wire guard
- Polyamide 6 insulation
- Nickel-plated connectors
- Zinc-plated clamping screws
- Captive screws

Strips feature phosphor bronze wire guard between screw and conductor for protection against damage. Polyamide 6 insulation body is easily cut with a knife or saw. To double voltage performance to 600V from 300V *order spacers separately below*. The **4E/4EDS series** features a flammability protection rating according to standard EN 60335-1, and UL 746 C, 6th edition, section 73 and able to withstand the required 750°C glow wire tests. **6EHDS series** offers a 600V rating without requiring a spacer. Other sizes available; *go online or call*.

TERMINAL BLOCKS – PLUG & SOCKET

FRONT STYLE PLUGGABLE TERMINAL BLOCKS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Voltage Rating: 300 Volts
- Current Rating: 16 A
- Wire range: 24-14 AWG
- Screw torque: 4.5 in-lbs
- Operating temp: -40° to +105° C
- UL 94V-0
- Zinc plated steel screws

The key feature of the front style terminal block plug is that the wire entry cavity and the activating screw head are on the same plane which is parallel to the plug in direction. These plugs in particular are being released with 5.0mm and 5.08mm centerline spacing and will mate to industry standard vertical and right angle headers.

CRIMP STYLE TERMINAL BLOCKS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- 5.08mm pin spacing
- Mates with industry standard open and closed ended headers
- End to end stackable
- UL 15 Amps, 300 Volts

Terminal Block plug that utilizes an insertable crimp snap style contact for wire termination. This 5.08mm plug will mate to standard terminal block PCB headers. Applications include higher volume wire termination requirements are combined with the desire to use a two piece pluggable Eurostyle terminal block. Typically wiring will be done in factory rather than in the field.

Authorized Distributor

Pluggable Terminal Blocks

Standard 7mm Post Header

10.6mm Post Mating Header

Benefits

- Screwless design allows for improved performance with superior wire retention in high vibration applications
- Sustainable advantage by quick service or change over
- Flexibility with two headers styles available for various types of system designs
- Automated process capable due to reflow compatible materials
- Customizable material allows for alternative colors upon request
- Quality assured due to 100% visual inspection

Target Markets

- Automation and drives technology
- Control boxes for HVAC and thermostats
- Controls for TV or radio production
- Signal Controls

RoHS Compliant Available

20020000

20020008

20020011

20020013

20020327

- 3.81mm Pitch
- Choice of five orientations with or without flange
- Green, thermalplastic resin housing, rated UL94V-0
- Zinc-plated steel screw
- Nickel-plated brass clamp
- Tin-plated phosphor bronze pluggable plug terminals
- Tin-plated brass fixed terminal block terminals
- Operating voltage rating: 300VAC
- Current rating: 10A
- Operating temperature range: -40°C to 115°C
- UR recognized

5.08MM PITCH PLUGGABLE TERMINAL BLOCK HEADERS (CONT.)

20020109

20020131

- 5.08mm Pitch
- Choice of three orientations with or without flange or open end
- Green, thermalplastic resin housing, rated UL94V-0
- Zinc-plated steel screw
- Nickel-plated brass clamp
- Tin-plated copper terminals
- Operating voltage rating: 300VAC
- Current rating: 12A
- Operating temperature range: -40°C to 115°C
- UL recognized

Order coding keys separately on page 1096.

7.62MM PITCH PLUGGABLE TERMINAL BLOCK PLUGS

RoHS Compliant Available

20020516 20020517 20020705

- 7.62mm Pitch
- Choice of two orientations with or without flange
- Green, thermalplastic resin housing, rated UL94V-0
- Zinc-plated steel screw
- Nickel-plated brass clamp
- Tin-plated copper pluggable plug terminals
- Operating voltage rating: 300VAC
- Current rating: 32A
- Operating temperature range: -40°C to 115°C
- UR recognized

97 SERIES HIGH-POWER TERMINAL BLOCKS

RoHS Compliant Available

molex

- High Temperature
- Thermoplastic Housing, Rated UL94V-0
- Wire Range: 6-18 AWG
- Current: 60A

Rising clamp termination system produces a secure and reliable gastight interface. Designed for 600V applications. The deep wire funnel shrouds the wire and the insulator jacket preventing arcing between adjacent wires.

98 SERIES PLUGGABLE TERMINAL BLOCK SYSTEM (CONT.)

Feature 5.08mm pitch terminal block plugs and headers with patent-pending positive latching mechanism. Secures the mating plug to resist vibration and the molded integral construction of the latch offers substantial cost savings over screw lock designs. Polarized to enable proper blind mating. Space-saving, compact design is 69% shorter and 45% more narrow than standard pluggable terminal blocks. Header is high-temperature design and rated for reflow solder ovens. UL recognized.

multicomp

MC310

EBK

MC520

MC560, MCTC-56

The MC series is the plug side of pluggable type terminal blocks. MC series is available in horizontal wire entry to meet multiple design requirements. This series creates applications requiring high reliable interconnection with the flexibility of simplified modifications and installation. MC series allow screw connections for conductors up to 12 AWG without soldering. MC series terminal blocks meet the approvals of UL, CE and VDE.

The ME series is the header side of pluggable type terminal blocks. ME series headers with vertical and horizontal plug-in direction are available with 2 to 12 positions. ME headers are avaialble with a threaded flange for vibration-resistant connection when mated to plugs with screw flanges. Using a combination of special high temperature resistant plastic and innovative component design, ME series pin-headers and PCB terminal blocks can be incorporated into the automatic printed circuit boards assembly process. ME series also aid the reduction of overall production costs thus improving manufacturing efficiency.

2091 AND 2092 SERIES picoMAX® PLUGGABLE CONNECTION SYSTEM

RoHS Compliant Available

WAGO

picoMax® Female Connectors
- Universal connection for all conductor types
- Simple, push-in termination of solid and ferruled conductors
- Ability to wire mated or unmated
- Testing port parallel to conductor entry — tip contact
- Integrated locking tabs prevent accidental disconnection

picoMax® Male Headers
- Horizontal or vertical plug direction via straight or right-angle solder pins
- Integrated locking latch prevents accidental disconnection
- Group female connectors without loss of poles, allowing different functions to be divided within one male header
- Coding pins inserted into header interface prevent mismatting, allowing subsequent coding in panel feed-through applications
- Female connector is almost fully shrouded by male header, providing vibration-resistance up to 20g

picoMAX® Mated

Radically simplified **2091** and **2092 series** picoMax® pluggable connection system shortens the overall current path, shrinks overall connection size while improving connection integrity, removing cost, and improving vibration resistance — up to 20g based on IEC 60068-2-6. Its highly compact design reduces space by up to 30% and requires minimal space when mated. Features light grey glass-fiber reinforced polyphthalamide housing, rated UL94V-0, and tin-plated electrolytic copper solder pins for both wave and reflow soldering. Wire-to-board connections offer high contact reliability in choice of 3.5mm and 5.0mm pin spacing. Also available in 7.5mm pin spacing, wire-to-wire, board-to-wire, and panel feed-through variants and the picoMAX® eCOM "pinstrip pluggable" version; *go online or call.*

233 AND 218 SERIES MICRO PCB TERMINAL BLOCKS

RoHS Compliant Available

233 series

218 series

These fine-pitch PCB terminal blocks feature Cage Clamp® spring pressure termination technology and convenient operators for opening the spring. **233 series** features "momentary" lever operation, while the low-profile **218 series** features a "maintained" slide mechanism that allows you to open the springs of multiple poles at once for easier wiring. Both accept 28-20AWG solid or stranded conductors and are rated for 150V /4A. Additional pole configurations available; *go online or call*.

S2L-SMT SERIES 3.5MM PITCH PCB PLUG-IN PIN HEADERS

RoHS Compliant Available

S2L-SMT 3.5/90°

S2L-SMT 3.5/180°

S2L-SMT series high-temperature-resistant, closed PCB plug-in pin headers in choice of 90° angled or 180° straight orientation. Minimate range 3.5mm pitch is ideal for miniaturization and high-density applications. Tin-plated copper alloy solder pins are suitable for thru-hole reflow and wave soldering. Housing is molded from black, LCP GF material with a flammability rating of UL94V-0. UL 1059 rated for 150V, 10A; CSA C22.2 rated: 50V, 5A; DIN IEC rated: 50V, 10A. UL recognized, CSA certified.

SL-SMT SERIES 5.08MM PITCH PCB PLUG-IN PIN HEADERS

RoHS Compliant Available

Weidmüller

SL-SMT 5.08/90°

SL-SMT 5.08/180°

SL-SMT series high-temperature-resistant, closed PCB plug-in pin headers in choice of 90° angled or 180° straight orientation. Omnimate range 5.08mm pitch is ideal for miniaturization and high-density applications. Tin-plated copper/tin 3.2mm solder pins are suitable for thru-hole reflow and wave soldering. Housing is molded from black, LCP GF material with a flammability rating of UL94V-0. UL 1059 and CSA C22.2 rated: 300V, 15A; DIN IEC rated: 400V, 19A. UL recognized, CSA certified.

Weidmüller

LSF-SMT 3.5/90°

LSF-SMT 3.5/135°

LSF-SMT 3.5/180°

LSF-SMT series push-in direct connection, 3.5mm pitch PCB terminal connectors in choice of 90° angled, 135° angled or 180° straight orientation. Feature spring-action release buttons open the clamping point for small cross-sections such as unprepared, flexible wire conductors and for changing conductors. Tin-plated copper alloy 3.5mm solder pins are suitable for thru-hole reflow and wave soldering. Housing is molded from black, high-temperature insulating LCP GF material that comply with requirements for lead-free soldering processes; flammability rated: UL94V-0. UL 1059 and CSA C22.2 rated: 300V, 10A; DIN IEC rated: 160V, 17.5A. Wire gauge: 24-16 AWG/0.14-1.5mm². UL recognized, CSA certified.

Small 3.5mm pitch is ideal for miniaturization and high-density applications. Single- and double-level pin headers mate with all 3.5mm socket connectors; *ordered separately on this page.* Offered in standard thru-hole and surface mount compatible versions. **SL** and **SLD series** pin headers are molded from black, PBT material with a V-0 flammability rating. **SL series** surface mount compatible pin headers are molded from halogen-free, high-temperature resistant, black LCP material which is suitable for all SMT soldering processes. Thru-hole reflow technology enables 100% SMT production, double-sided PC boards, and greater tensile strength than standard SMT components. UL rated for 300V, 10A. Available in tape-on-reel or tray packaging; *go online or call.*

8113 AND 8213 SERIES SCREW CLAMP PLUGGABLE PC BOARD TERMINAL BLOCKS AND SOCKETS

RoHS Compliant Available

wieland

Plug

Vertical Socket

8113 and **8213 series** 2-piece, plug-in terminal strips provide quick-connect and disconnect of PC board wiring. Available in horizontal or vertical configurations. All metal parts are recessed or enclosed in the insulating body to provide circuit protections and dead-front safety. Insulating housings are made of polyamide 6.6 and rated UL94V-0. Captive nickel-plated brass screws are secured against loosening. Contact springs and solder pins are tin-plated bronze. Rated 300V, 15A, 12 AWG. Additional pole configurations (2 to 24 poles), unmarked parts, and 5mm and 5.08mm left-and-right marked vertical plugs are available in both **8113** and **8213 series**; *go online or call.* UL recognized, CSA certified, VDE approved.

8113 SERIES — 5.00mm SPACING
8113 series plugs are black while **8113 series** sockets are available in black (listed in the table below) or gray (select gray by changing last digit in mfg. part no. from **1** to **0**) and have 0.039″ (1.00) square pins for 0.197″ (5.00) spacing.

8135 AND 8235 SERIES 35° ANGLED MODULAR PC BOARD TERMINAL BLOCKS

RoHS Compliant Available

wieland

35° angle wire entry ideal for limited-space applications. Modular 2- and 3-pole units assemble to form any pole configuration. Field wiring rated 300VAC, 20A, 12-22AWG; factory wiring 300VAC, 30A, 12-30AWG. Body is polyamide 6.6 rated UL94V-0. Clamping screws are dichromated steel. Clamping body is nickel plated copper alloy. Color: gray. UL recognized, CSA certified, VDE approved. Also available in 2- to 24-pole configurations, with or without insulating plate, with or without fixing bolt, and in marked or unmarked versions; *go online or call for versions not listed below.*

WIECON 8142 Z SERIES SNAP-IN PCB CONNECTORS

NEW

RoHS Compliant Available

wieland

Features:
- Ratings: 300V, 1.5A
- Spacing: 5mm
- PCB screw terminal
- Raising cage clamp
- Wire Range: 20-14 AWG
- Wire Strip Length: 6mm
- Screw Size: M3
- Pin Strip Header Pin Diameter: 1.3mm

Snap-In Connector

Pin Strip

CONTINUED

WIECON 8142 Z SERIES SNAP-IN PCB CONNECTORS (CONT.)

The Wieland snap-in connector was designed for wall mount control devices. The snap-in connector portion snaps into the baseplate while the pin strip and PCB stay with the controller housing separating the wiring operation from the installation. Connectors are approved for multiple wires and feature rising cage wire clamp technology. Pin strips are available for either through hole or reflow high-temp solder technologies. Ideally suited for wall mount or panel mount HVAC control system. 300V/1.5A, UL recognized, CSA approved.

D-SUBMINIATURE CONNECTORS FOR FIELD TERMINATION

RoHS Compliant Available

L-com Global Connectivity

DB9 Female

HD15 Female

- Easily terminate DB9 or SVGA/HD15 female connectors in the field, no crimping or soldering required
- Panel mountable for thicknesses of up to 0.062″
- Terminal block allows for simple, quick wiring changes
- Gold plated contacts provide reliable connections with repeated mating cycles

DB9 FEMALE CONNECTOR FOR FIELD TERMINATION

The DGB9FT field termination female connector provides an easy and convenient way to perform field termination of any DB9 cable. Separate connection points are provided for all 9 positions of the connector. Terminal block design with set screws provides reliable electrical connections utilizing no special tools. The terminal block area is clearly marked making proper termination virtually foolproof. Panel mountable for thickness up to 0.062″.

SVGA HD15 FEMALE FOR FIELD TERMINATION

The DGBH15FT field termination female connector provides an easy and convenient way to perform field termination of any SVGA or HD15 cable. Separate connection points are provided for all 15 positions of the connector allowing a DDC compliant termination utilizing pins 9 and 15 as required by the VESA standards. Terminal block design with set screws provides reliable electrical connections utilizing no special tools. The terminal block area is clearly marked making proper termination virtually foolproof. Panel mountable for thickness up to 0.062″.

SCOTCHLOK™ HAND CRIMP TOOLS

TH-440 TH-450 TH-490 E-9Y

Mfg. part no. TH-440 high carbon, heat-treated steel crimping tool that has a unique design that provides a high strength/weight ratio that crimps a broad range of 22-10 AWG terminals and connectors. **Mfg. part no. TH-450 CRIMPING TOOL** cushioned vinyl handles made of 1.40″ (33.5mm) high-strength, heat-treated carbon steel. Features include: wire cutter, insulated and uninsulated terminal crimping stations, 5-position bolt cutter, and a funnel-shaped wire stripper. **Mfg. part no. TR-490** crimps barrel and insulation grip independently on 22-10 AWG (0.35-6.0mm) insulated and non-insulated terminals and connectors: nylon or vinyl insulated, butted or brazed seam. **Mfg. part no. E-9Y** has stepped jaws and a long nose for parrell crimping. Mechanical advantage of 3-to-1. Includes integrated wire cutter. Not to be used for 19+ AWG wire gauge.

0.312″ SERIES FASTON RECEPTACLE CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Ergonomic design provides comfortable, contoured pushing surfaces for mating
- Configured to allow operators to recognize proper position and orientation
- Internal locking feature provides secure terminal retention
- Anti-reverse component to reduce potential for improper terminal assembly
- Housings are made from UL94V-2 and V-0 flammability rated nylon material
- Color coded to help prevent misapplication

An ergonomically designed, single position FASTON connector to insulate Tyco Electronics 0.312″ series FASTON receptacles. These receptacles and connector will mate with 0.312″ series quick connect tabs in a variety of commercial and industrial components. The connector is provided in two material and color options to address application requirements.

COLD-APPLIED SPLICES

RoHS Compliant Available

TE connectivity

Authorized Distributor

Seals Without Heat, Grommets, Greases or Tapes

- One-step crimp termination and environmental protection
- No heating required for easy, safe installation
- Proven flame-resistant, gel-sealing technology
- Immersion-resistant
- Application flexibility
- Reliable electrical performance
- One-piece construction
- Small and lightweight profile

Cold-applied splices are designed to provide wire termination, strain relief, and protective environmental sealing in a single step. Excellent no-mess sealing is achieved with a non-flowing, flame-retardant sealing gel, and because no heat is needed, these splices can be applied in potentially hazardous aerospace and defense applications, such as fueled aircraft. Constructed of a transparent PVDF (polyvinylidene fluoride) insulation sleeve, tin-plated copper crimp splice, color-coded thermoplastic end caps and clear silicone-based sealing gel. Provides an immersion-resistant in-line splice on 1:1 wire from 26 to 12 AWG, nickel-, silver-, and tin-plated conductor, and cross-linked ETFE, TFE, and TKT conductor insulations. Operating temperature range: -65°C to +150°C. Meets requirements of SAE-AMS-DTL-23053/8 for insulation sleeve and the current draft of SAE-AS81824/12 (modified for 150°C) crimp splices. *Order* **mfg. part no. AD-1381** *cold-applied crimp tool; go online or call.*

COOLSPLICE WIRE CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

Features:

- Simple push button termination
- Reliable and proven insulation displacement technology
- Left/right side independent terminations
- Available in unsealed and sealed versions
- IP67 rating
- Slim-symmetrical glossy appearance
- Visually controlled termination
- Fits within 10.00mm [.394] diameter hole Electrical
- Current / Voltage Ratings: 2.5A Max.,230 VAC/DC; 5A Max., 50 VAC/120 VDC
- Contact: Tin plated, copper alloy
- Housings and Pushbuttons: UL94-V0 rated plastic
- -40°C to +65°C continuous operating temperature

TE Coolsplice Connectors are designed to connect a pair of discrete wires, or a twin cord cable in line to a pair of discrete wires or twin cord cables. Available in unsealed and sealed, color coded configurations. Factory or field terminations are completed with standard pliers. The TE Coolsplice Connectors eliminates the need to pre-strip the insulation from the wire conductors and provides a visual controlled termination. The push connect buttons provides a more ergonomic wire termination than conventional twist-on wire connectors/nuts. The slim, symmetrical contoured, snag resistant connectors fit through a 10.00mm [0.394] diameter hole or pvc tube.

Mfg. Part No.	Description	AWG	Color	Stock No.	Price Each 1-9

AMP PIDG® SPADE TONGUE TERMINALS

RoHS Compliant Available

TE connectivity

Authorized Distributor

Spade Tongue

Flanged Spade Tongue

Spring Spade Tongue

- Closed Barrel
- Regular Wire
- Nylon Insulation with Insulation Support
- Copper with Tin Finish
- Voltage: 300VAC

PIDG® terminals and splices meet MIL-T-7928, Type II, Class 1 and 2 requirements. UL listed, CSA certified for 105°C, 300V. *Order* **mfg. part no. 58433-3** *crimp tool separately on page 1116.* **Sold in package quantities listed in table below.**

AMP PIDG® SPLICES

RoHS Compliant Available

TE connectivity

Authorized Distributor

Butt Splice

Knife Disconnect

- Closed Barrel
- Regular Wire
- Nylon Insulation with Insulation Support
- Insulation Diameter: 0.082″ (2.08mm)
- Copper with Tin Finish
- Voltage: 300VAC

PIDG® splices meet MIL-T-7928, Type II, Class 1 and 2 requirements. UL listed, CSA certified for 105°C, 300V. *Order* **mfg. part no. 58433-3** *crimp tool separately on page 1116.* **Sold in package quantities listed in table below.**

AMP PRO-CRIMPER™ III HAND TOOL

TE connectivity

Authorized Distributor

PRO-CRIMPER™ III tool frame requires less hand force to produce the same connection as comparable tools. With interchangeable die sets it can crimp many different types of connectors. Multiple terminal sizes are accommodated in one die. Has angled head for comfortable hand and wrist position. Ratchet control provides complete crimping cycle. Features emergency ratchet release and extra strong pivot pins for greater durability. Constructed of rugged high-carbon steel with cushioned handles. Various interchangeable die sets for the **PRO-CRIMPER™** tool frame are available; *go online or call*.

Mfg. Part No.	PRO-CRIMPER™ II Tool Frame	Stock No.	Price 1-4
58433-3	With Die Set for Insulated Terminals and Splices, PIDG® and PLASTI-GRIP®, 22-10 AWG	**97F9552**	164.41
58433-2	With Die Set for Hex Crimp 50-Ohm BNC/TNC Coaxial Connectors, 58, 62, 59 RG/U	**50F1983**	258.31
58448-2	With Die Set for D-Sub 20 DF Pin and Socket Contacts, 28-24, 24-20 AWG	**44F8730**	327.02

Receptacle

Flag Receptacle

Tab

Completely protected terminal and wire crimp with comparable electromechanical performance to open barrel "F" crimp Faston® terminals. Receptacles, flag receptacles and tabs are preinsulated assemblies featuring housing molded from type 6/6 nylon material with a +125°C UL temperature rating. Faston® receptacles and tabs are recessed sufficiently within the housing to allow its use in 600V applications. Assemblies are color-coded by wire size: Violet–26–22 AWG, Red–22-18 AWG, Blue–16-14 AWG, and Yellow–12-10 AWG. Terminal base material is brass, except for mfg. part nos. with (†) which denotes a phosphor bronze terminal base.

GELCAP POWERGEL STUB SPLICE KITS

TE connectivity

Authorized Distributor

GELCAPS

GELCAP-SL-2/0-3HOLE(B10)

- Quickly insulates, seals, and protects
- Water-resistant
- Abrasion and UV resistance
- Compact, corrugated design
- Easy to install and remove
- Accommodates a wide range of cable sizes

GelCap splice cover kits quickly and conveniently insulate, seal, and protect stub splice connections up to 1000V. The PowerGel sealant consists of a silicone-based cross-linked polymer mix that is halogen free and provides physical protection, electrical insulation, an excellent moisture seal over a wide temperature range (-40°C to over 90°C) and is compatible with cable jacket materials. Engineered to handle the harsh environment of motor connections applications, GelCap splice cover kits are equally well suited for many other stub connection applications including outdoor lighting, such as street light connections, over wire nuts for sealing, irrigation systems, and HVAC.

POWERGEL SPLICE AND TAP KITS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- PowerGel quickly seals and insulates
- Water and abrasion resistant
- Protects from moisture ingress, corrosion, and pollution
- Easy one-step, snap-shut installation saves time
- No special tools required
- Easy and safe re-entry
- Splices a wide range of cable

PowerGel sealant splice and tap kits offer a state-of-the-art sealed splice or tap for underground and overhead applications. Each closure configuration offers a fast and simple method for splicing, insulating, and environmentally sealing low-voltage cable splices up to 600V. The PowerGel sealant consists of a silicone-based cross-linked polymer mix. It conforms to and seal surfaces and has elasticity and shape retention for easy handling. The gel and its cover provide physical protection, electrical insulation, and a convenient means of delivering compression. This halogen-free gel provides an excellent moisture seal over a wide temperature range (-40°C to over 90°C) and is compatible with cable jacket materials. Simply install the connector, place the closure around the connector, and snap it closed. No tapes, mastic, tools or mixing are required.

Mfg. part no. 58433-3 PRO-CRIMPER™ II hand tool frame, complete with **mfg. part no. 58423-1** interchangeable die set assembly, crimps PIDG® and PLASTI-GRIP® insulated terminals and splices 22-16, 16-14, and 12-10 AWG. Features angled head for comfortable hand and wrist position. Ratchet control provides complete crimping cycle plus emergency ratchet release and extra strong pivot pins for greater durability. Constructed of rugged high-carbon steel with cushioned handles for comfort. Various interchangeable die sets fit into tool frame, including replacement die set **mfg. part no. 58423-1**, *ordered separately below.*

Mfg. part no. 55893-1 hand tool crimps pre-insulated sealed terminals and splices 22-18, 16-14, 12-10 AWG.

Mfg. part no. 49935 CERTI-CRIMP® hand tool with ratchet control provides a complete crimping cycle. Crimps SOLISTRAND® terminals and splices 22-16, 16-14, and 12-10 AWG. Features insulation crimp adjustment, a locator for proper terminal positioning and support, a wire stop, and color coding and/or wire information on the tool head or handles. Designed to exacting dimensions, requires minimum skill to operate, and is repairable. Suited for military, UL and CSA applications.

Mfg. part no. 59824-1 TETRA-CRIMP® hand tool crimps PIDG® and PLASTI-GRIP® insulated terminals and splices 26-22, 22-16, 16-14, and 12-10 AWG. Dies travel in arc-like path. Features multiple color-coded crimping cavities, terminal locator and wire stop, and ratchet control release.

Mfg. part no. 696126-1 SUPER CHAMP® multipurpose hand tool features wire stripper, cutter, and multiple crimping options. Ideal for stripping wire, cutting bolts and crimping insulated terminals and splices 12-10, 16-14, and 22-18 AWG. Constructed of high-carbon, heat-treated steel with PVC cushion grips on handles.

RAYCHEM D-200 SERIES MINISEAL CRIMP SPLICES

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Ideal for wire to-wire in-line splicing
- Wire range from 26 to 12 AWG
- Immersion-resistant
- Small and lightweight
- Transparent sleeve offers inspectability
- Provides environmental protection and strain relief
- Designed for easy installation
- Meets SAE-AS81824/1 requirements (modified for 200°C applications)

D-200-83

D-200 series MiniSeal crimp splices were designed to provide an immersion-resistant in-line splice on 1:1 wires with nickel-plated conductors having an insulation rated for at least 135°C. Constructed of a nickel-plated copper alloy crimp splice with two color code rings and a heat-shrinkable, transparent blue, radiation cross-linked modified fluoropiymer insulation sleeve containing two meltable, environment-resistant, light blue thermoplastic fluoro-elastomer sealing rings. Ideal for aerospace and defense applications where performance, reliability and small size is essential. Meets or exceeds SAE-AMS-DTL-23053/13 (insulation sleeve only). Protects and seals RCW and BMS13-60 nickel-plated wires.

SOLDERSHIELD SPLICE KITS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Ideal for cable-to-cable in-line splicing
- Splices shielded multiconductor cable
- Environment-resistant
- Designed for easy installation
- Controlled soldering process
- 360° shielding eliminates EMI problems
- Transparent sleeves offer inspectability
- Provides strain relief and insulation

SolderShield splice kits are ideal for fabrication/repair/rework while restoring the electrical integrity of the shielded cable having one to four tin-, silver-, or nickel-plated copper conductors and insulations rated for 135°C min. Each kit includes one SolderShield splice consisting of a flux-coated, solder-impregnated copper shield braid encased in a insulation sealing sleeve, plus one, two or four MiniSeal crimp conductor splices with insulation sealing sleeves. **D-150 series** sealing sleeves are constructed of blue transparent, heat-shrinkable modified polyvinylidene fluoride and contain two sealing rings. **D-200 series** sealing sleeves are constructed of blue transparent, heat-shrinkable modified fluoropolymer and contain two sealing rings.

INSULKRIMP® — FEMALE (STANDARD FLARE), TIN-PLATED BRASS CONTACT, PVC INSULATED

InsulKrimp® fully-insulated quick-disconnects are designed for dense packaging requirements (low profile height). Translucent "see-through" insulator provides for fast inspection. Features funnel entrance for increased crimping rates and wire stop in barrel to prevent insertion of over-stripped wires. UL listed, CSA certified.

CLOSED-END INSULATED SPLICES

RoHS Compliant Available

molex

Molex Nylon Closed-End Connectors feature 2-piece construction. A translucent nylon-molded insulation is adhered to the metal connector insert. The connector's insert is annealed, Tin-plated, seamless, pure electrolytic, tough pitch Copper. Individual design and performance requirements dictate the use of Copper inserts. These connectors are all rated for a maximum of 600V.

OSHA

MADE IN USA

Wire guide barrel for excellent electrical and mechanical connections. One-piece burr-free construction for maximum electrical conductivity. Electro-tin plating for maximum corrosion resistance. Constructed of pure electrolytic (ETP) copper, annealed to relieve stress points and provide maximum installed strength. Barrel-to-pad transition designed to minimize flexing and bending. Multiple "V" grooves in barrel give maximum holding power and current flow. Insulation is molded vinyl or nylon. Molded flange for accurate location of crimp tool. Open-end design permits visual inspection of wire location before and after crimping. Made in the U.S.A. UL recognized, CSA certified, OSHA compliant.

SPADE (FORK) TONGUE TERMINALS

MADE IN USA · RoHS Compliant Available · multicomp · OSHA

Mfg. part nos. CBS-T0 and **CSS-T0** are noninsulated butted seam terminals for use where special characteristics are not required. **Mfg. part no. CBS-Z0** noninsulated brazed seam terminals allow crimp at any location on barrel. Seam is silver brazed and can not open under crimping or operating pressure. **Mfg. part nos. CBS-TV** and **CSS-TV** vinyl insulated terminals with "wire guide" barrel consists of butted seam with flared, rigid PVC sleeve. Flexure occurs over wide area on the wire insulation rather than at juncture. Funnel shaped sleeve guides wire strands into barrel. **Mfg. part no. CBS-ZV** vinyl insulated brazed seam terminals with "wire guide" barrel have same features as **mfg. part no. CBS-TV** terminals plus the advantage of the brazed seam over the butted seam. **Mfg. part nos. CBS-DY** and **CSS-DY** nylon insulated terminals with "sure-grip wire guide" barrel consist of a butted seam with flared seamless brass sleeve covered with a flared injection molded nylon sleeve. Made in the U.S.A. UL recognized, CSA certified, OSHA compliant.

HEAT-SHRINK CRIMP CONNECTORS

RoHS Compliant Available · multicomp · MADE IN USA

Heat-shrink connectors are environmentally sealed by a heat-shrinkable insulation that is pre-installed on the component. As the polyolefin tubing shrinks, an adhesive lining seals out contaminants and provides strain relief for the wire connection. These parts are reliable and easy to install. Each connection can be visually inspected through the translucent insulation. The heat-shrink tubing is corrosion and abrasion resistant and is ideal where corrosive fumes or liquid contaminants are present. Heat-shrink crimp connectors are made using seamless butt splices and brazed seam ring and fork tongue terminals. Nylon fully insulated quick-disconnects are butted seam. UL listed file E141071, CSA certified. **Sold in packages of 25 and 100.**

HEAT-SHRINK SOLDER CONNECTORS

MADE IN USA

multicomp

Easy Installation

Heat-shrink solder connectors are made with a low temperature solder and require no crimping. Solder connectors provide greater mechanical strength and superior conductivity. UL recognized (file E141071) and CSA certified (file 100774). Made in the U.S.A. **Sold in packages of 25 and 100.**

Battery Cable Lugs offer seamless performance connecting cables, electrical appliances and other power mechanisms, for harsh-duty environments. The seamless barrel designed lugs are ideal for heavy-duty 600V+ applications. Wire ranges from 8 AWG to 250 MCM with a variety of stud hole sizes can be crimped with industry standard tooling. The flared barrel entry accommodates easy insertion of stranded wire.

FIT®-SLV SERIES SHRINKABLE SOLDERING SLEEVES

AlphaWire
Cables you trust. Service you deserve.

FIT®-SLV series soldering sleeve is a one-piece, shield ground termination system that features a strong, low-cost soldered connection which is completely insulated and encapsulated. Sleeve contains precisely engineered preform of fluxed solder and thermoplastic inserts at each end and when placed over a cable shield and heated, the solder melts and flows, connecting the ground lead and shield. Outer sleeve shrinks and the thermoplastic inserts melt, encapsulating the termination, so that the result is a perfectly soldered, strain-relieve and environmentally protected termination. Available in two different operating temperatures 105°C and 125°C, with the soldering melt temperatures being: 145°C and 180°C. Shrinkage ratio: 3:2 at 175°C.

RAYCHEM SOLDERSLEEVE™ SHIELD TERMINATORS

RoHS Compliant Available

TE connectivity
Authorized Distributor

Makes Wire and Cable Termination Easy and Faster Than Conventional Hand Soldering or Crimping

- Heat-shrinkable solder wire termination
- Transparent insulation sleeve provides encapsulation, inspectability, strain relief and insulation
- Preformed fluxed solder provides a controlled soldering process
- One-piece design offers easy installation and lower installation cost
- Available with pre-installed ground lead for easier installation

S01 AND S02 SERIES WIRE-TO-WIRE SHIELD TERMINATORS, SAE-AS83519 (MIL-S-83519)
Designed to make an environment-resistant shield wire-to-wire termination on cable. Transparent, heat-shrinkable insulation sleeve constructed of radiation cross-linked polyvinylidene fluoride. Immersion-resistant. **S01 series** without ground lead meets the performance requirements of SAE-AS83519 (MIL-S-83519/1). **S02 series** with 20 AWG pre-installed ground lead meets the performance requirements of SAE-AS83519 (MIL-S-83519/2) and MIL-W-22759/32-AA-90 (for lead).

S063 SERIES WIRE TERMINATORS WITH TIN-PLATED COPPER ALLOY BRAID STRAP
S063 series SolderSleeve™ shield terminators feature a heat-shrinkable, blue transparent, polyvinylidene fluoride sleeve containing a precisely engineered, fluxed solder band that is visible through the sleeve. The band provides solder and flux to terminate the ground lead to the cable shield. Encircling the band is a small, blue temperature indicator ring that melts only when the surfaces to be joined reach the correct soldering temperature. Immersion resistant. Temperature range: -55°C to +150°C. Meets the performance requirements of SAE-AS83519 (MIL-S-83519).

S200 SERIES HIGH-TEMPERATURE WIRE TERMINATORS, 200°C
S200 series heat-resistant SolderSleeve™ shield terminators are suitable for use in environments up to 200°C offering high workability and superior reliability. Available without or with pre-installed white ground lead. Feature a a heat-shrinkable, blue transparent, modified fluoropolymer sleeve containing a precisely engineered, fluxed solder band that is visible through the sleeve. The band provides solder and flux to terminate the ground lead to the cable shield.

CWT-xx-W122-5 SERIES WIRE TERMINATORS WITH PRE-INSTALLED LEAD

Designed for termination of bare or tin-plated copper shield on cable insulation-rated at least +85°C. Transparent, heat-shrinkable insulation sleeve constructed of radiation cross-linked modified polyolefin. Ground lead constructed of stranded, tin-plated copper polyethylene wire (22 AWG). Temperature range: -55°C to +125°C. Lead color: green

Mfg. Part No.	Length/I.D. (Min., In.)	Stock No.	Price Each 1-49

D-18112xx SERIES COAXIAL CABLE TERMINATORS

Designed for termination of coaxial cable to component terminals, contacts, printed circuit boards, and solderless wrap terminals. Transparent polyvinylidene fluoride insulation sleeve provides encapsulation, inspectability, strain relief (eliminates center conductor breakage), and insulation. Temperature range: -55°C to +150°C.

HIGHLAND™ ELECTRICAL SPRING CONNECTORS

RoHS Compliant Available

3M

- Suitable for either solid or stranded copper conductors
- Voltage rated 300V or 600V max., building wire*
- Voltage rated 1000V max., signs and fixtures
- UL listed, CSA certified

Highland™

HIGHLAND™ CONNECTORS

Highland™ economical, hard-shell wire connectors are used to electrically connect two or more wire ends in a pigtail application and insulate the connection. Color-coded for quick and easy wire-to-connector match. Constructed of a plated steel spring covered by a vinyl outer insulator designed to withstand temperatures up to 221°F (105°C). **Sold in packages of 100.**

PERFORMANCE PLUS WIRE CONNECTORS

RoHS Compliant Available

3M

O/B+BOX R/Y+BOX B/G+BOX TR+BOX 412-BOX

Connects two or more conductor ends in a pigtail application while insulating the connection. Provides maximum protection and a wider wire range. The flexible "mini-skirt" provides protection from "overstrips" and gives more room in tight spaces. The wing design makes them easy to install. The square wire spring has a corrosion resistant coating and grips quickly biting into conductors for a solid, secure connection.

WIRE-NUT WIRE CONNECTORS

RoHS Compliant Available

IDEAL®

Wire-Nut® Wing-Nut®

Wire-Nut® twist-on, square spring pressure-type wire connectors grab and secure wires quickly and consistently. Wing-Nut® connectors feature an extra tight grip and larger wire range combinations. Wings assist in increasing torque levels during termination. Twister® Al/Cu connector features an anti-oxidant gel included inside of the connector for splicing aluminum to copper wires for new applications or retrofits. All models are UL listed, CSA certified. **Sold in package quantities listed below.**

INSULATED AND NON-INSULATED DIN FERRULES

RoHS Compliant Available

PANDUIT®

Insulated — Non-Insulated

- Designed with a seamless barrel to contain wire strands for superior terminations
- Eases insertion of wire into terminal block
- Meets DIN standards for wire containment
- Suitable for limited space panel applications
- Multiple pin lengths available for a variety of terminal blocks

Choose from insulated ferrules with single or twin wire end sleeve and non-insulated ferrules in assorted sizes. Terminates stranded wire for insertion into terminal blocks. Provides panel shops, OEMs, electrical distributors, and end users with reliable termination performance. **Sold in package quantities indicated below.** Other DIN sizes and French standard style ferrules are available; *go online or call.*

HARSH ENVIRONMENT PLUGS AND CONNECTORS

RoHS Compliant Available

Woodhead

1447 Super-Safeway | 1547 Super-Safeway | 14W47 Watertite | 15W47 Watertite

Rated for harsh environments, these plugs and connectors stand up to the toughest industrial applications. Watertite® devices form an seal that meets the requirements of NEMA 4, 4X and 6; IP 65, 66 and 67 and resist high pressure hose down up to 1000psi. Super-Safeway® devices Designed for rugged industrial and commercial use share some of the advanced design features of their Watertite® counterparts. Their durable rubber housing resists heat, oil, impact, and chemicals. A patented self-centering cord clamp provides superior strain-relief for a range of cable sizes. Safeway® nylon plugs and connectors are Woodhead's economical solution for industrial and commercial applications. UL listed.

VALISE® TWIST-LOCK® PLUGS AND CONNECTORS

RoHS Compliant Available

HUBBELL Wiring Device-Kellems

Valise® Twist-Lock® plugs and connectors feature devices available in traditional black with white cord grips. Yellow with black cord grips are also available; *go online or call*. The removable cord grip inserts offer a simple way of accommodating a wide range of cord diameters, while providing a powerful hold to prevent slippage and strain. One-piece valise-style body offers unique interlocking lugs that secure the body together for strength and security as the device folds to grip the cord, even with rough use. Cord range: **HBL45** and **HBL47 series** = 0.220-0.660″ (5.6-16.8); **HBL23 series** = 0.325-0.720″ (8.26-18.3); **HBL26 series** = 0.590-0.930″ (15.0-23.6). UL listed, CSA certified, CE compliant.

POWERCON® CONNECTORS (CONT.)

Fig. 5 Fig. 6 Fig. 7

Used for AC power connections, Powercon® 20 Amp connectors utilize the same design as Speakon® connectors. Rated: 250V, 20A. Color-coded in A and B versions for power-in or power-out with identifying keyways. Cable O.D. 5-15mm with a maximum wire gauge of 14 AWG. **Mfg. part no. NAC3MPA-1** and **NAC3MPB-1** have quick-disconnect type termination. **Mfg. part no. NAC3FC-HC** Powercon® 32 Amp is an extremely robust and reliable locking single phase AC appliance cable connector for high current capacity. It serves the need of high power distribution systems and supplies for professional audio and lighting equipment and installations. Rated: 250V, 32A. UL and cUL recognized, VDE certified, SEV approved.

KFA SERIES AC INLETS WITH 1-AND 2-POLE FUSEHOLDERS

RoHS Compliant Available

SCHURTER ELECTRONIC COMPONENTS

Screw-On Mount

Snap-in Mount

KFA series are screw-on or snap-in panel-mount appliance inlets with standard line filters and 1- or 2-pole shock-safe fuseholders for 5 x 20mm fuses. All units with a voltage selector have 4.8 x 0.8mm quick-connect terminals; units wihout a voltage selector have 6.3 x 0.8 mm terminals. Allowable ambient air temperatures: -25°C to +85°C. All models feature a black thermoplastic housing, rated UL94V-0. UL recognized, CSA certified, VDE approved. Fuses available on pages 1408-1463.

Snap-In Mount — Unfiltered Snap-In Mount — Filtered Screw-On Flange Mount

C series 2-function power entry modules combine a double-insulated DPST switch and IEC 320 power line connector. Compact size for smaller panel cutout. Terminals allow for easy connection to any wiring scheme. **Mfg. part nos. 15CBS1** and **15CBE1** feature preconnected terminals from line to switch for reducing OEM wiring time. General-purpose filtered models have maximum leakage current, line-to-ground: 0.25mA @ 120VAC, 0.40mA @ 250VAC. Hipot rating (1 minute): 2250VAC line-to-ground; 1450VDC line-to-line. Rated current: 10A @ 120VAC; 10A @ 250VAC. Rated voltage: 120/250VAC. Medical filtered model is designed specifically for health care applications and offers extremely low leakage current to comply with UL544, UL2601 and CSA22.2 health care specifications for use with both patient and non-patient care equipment. All modules are UL recognized, CSA certified, VDE approved.

CORCOM M SERIES POWER ENTRY MODULES (CONT.)

M series power entry modules offer many power entry components and filtering choices. The IEC connector provides an internationally accepted power entry termination, which can be used with a variety of line cords. Selectable fuse holder allows use of single or dual European fuses, or a single North American fuse (fuses not included). Optional DPST on/off switch breaks both sides of the line and is labeled with international I/O markings. The voltage selector permits changing transformer primary connections, and is available in 2- or 4-voltage configurations. Select from unfiltered and general-purpose, premium-grade or medical-grade RFI filtered models to fit a specific application need. Wiring for all models is accomplished via 0.110″ terminals. All models feature a screw-on flange style mounting. Rated voltage (max.): 250VAC. UL recognized, CSA certified, VDE approved.

AC INLETS WITH 1- AND 2-POLE FUSEHOLDERS/SWITCHES

RoHS Compliant Available SCHURTER ELECTRONIC COMPONENTS

KM01

DD11

KM series are power entry modules with integral 1- or 2-pole shock-safe fuseholder for 5 x 20mm fuses and on/off line switch. Snap-in mounting from the equipment front. Allowable ambient air temperatures: -25°C to 70°C. All models feature a black thermoplastic housing, rated UL94V-0. *Cases and fuse drawers ordered separately; go online or call.* UL recognized, CSA certified, VDE approved. *Fuses available online or call.*

DD11 SERIES INLETS WITH LINE SWITCH AND FUSEHOLDER, SCREW-ON PANEL MOUNT

DD11 series power entry modules/IEC appliance inlets for standard and medical applications with high transient loads. Features 1- or 2-pole shock-safe fuseholder and DPST power line switch rated at 10A continuous, 100A inrush current. Choice of red or green illuminated or non-illuminated rocker switch. Black thermoplastic housing with screw-on panel mounting flange, rated UL94V-0. Quick-connect terminals are 4.8 x 0.8mm. In: 8A at Vn: 250V max. 50/60Hz. Dimensions: 65mmH x 27.7mmW x 38.1mmD. UL recognized, ENEC approved. For added safety, *"Extra-Safe" fuse drawers ordered separately; go online or call*

RoHS Compliant Available

SCHURTER ELECTRONIC COMPONENTS

5200 Screw-On

5200 Snap-In

5220 Screw-On

5220 Snap-In

5200 and **5220 series** AC appliance inlets with line filter offer class I protection, pin-temperature 70°C (cold condition). There are panel mount front side screw-on or snap-in versions. Fuseholders are shocksafe category PC2 according to IEC/EN 60127-6 and for fuses 5 x 20mm. Snap-in panel thickness is 0.8-3mm. **5200 series** features 1-pole fuseholder with spare fuse compartment. **5220 series** features a 2-pole fuseholder. Quick-connect terminals are 6.3 x 0.8mm. Qualified for use in equipment according to IEC/EN 60950.

CORCOM EEA, EEB SERIES POWER LINE FILTERS

RoHS Compliant Available

TE connectivity

Authorized Distributor

EEB Series

- Compact EMI filter with IEC 60320-1 C14 inlet
- Two element circuit provides extended attenuation
- Extended differential mode performance
- Available in three terminal configurations

EEA Series

- Compact single stage EMI filter with IEC 60320-1
- C14 inlet
- Two element circuit provides basic attenuation
- Same performance as the EF Series
- Available in three terminal configurations
- Supersedes EF Series

EAH & EBH Series

- Same size as EEA and EEB
- Minimal leakage current suitable for medical applications
- Flange mounted
- Spade terminals

CORCOM GG, GS AND HG SERIES FILTERED IEC POWER ENTRY MODULES WITH METRIC FUSEHOLDER

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Space-saving, compact design
- Horizontal, screw-on flange or snap-in panel mounting
- IEC 320 power cord connector
- RFI filter versions for general-purpose or medical applications
- Single or dual 5 x 20 mm metric fuseholder
- Choice of 0.25" terminals or 5" wire leads for load-side terminations

Screw-On with Terminals | Screw-On with Leads | Snap-In with Terminals

GG, GS series general-purpose and **HG series** medical filtered power entry modules with metric fuseholder takes up the smallest possible panel space. Hipot rating (one min.): line-to-ground 1500VAC; line-to-line 1450VDC. Voltage rating (max.): 250VAC. All models are UL recognized, CSA certified, VDE approved.

GENERAL-PURPOSE FILTER

GG and GS series general-purpose filter versions both offer maximum leakage current, each line to ground @ 120 VAC 60 Hz: 0.25mA; @ 250 VAC 50 Hz: 0.42mA.

LA SERIES — 120V/240V SELECTABLE VOLTAGE

LA series multi-function power entry modules with choice of filtering capabilities. Features IEC power line connector, selectable fusing capabilities, DPST on/off switch and 120/240 voltage selection. **EFLA model** has a general-purpose filter for susceptibility applications while the **EZLA model** has a premium performance filter designed to bring most digital equipment into compliance with VDE 0871, Level B (as well as FCC Part 15J, Class B) conducted emissions limits. Both models are UL recognized, CSA certified, VDE approved.

CORCOM M SERIES POWER ENTRY MODULES

RoHS Compliant Available

TE connectivity

Authorized Distributor

M series power entry modules with RFI filtering capability. Feature general-purpose RFI filters designed for susceptibility applications, providing RFI control of line-to-ground noise. Have IEC connector, selectable fuse. 5A rating at 120V. **S suffix** in type number denotes DPST on/off switch; **4** indicates 4V selector. UL recognized, CSA certified, VDE approved.

POWER ENTRY MODULES – RFI FILTERED/FUSED, RFI FILTERED/SWITCHED

FN9260 SERIES FUSED IEC INLET FILTERED POWER ENTRY MODULES

RoHS Compliant Available

SCHAFFNER

General-purpose, compact IEC inlet filtered power entry modules with one or two 5 x 20mm fuse holders to meet requirements of IEC 950. Current rating to 10A. Operating voltage: 250VAC. **Suffix B** in mfg. part nos. denotes low-leakage version for medical applications. UL recognized, CSA certified, VDE approved.

DD12 SERIES POWER ENTRY MODULES WITH LINE FILTER

RoHS Compliant Available

SCHURTER ELECTRONIC COMPONENTS

- Ultra-compact design
- Aluminum case provides good shielding
- All single elements are already wired
- Fuse drawer meets requirements of medical standard IEC/EN 60601-1
- The fuseholder is accessible from the equipment front
- Designed for standard and medical applications
- Qualified for use in equipment according IEC/EN 60950

DD12 series panel-mount power entry modules with line filters provide four functions: Appliance inlet protection class I, Line switch 2-pole, fuseholder for fuse links 5 X20 mm 1-or 2-pole, line filter in standard and medical version. Quick connect terminals 6.3 x 0.8 mm. Ideal for low profile designs and applications with high transient loads. Voltage rating 250VAC. *For added safety "Extra-Safe" fuse drawers ordered separately online or call.*

CD SERIES CASING WITH FILTER

RoHS Compliant Available

SCHURTER ELECTRONIC COMPONENTS

Five Functions:

- 1.) Appliance inlet
- 2.) Line switch
- 3.) Line filter
- 4.) With or without voltage selector
- 5.) Fuse holder with interchangeable fuse drawer for 5x20 or 6.3x32mm fuses; *ordered separately below*
- 4.8 x 0.8mm quick connect terminals
- Qualified for use in equipment according to IEC/EN 60950

All single elements are already wired and the fuse drawer can be removed by hand. The fuses themselves can be accessed from the equipment front. **CD series** is available with or without a voltage selector. For added safety "Extra-Safe" fuse drawers are available; *go online or call.* "Extra-Safe" fuse drawers satisfy international standards for medical equipment and can only be removed with the aid of a tool.

CORCOM CU SERIESCOMPACT 1U HEIGHT SWITCHED POWER ENTRY MODULES

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Compact 1U (1¾") design
- 3A - 15A**
- Filtered and unfiltered versions
- SPST switch
- Shrouded quick-connect terminals
- Various mounting styles
- Lower power dissipation
- Higher system efficiency
- Lower cooling demand
- UL recognized, CSA certified, VDE approved**

CUFS1 Filtered Snap-In, CUE1 / CUBE1 Unfiltered Flanged Screw-On

CU series switched filtered and unfiltered inlet power entry modules are ideal for providing power entry for equipment designed for popular 1U (1¾") height equipment racks. The filtered versions provide complete EMI shielding, shrouded quick-connect terminals and basic filtering for up to 15A applications. The 15A unfiltered inlet snap-in versions are available in different configurations to fit a wide variety of panel cut-outs and thicknesses, and are offered with preconnected terminals from the socket to the switch. All models feature a common IEC 60320-1 C-14 power inlet for international compatibility. Maximum leakage current, each line to ground (filtered models only): 0.25mA @120VAC 60Hz and 0.40mA @ 250VAC 50Hz. Hipot rating (one minute): 1500VAC line-to-ground and 1450VDC line-to-line. Operating frequency: 50/60Hz. Rated voltage : 250VAC. Operating voltage : 120/250VAC. Terminal push-on force : 15 lb./67N (max). Applications include: rack-mounted equipment, telecom, consumer electronics, power supplies, routers, PCs, TVs, lighting, imaging equipment, set-top boxes and others operations with limited panel space. Other current ratings and mounting styles are available; *go online or call.*

CORCOM P SERIES CHAMELEON ADAPTABLE POWER ENTRY MODULES

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Snap-in or horizontal, screw-on flange panel mounting
- IEC power line connector
- **S models** — filtering for general-purpose applications
- **H models** — filtering for medical applications
- **DC models** — filtering for DC appluications
- Filter current — 3A, 6A or 10A
- Optional DPST on/off switch
- Single or dual fuseholder models
- Both North American and European fusing capabilities
- Unshielded and shielded version

P series power entry modules offer fuller flexibility of design in a compact, modular package that will fit any standard panel cutout, using adapters. Available with current ratings of 3, 6 or 10 amps, with or without DPST on/off switch, with dual or single fuseholders: two ¼" x 1¼" or 5 x 20mm fuses and choice of no shield, filter shield or complete shield versions. Terminal tabs: 0.187 x 0.032" (4.8 x 0.81mm). UL recognized, CSA certified, VDE approved.

S MODELS — GENERAL PURPOSE FILTER

S models offer protection for general-purpose applications where line-to-ground and line-to-line noise must be controlled. **PS prefix** in mfg. part nos. are snap-in panel mountable; **PE prefix** are horizontal, screw-on flange mountable. Units with filters are designed to meet low leakage requirements of VDE portable equipment. Available in current ratings of 3, 6 and 10 amps. All units feature a DPST on/off switch except for **mfg. part no. PS000SS3B** which has no switch. Voltage rating: 250VAC.

H MODELS — MEDICAL FILTER

H models provide susceptibility protection without leakage current associated with line-to-ground capacitors and are designed to allow equipment to meet UL 544 for patient care and non-patient care equipment. These modules have a DPST on/off switch and are snap-in for easy panel mounting. Voltage rating: 250VAC.

B MODELS — INTERCONNECT BLOCK

B models have an interconnection block that connects the voltage selection terminals of an unfiltered Chameleon module with a switch and an IEC connector to reduce external wiring. These modules have a DPST on/off switch and are snap-in for easy panel mounting. Voltage rating: 250VAC.

● PS0S0DBX0	10	Single	Dual	None	93B6649	17.16
● PS0S0SBX0	10	Single	Single	None	73K6487	18.36

DC FILTERED MODELS

The DC version of the **P series** power entry module features a general-purpose filter specifically for DC applications up to 80VDC. Designed to address the increasing demand for filtering on central office equipment and customer premises equipment. Also used with routers, desktop servers and multiplexers, aggregators, concentrators, etc. These modules have no switch and snap-in for easy panel mounting. UL recognized, CSA certified, TUV approved.

MEDIUM PERFORMANCE P SERIES POWER ENTRY MODULES

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Dual stage electrical setup
- High attenuation at higher frequencies
- Compact design
- Snap-in or flange mounting
- Standard IEC 60321-1 C14 power inlet
- Optional DPST switch
- Single or dual North American or Metric fusing capabilities
- UL Recognized, CSA Certified and VDE Approved

TE Connectivity has expanded the Corcom **P Series** power entry modules to include a new medium performance filter option. The medium **P Series** modules feature better performance than the standard filter option in a smaller size than the high performance filter. Filters are available in 3, 6 or 10A ratings. Modules are available in either snap-in or flange mount versions with a choice of horizontal or vertical mounting ears. The medium performance **P Series** modules are available with either single or dual fuses and may be configured with an optional DPST switch. The medium performance **P Series** modules are suitable for applications with increased attenuation requirements in higher frequencies where a smaller size is desirable.

SCHAFFNER

FN 389

Flexible package combines an IEC 320 inlet, dual fuse holders, DPST switch or voltage selector, with moderate and higher performance filter. **Mfg. part no. FN372-6-22** has a 4-position voltage selector. Units supplied with U.S. style 3 AG fuse holders. The fuse holder is for metric 5 × 20mm applications. **B** in mfg. part no. indicates low-leakage medical version. Depth is 2.2″ (57mm) for moderate performance for **mfg. part nos. FN372**, and **FN388**. **Mfg. part no. FN389** is 2.6″ (66.5) deep. UL recognized, CSA certified, VDE approved, SEV approved.

USB CHARGER RECEPTACLES

RoHS Compliant Available

Features
- Two USB ports 3 Amp, 5VDC, Type A, 2.0
- Tamper-Resistant (TR) decorator duplex
- Green LED indicator to show USB power available
- Impact and chemical resistant
- Back and side wire for solid or stranded wire
- Flush fit design

Specifications
- Electrical ratings: 125VAC, USB 3 Amp, 5VDC
- Input voltage: 125VAC, 60Hz
- Circuit feed-through 20 Amp, 125 Volt
- #10-14 AWG gauge wire terminals
- Dielectric withstand: 2000V
- Operating temperature: maximum continuous 75°C; minimum -40°C (without impact)
- Meets UL94 for 5V flammability rating
- Complies with battery charging specification USB BC1.2
- Compatible with USB 1.1/2.0/3.0 devices
- Complies with Part 15 of the FCC rules
- cULus listed to UL498 and UL1310

Hubbell's **USB Charger Receptacles** provide both USB and electrical power in a standard single gang electrical opening. Designed to provide more charging options for personal electronics, the USB ports are capable of charging two tablets simultaneously. The tamper-resistant Style Line® decorator outlets provide additional power for appliance use. Ideal for use in renovation and replacement of existing receptacles to add capacity for USB charging. Especially suited for use in universities, dormitories, hotels, hospitals, medical labs, restaurants, airports, classrooms and homes. Perfect for new construction.

HUBBELL USB CHARGER 4 PORT OUTLET

NEW

Wiring Device-Kellems

FEATURES

- Four USB ports 5 Amp, 5V DC, type A, class 2.0
- Switch activated port door; when opened delivers power, when closed shuts off power
- Green LED indicator to show USB power available
- Heavy duty stainless steel USB ports; rated for 10,000 cord insertions and removals
- Solid or stranded wire use:
  - Hot + Neutral: back wire compression clamp
  - Ground: back or side wire

SPECIFICATIONS

- USB 5 Amp, 5V DC
- Input voltage: 125V AC, 60Hz
- Zero no load power consumption when not-in-use
- Circuit feed-through 20 Amp, 125 Volt
- #14-10 AWG gauge wire terminals
- Dielectric withstand: 1500V AC for 1 minute
- Operating temperature: -40° to 75°C (without impact)
- Meets UL94 for 5V flammability rating

Hubbell's USB 4 Port Charger provides USB power in a standard single gang electrical opening. Designed to provide maximum charging for personal electronics, the USB ports are capable of delivering a total of 5 amps to multiple electronics simultaneously. The outlet features a USB port door, which when opened enables power, when closed all power is switched off. This eliminates all current flow for a "zero" no load draw. Buildings looking to provide 100% green efficiency in power delivery will maximize LEED and energy design.

ISOLATED GROUNDING RECEPTACLES

RoHS Compliant Available

Wiring Device-Kellems

IG2610 IG15CR IG20CR

Hubbell Isolated Grounding Devices provide a safe, clean and noise free ground by isolating the ground contacts from the mounting strap. The isolated ground circuit is completed by running a dedicated insulated ground wire from the system ground buss to the green grounding screw on the device itself. Orange nylon, flush receptacles wire isolated ground. All are 125 volts.

DIN RAIL UTILITY BOXES

- Pre-wired in-cabinet convenience power receptacle
- Mounts to existing DIN rail. Vertical or horizontal mounting
- Wide variety of device options
- Optional 5A corcuit breaker
- Movable setscrew design terminal block

DRUBGFI15AC

Offers a labor-saving way to provide utility power to any control cabinet. All gray housing, faceplate and receptacle that blend well in control cabinet applications. Standard duplex (15A and 20A), ground fault circuit interrupting or isolated ground versions. Dual snap design allows all Hubbell DIN rail utility boxes to be mounted vertically or horizontally. **H** in type number indicates terminal block positioned for easy wiring in the horizontal position. Spring-loaded DIN rail snaps provide secure fastening to any 35mm DIN rail. Terminal blocks feature a set screw design for easy wiring. Removable inserts allow for the relocation of the terminal block on any of the DIN rail utility boxes. UL recognized, CSA certified.

DIN RAIL OUTLET BOXES

RoHS Compliant Available

- Power input blocks have CAGE CLAMP® technology , include pre-marking for safe wiring
- Mounts to existing DIN rail in cabinet
- Single part number for easy ordering and reduced inventory
- Eliminates drilling extra holes
- Ground pin on top to avoid accidental shorting of hot and neutral pins
- Built-in test point for easy troubleshooting
- Wire size: 28-12 AWG

DRAC DIN RAIL AC RECEPTACLE BOXES

- Easy to wire
- Panel mountable
- Easily snaps onto 35mm DIN-rail
- 15A or 20A versions
- Available with ground fault current interrupt (GFCI) or standard duplex outlets
- Option for visual indication of power included with GFCI
- NEMA rated enclosure with UL94V-0 flammability rating
- Cover material: PBT/polycarbonate blend
- Base material: Polyamide % 30% GF
- UL508A and cULus approved
- Accepts 20-10 AWG solid or stranded wire

6720005423

DIN-Rail receptacles are enclosed 15A and 20A power outlets that provide a convenient power source for portable computers or test devices for in-the-panel troubleshooting.

LIQUATITE® SHIELD-FLEX™ EMI/RFI SHIELDED, FLEXIBLE, LIQUIDTIGHT CONDUIT

RoHS Compliant Available

electri-flex

Type SLA

Type HFEMS

Type HFSLA

Type EMCS

Type EMS

Type HFEMCS

Features:
- **Type SLA™** PVC jacket
- **Type HFSLA™** Halogen-free, low-smoke, low-flame spread PU jacket
- Steel inner core
- Tinned copper braid shield
- Standard color: black
- Working temperature: -20°C to 60°C

Types SLA™ and **HFSLA™** conduit are identical to standard UL listed liquidtight flexible steel conduit but augmented with a tinned copper shielding braid located over the inner steel core and under its protective jacket. The braid offers a minimum of 90% coverage. **Type SLA™** conduit features a protective, black PVC jacket that resists oils, acids, alkaline and UV light. The halogen-free version, **type HFSLA™** conduit has a specially-formulated polyurethane jacket that offers excellent flame retardancy, low-smoke characteristics and virtually eliminates the release of acidic gases found in PVC products, making it ideal for field installations where safety concerns exist regarding a material's reaction in a fire situation. Both conduit types accept standard metallic liquidtight fittings resulting in a sealed, waterproof raceway when assembled. Additional sizes are available; *go online or call.*

TYPE SLA™ EMI/RFI SHIELDED CONDUIT

● 789327	1	50	48T5277	936.96
● 789428	1 1/4	50	48T5281	1321.26

Features:
- **Type EMS™** PVC jacket
- **Type HFEMS™** Halogen-free, low-smoke, low-flame spread PU jacket
- Standard color: grey (**Type EMS™**), black (**Type HFEMS™**)
- Fully interlocked bronze inner core
- Working temperature: -55°C to 105°C

Types EMS™ and **HFEMS™** liquidtight flexible shielded conduit have an inner core that is made from a fully interlocked bronze strip. **Type EMS™** conduit features a protective, grey PVC jacket that resists oils, acids, alkaline and UV light. The halogen-free version, **type HFEMS™** conduit has a specially-formulated black polyurethane jacket that offers excellent flame retardancy, low-smoke characteristics and virtually eliminates the release of acidic gases found in PVC products, making it ideal for field installations where safety concerns exist regarding a material's reaction in a fire situation. Both conduit types accept standard metallic liquidtight fittings resulting in a sealed, waterproof raceway when assembled. Additional sizes are available; *go online or call.*

Features:
- **Type EMCS™** PVC jacket
- **Type HFEMCS™** Halogen-free, low-smoke, low-flame spread PU jacket
- Standard color: black
- Fully interlocked bronze inner core
- Working temperature: -55°C to 105°C

Type EMCS™ liquidtight flexible shielded conduit is a hybrid of **types SLA™** and **EMS™** conduit; *ordered separately above.* It utilizes the same fully interlocked bronze strip inner core and protective, black PVC jacket as **type EMS™** conduit, but gets further screening protection from a tinned copper braid as found in **type SLA™** conduit. The braid offers a minimum of 90% coverage. The halogen-free version, **type HFEMCS™** conduit has a specially-formulated polyurethane jacket that offers excellent flame retardancy, low-smoke characteristics and virtually eliminates the release of acidic gases found in PVC products, making it ideal for field installations where safety concerns exist regarding a material's reaction in a fire situation. Both conduit types accept standard metallic liquidtight fittings resulting in a sealed, waterproof raceway when assembled. Additional sizes are available; *go online or call.*

Type CLL Lightweight Conduit Features:
- Fitting pull-out: 40 lbs. (½" and larger)
- Material: halogen-free Nylon 6
- Standard color: black
- Working temperature: -40°C to 105°C

Type CLL conduit provides many of the same qualities of type CL conduit but with improved flexibility. It is UL recognized as component file #E174249 600V, 105°C, vertical flame, liquidtight, UV and impact tested. **Type CLL** conduit is to be used with the Corrlok® connectors; *ordered separately go online.* Additional conduit sizes are available; *go online or call.*

Mfg. Part No.	Trade Size (In.)	External Dia. (mm)	Spool Size (Ft.)	Stock No.	Price per Spool 1-4

Type CLR Conduit for Robotics Features:
- Fitting pull-out: 65 lbs.
- Material: halogen-free Nylon 12
- Standard color: black
- Working temperature: -50°C to 95°C intermitting to 150°C

Type CLR conduit is very lightweight and extremely flexible. It is ideally suited for robotic equipment. This conduit is intended for applications requiring continuous, repeated flexible motion, such as, power track and cable carrier installations. **Type CLR** conduit is to be used with the Corrlok® connectors; *ordered separately go online.* Additional conduit sizes are available; *go online or call.*

CORD GRIPS

RoHS Compliant Available

Amphenol® Industrial

DB series cord grips provide strain relief for flexible cord and cable. Ideal for internal uses, as well as conduit hub and panel-board mounting into threaded bodies or with locknuts. Suitable for use in hazardous locations per National Electric Code Class I, Div. 2; Class II, Div. 1 and 2; Class III, Div. 1 and 2. UL listed, CSA certified.

SMALL STRAIGHT BODY, MALE THREAD
Small, straight aluminum body, male thread, compression nut with washer, and single-hole, oil-resistant grommet.

IP67 IP68

Assembled View

Component Assembly View Shown with Shielded Cable

- Electroless nickel-plated aluminum housing and shielding ring provide EMI/RFI protection
- Unique grip-body internal cut-away design provides a clear center pass-through, simple assembly and field serviceability
- Tapered shielding ring provides a robust, reliable connection, low contact resistance and cable grounding
- Internal wedge-shaped HNBR grommet provides liquid and dust sealing, cable retention to withstand 50-lbs (222.4N) pull force and a stable connection in rugged applications
- Two external mounting holes simplify installation via a single-side connection
- Strong, lightweight aluminum die-cast, nickel-plated threaded assembly designed for ease of use
- Compression nut provides cable retention to withstand 50-lbs. (222.4N) pull force
- Sealed O-ring, IP67 and IP69K rated, seals out moisture and dust contamination; meets SAE industry standards and harsh-environment application requirements
- Accommodates 1, 1/0, 2/0, 3/0 AWG shielded cable providing design flexibility and installed cost savings
- IP67 and IP68 immersion rated
- UV resistant
- Meets UL94V-0 flammability rating
- Operating temperature: -40° to +150°C

Reduce disruptive EMI and RFI with Woodhead® MAX-LOC® Plus shielded cord-grip assemblies, featuring a simplified installation design ideal for high-frequency switched-mode power supply (SMPS) applications. These robust assemblies allow OEM's and end-user's to connect high-power electrical cables directly to an application via an exterior mounting enclosure, simplifying the installation process for high-volume, cost-sensitive programs.

TRUKTRAK™ AND TREDTRAK™ CABLE PROTECTION SYSTEMS

RoHS Compliant Available

HUBBELL Wiring Device-Kellems

End Cap

HBLTT545Lx/HBLTT545Rx

HBLTT/HBLTRED

TrukTrak™ system is designed to protect cables and cords from heavy trucks and fork lifts in industrial environments. Available as 5-channel (**mfg. part nos. HBLTT5**) and will protect cables up to 1.25″ (31.75) in diameter. Dimension B: 20.0″. TredTrak™ system is designed to support pedestrian and light vehicle traffic in public, institutional, and commercial applications. 5-channel system will protect cable diameters up to 1.28″ (32.5). Dimension B: 17.5″. Both TrukTrak™ and TredTrak™ systems comply with 1996 NEC® requirements for installing electrical cables and cords at carnivals, amusement parks, convention centers, and similar public areas. **Suffix EC** denotes that the unit is an end cap and is sold as a set (male and female). **Suffix R** denotes unit that angles to the right. **Suffix L** denotes unit that angles to the left. All products are safety blue base with high-visibility yellow cover.

- Easy mounting swivel base
- 2-foot molded on power supply cord with straight-blade 15A plug included

Industrial Cord Reels provide a highly durable wire management solution for the manufacturing facility floor. Now available in 15 & 20 Amp with GFI protection as well as Fluorescent, Incandescent & LED hand lamp options.

TROUBLE LIGHTS

Woodhead

INDUSTRIAL DUTY FLUORESCENT HAND LAMPS

Safety Yellow® fluorescent hand lamps are ideal for task lighting applications. Offer bright, diffuse illumination from 900-3150 lumens and still remain cool to touch. On/Off switch in handle, ballast on cord, lamp type PL13/41.

COMPUTER CABLE ASSEMBLIES

SFP+ CABLE ASSEMBLIES

RoHS Compliant Available

TE connectivity

Authorized Distributor

- SFP+ active cable assemblies support data rates of 500 Mhz to 10 Gb/s
- Broadband — will work at all frequencies up to and including 8.5 Gb/s Fibre Channel and 10 Gb/s Ethernet
- Low cost solution for short reach applications (1-5 meters)
- Pull tab latch release accommodates belly-to-belly application
- Cable braid crimp and EMI skirt suppress EMI radiation
- Uses Madison Cable high speed TurboTwin copper cable
- SFF-8431 compliant

SFP+ HIGH SPEED COPPER CABLE ASSEMBLIES

SFP+ direct-attached copper cable assemblies are high-speed, cost-effective alternative to fiber optics in 10Gb Ethernet, 8Gb Fibre Channel and InfiniBand applications. Supports serial data rates up to 10Gbps. Features pull-to-release retractable pin latch, low-power consumption, and enhanced EMI suppression. Surface mount 38-position PCB paddle card connector with 30µ gold-plated contact pads and tin-plated zinc die-cast backshell. Shielded twinaxial cable with flexible PVC jacket is UL recognized, CSA certified. Choice of wire gauge and cable length. Assemblies are MSA SFF-8431 compliant for signal integrity performance.

6A22 SERIES ACTIVE OPTICAL CABLES (AOC) FOR QSFP+ APPLICATIONS

RoHS Compliant Available

3M

- 660mW power consumption
- QSFP+ / SFF 8436 Compliant
- 4 Channel x 10.3125Gbps
- Reliable 850nm VCSEL @ 10-15 BER
- Low Loss Bend Insensitive Fiber
- Serial I2C Interface
- Ruggedized Integrated Optics
- Broadest range of standard Assembly lengths

QSFP+ active optical cable assemblies provide high-speed transmission over 100 meters of multimode fiber for high-performance computing and other ultra high-throughput networking environments. QSFP+ AOC assemblies transmit four parallel channels each operating at 10 Gbps and are designed to meet SFF-8436 standards, which is compatible with Infiniband QDR and 10G Ethernet standards.

MINI SERIAL ATTACHED SCSI (miniSAS) CABLE ASSEMBLIES

RoHS Compliant Available

3M

8F36 Series 8F68 Series 8N36 Series

- Multiple lengths available
- Metal latch designed to ensure retention
- Two levels of EMLB for hot plugging

8M26 Series

8F36 SERIES miniSAS CABLE ASSEMBLIES

8F36 Series High Routability Internal miniSAS cable assemblies utilize 3M's ultra-low-profile, high speed, high signal density 3M™ Twin Axial Cable SL8800 Series. The cable assemblies are unjacketed, extremely thin and very flexible and are ideal for space-constrained systems such as along the sides of cabinets and through narrow openings between fans or heat sinks. Sharp turns are easy to navigate, it can even be folded in multiple locations with minimal loss or performance impact and will still pass SAS 2.1 performance requirements.

Mfg. Part No.	Description	Lgth. (m.)	Stock No.	Price Each 1-9	Price Each 10-24
● 8F36-AAA305-0.50	4-Lane, Backplane-to-Controller Pin-Out	0.5	25T0230	16.39	15.14
● 8F36-AAC105-0.50	4-Lane, Backplane-to-Controller Pin-Out, No Sidebands	0.5	25T0231	15.57	14.38

8F68 SERIES miniSAS CABLE ASSEMBLIES

8F68 Series High Routability Internal miniSAS cable assemblies utilize 3M's ultra-low-profile, high speed, high signal density 3M™ Twin Axial Cable SL8800 Series to create a flexible, foldable, high-performance solution. The 8F68 series miniSAS cable assembly supports SAS 1.0, 2.0 and 2.1 applications while exceeding SAS 2.1 requirements up to 1 meter. The 8F68 Series cable assembly supports 8 channels (8x) vs. the 8F36 series which support 4 channels (4x). The cable construction is thin and lower profile than other similar AWG twin axial cables. This allows for dense routing and flexible routing options within a chassis. Further, the 3M Twin Axial cable used is foldable and allows for extremely tight bend radii.

Mfg. Part No.	Description	Lgth. (m.)	Stock No.	Price Each 1-9	Price Each 10-24

8M26 SERIES miniSAS CABLE ASSEMBLIES

8M26 Series miniSAS cable assemblies are capable of 6 Gbps per channel data rate. Features zinc diecast backshells with blue nylon pulltabs for easier unmating. 26 conductor signal cables feature solid tin plated solid conductors and drain wire with a foam polyethylene dielectric, Mylar shielding, and a Non-PVC jacket material. Multiple key options available, tested to SAS Specification, SAS-2. Current rating: Per Contact: 0.5 A, Insulation resistance: 103 MΩ minimum, Withstanding voltage: 300 VDC min. for 1 minute, Operating temperature: -20°C to +75°C.

Mfg. Part No.	Length (m.)	Stock No.	Price Each 1-9	Price Each 10-24

8N36 SERIES miniSAS CABLE ASSEMBLIES

8N36 Series miniSAS cable assemblies are capable of 3 Gbps per channel data rate. Features black high temperature thermoplastic backshells rated UL 94V-0. 36 Conductor signal cables feature 30 AWG twin axial cable with solid tin plated solid conductors and drain wire with a foam polyethylene dielectric, Mylar shielding, and a Non-PVC jacket material with a nylon braid. Current rating: Per Contact: 0.5 A, Insulation resistance: 103 MΩ minimum, Withstanding voltage: 300 VDC min. for 1 minute, Operating temperature: -20°C to +80°C.

3M™ HIGH ROUTABILITY INTERNAL SATA 3.0 COMPATIBLE CABLE ASSEMBLIES

RoHS Compliant Available

3M

- Supports SATA 1.0/2.0/3.0 Applications
- Exceeds SATA 3.0 requirement up to 1 meter
- Internal cable construction is thin and lower profile than other similar AWG twin axial cables
- Allows for dense routing and flexible routing options within a chassis
- Foldable - Allows for extremely tight bend radii
- Minimal performance impact of folding, and enables unique packaging configurations
- Saves time and cost during assembly

SATA CABLE ASSEMBLIES

RoHS Compliant Available

L-com Global Connectivity

Straight / Straight — Straight / Right Angle — Latching Straight / Straight

- Meets SATA application requirements
- Latching versions used to provide secure latching Serial ATA connections
- Tight pitch 7 position connectors save space compared to larger parallel ATA connectors
- Supports transfer rates of up to 3Gbps depending on the peripherals used
- Straight connectors for standard plug in

Latching Straight / Right Angle

SATA CABLE ASSEMBLIES

Serial ATA cables are replacing wide Parallel ATA ribbon cables in many applications. The Serial ATA cable is smaller, more flexible, and therefore easier to route inside a chassis. With the trend toward miniaturization, these characteristics are beneficial in many product designs. The cables feature two shielded 26 AWG pairs in a PVC jacket, gold plated contacts, and two straight polarized seven position connectors.

Mfg. Part No.	Length (m)	Description	Stock No.	Price Each 1-9	Price Each 10-24
CASATA-05M	0.5	Straight / Straight	89M7560	5.33	4.83

PCIe EXTENDER ASSEMBLIES

RoHS Compliant Available

3M

Features

- PCIe 2.0 and 3.0
- X4, x8 and x16
- Extender and jumper
- High bandwidth
- Flexible replacement for rigid riser cards
- Up to 8 Gbps and beyond
- Highly-routable, foldable, flexible

The **PCI Express Extender Assemblies and PCI Express Jumper Assemblies for PCI Express 2.0 and 3.0** provide the latest in high-speed solutions to meet demanding system performance and packaging challenges. These assemblies are one-to-one direct extenders, including power and low-speed signals that are part of the PCI Express specification. The assembly plugs into a PCIe card slot and provides another slot at the opposite end. The assemblies can be folded to provide unique and specific geometries, maximizing the use of space and reducing obstruction to airflow. These mechanical benefits are provided along with the extremely low loss and excellent signal integrity benefits of the award winning 3M™ High-Routability Twin Axial Cable. If your applications uses a mother board that needs to link to another PCB via PCIe, and that PCB has PCIe connectors instead of edge fingers, then the PCIe Jumper Assemblies may fit your need. The jumper assemblies provide all of the speed and flexibility of the original 3M Extender Assemblies, but for card-to-card applications.

0.80 mm DIGITAL CAMERA CABLE, POWER OVER CAMERALINK COMPATIBLE

RoHS Compliant Available

3M

1MD26-X560-00C-X00 — 1SD26-3120-00C-X00

- Carries power in addition to signal to enable use in base configuration Power over Camera Link® (PoCL) applications
- Connects to I/O ports on both PoCL camera and PoCL framegrabber
- Both straight and right angle cable exit available
- 3 shielded quads and 6 unshielded twisted pairs
- Entire cable bundle shielded with foil and braid for additional signal protection
- Rugged ribbon type contact for reliable, repeatable connectivity
- Thumbscrew retention
- EMI shielded end-to-end for reduced emissions

Base configuration PoCL Cables mate to industry standard SDR 26 position PoCL camera connections, and enable machine vision cameras to be powered through the data cable, rather than via a separate power cable. This in turn allows smaller camera designs, as an onboard power supply is no longer required, and also allows the elimination of a separate power cable.

COMPUTER CABLE ASSEMBLIES

MINI DELTA RIBBON (MDR) CAMERA LINK CABLE ASSEMBLY

RoHS Compliant Available

3M

- Support new Industrial CAMERA LINK STANDARD for camera to frame grabber communications
- High Speed Digital Data Transmission System
- Voltage Rating: 30V
- Current Rating: 1A
- Conductor Size: 28 AWG Stranded
- Withstanding Voltage: 350 Vrms for 1 minute
- Wiping Area: 30 micro" [0.76 um] Min. Gold
- Temperature Rating: -20°C to +75°C
- Capable of mating with all 3M MDR boardmount receptacles

Insulation resistance 1 x 10^8 ohms at 100 Vdc. Individually shielded twisted pairs. Characteristic impedance 100±10 ohms. Color: parchment/beige. Overmold option: polyvinyl chloride. Rugged MDR ribbon type contact. Rugged thumbscrew retention.

L-COM Global Connectivity

Premium Deluxe Economy

- All lines wired straight through for extending serial devices
- Gold plated contacts provide reliable connections with repeated mating cycles
- Hex nuts on female connectors are removable to expose 4-40 thumbscrews.
- Color: Light Gray

PREMIUM MOLDED D-SUBMINIATURE CABLE ASSEMBLIES

The CS2N Series of D-Sub cable assemblies is L-com's top of the line D-Sub cabling offering. These cable assemblies utilize 26 AWG stranded conductors with double shielding (copper braid plus aluminum mylar foil) and a flexible PVC jacket. Ideal for any electrically noisy environment where fans, motors or switches are nearby. Backshells are fully molded and have a unique stamped steel internal enclosure that provides the ultimate in shielding performance. Mounting is done via rugged 4-40 thumbscrews that are easy to grip without the need for a screwdriver.

DELUXE MOLDED D-SUBMINIATURE CABLE ASSEMBLIES

The **CSMNB Series** of black D-sub cable assemblies offers solid performance at economical prices. These assemblies are fully shielded throughout the entire cable to prevent against data corrupting EMI/RFI. Molded backshells provide superior strain relief while robust 26 AWG conductors are wired straight through for ease of compatibility. Metal thumbscrews insure fast and easy connections. Standard lengths range from 2.5 ft to 50 ft and custom lengths and pinouts are available with modest minimum requirements.

Waterproof A Plug to Standard B Plug

Waterproof Panel Mount A Receptacle to Standard A Plug

Waterproof Panel Mount B Receptacle to Standard A Plug

- Waterproof USB connectors to standard USB connectors, revision 2.0 compliant
- Threaded couplings and O-ring seals provide IP67 rating insuring protection against water and dust
- 30 micro inch gold contact plating provides reliable connections with repeated mating cycles.
- Rugged molded backshells insure durability

These waterproof cables can prevent costly repairs sometimes necessary when contaminants such as water and dust destroy standard USB connectors. Featuring a waterproof USB connector and a standard USB connector, these hard-to-find cables are IP67 rated.

USB A PANEL MOUNT RECEPTACLE TO USB A PLUG CABLE ASSEMBLIES

These USB 2.0 panel mount cables are perfect for use inside a box or enclosure. The USB Type A female side is flange-style panel mountable with an alternative, smaller body compared to the popular ECF504 series. This makes it a nice fit in applications with limited space. The molded panel mountable USB construction is rugged and robust, using 20 AWG power conductors and a 28 AWG twisted pair all under a double shield for maximum EMI resistance. Each assembly includes two 4-40 x 3/8″ Philips pan head mounting screws.

HIGH-DEFINITION HDMI CABLE ASSEMBLIES

RoHS Compliant Available

BELDEN
SENDING ALL THE RIGHT SIGNALS

- Superior, uncompressed digital video and audio quality for home theater multimedia set-ups
- Supports standard, enhanced, or high-definition video and multi-channel digital audio
- Performance-tested to the highest resolution format — 1080 lines
- UL recognized for residential and commercial installations, including in-wall use

These HDMI cable assemblies deliver a reliable high-definition multimedia interface between any compatible digital audio/video source and a compatible digital audio and/or video monitor. Constructed of 26 AWG shielded twisted pair HDMI cable with black PVC jacket and strain-relief boot overmolded on 19-pin male connector at each end. Applications include connecting HDMI sources like broadband/cable set-top boxes, digital video recorders, DVD players, HD-DVD and Blu-ray players to displays like plasma screens, digital light projection (DLP) projectors, liquid-crystal displays (LCDs) and liquid crystal on silicon (LCOS) or digital image light amplification (D-ILA) devices, among others. All cable assemblies are 1080p (Category 2, version 1.3b) compliant except **mfg. part no. HD2007 010B5** which is 1080i (Category 1, version 1.3b) compliant.

HIGH PERFORMANCE TEST CABLE ASSEMBLIES

NEW

RoHS Compliant Available

EMERSON. Network Power

Semflex Connectivity Solutions

Features:
- Precision stainless steel connectors
- Low loss PTFE tape Dielectric
- Triple shielded for >-90dB leakage at 18GHz
- Impedance: 50Ω

Applications:
- Test Equipment
- High temperature (+200° C)
- Low temperature(-65°C)

Emerson Network Power Connectivity Solutions offers the Semflex DKT test cable assembly series. This line incorporates high performance cable with equally high performance connectors with good performance up to 26GHz. These assemblies feature low loss triple shielded cable with a standard FEP Teflon® or optional stainless steel inter-linked armor tubing. The triple shielded construction of these cables give outstanding shielding effectiveness of greater than -90dB at 18GHz. These assemblies use precision stainless steel connectors with molded strain relief boots and are designed to meet both MIL-C-39012 and MIL-STD-348a. These cables feature low loss and good VSWR.

Amphenol Connex

Amphenol Connex AMC Between Series Cable Assemblies utilize Amphenol Microcoaxial style connectors on miniature cable types. Due to their small size, AMC assemblies are perfect for applications where space is limited. AMC cable assemblies have a 50 ohm impedance; with a frequency range of DC up to 6 GHz. These assemblies feature a snap on interface and assembly length is dimensioned in millimeters. Standard lengths are 50, 100, 150, 200, 250, and 300 millimeters, custom lengths may also be available. Heat shrink representation may vary.

L-com Global Connectivity

- 50 Ohm RF (Radio Frequency) transmission
- Gold plated contacts reduce insertion loss
- RG58C/U stranded center conductor enhances flexibility
- Crimp style attachment and molded strain relief result in a highly durable assembly

L-com's coaxial cable assemblies feature molded strain reliefs for maximum durability. In addition L-com's BNC connectors feature gold plated center contacts for minimal attenuation and nickel plated bodies for enhanced corrosion resistance.

HIGH RELIABILITY HARSH ENVIRONMENT SHIELDED CAT 5e ETHERNET CABLE AND CORDSETS

RoHS Compliant Available

Amphenol Pcd

High-reliability Cat 5e Ethernet cordsets with RJ45 plug overmolded on each end. Constructed of a 4 pair, 24 AWG, 100 ohm SFTP round patch cable, designed to ISO/IEC 11801 Category 5e requirements. Cable contains 4 twisted pairs, tinned copper conductors, aluminum Mylar inner and tinner copper braid outer sheilds with Kevlar reinforcement strands. Jacketed in black UV-resistant polyurethane that is halogen-free, flame-retardant and highly flexable. Outer diameter: 0.28" (7.1mm) nom. Voltage rating: 230VMS. Impedance: 100+/-15 ohms, 1-100MHz. Temperature: -25°C to +70°C. For cable without RJ45 plug ends-bulk reels, please use Tyco RJ45 plug **5-569532-2**; *ordered separately online or call.*

L-com Global Connectivity

Blue Black White

Designed for today's high-density patch panels, these unique Category 5e molded patch cables feature an easy to depress "shark fin" snagless molded boot that makes connecting your cables easier. The clear boot also allows the color of each cable to be easily identified up to each port for easy cable identification. Each cable is tested for Category 5e performance to ensure you get maximum speed out of your network.

CATEGORY 5e DOUBLE SHIELDED PATCH CORDS

RoHS Compliant Available

L-com Global Connectivity

- Category 5E Double Shielded RJ45 LSZH Patch Cables for Industrial Environments
- Foil plus Braid Shielding for maximum EMI/RFI protection
- 24 AWG Solid conductors for termination to IDC blocks where required
- Exceeds EIA568 Category 5E requirements for high speed networks

For maximum protection against EMI/RFI interference, L-com's Double Shielded Patch cables are the right choice. With two layers of shielding (Foil plus Braid), data is protected from stray EMI/RFI fields. This series features 24AWG solid conductors allowing easy termination to IDC connectors. The rugged LSZH jacket is extra durable for harsh industrial environments.

TX5e™ CATEGORY 5e PATCH CORDS

RoHS Compliant Available

PANDUIT®

These 8-conductor modular plug-to-modular plug patch cords exceed TIA/EIA-568-B.2 Category 5e and ISO11801 Class D standards and FCC Part 68 and IEC 60603-7 specifications. Constructed of Cat. 5e, 24 AWG UTP stranded cable and a Pan-Plug® modular plug on each end for superior performance. Plug contacts are plated with 50 microinches of gold for improved durability. Features patented tangle-free latch to prevent snags and provide easy release, saving time on frequent moves, adds and changes. Choice of a variety of lengths and colors to meet individual requirements. Additional lengths and colors available; *go online or call.*

CAT. 5/5E/6 CABLE ASSEMBLIES

CATEGORY 6 PATCH CORDS

RoHS Compliant Available

multicomp

- Booted (snagless) and non-booted versions — in 8 lengths and 5 popular colors
- 8-position RJ-45 module plug at each end — 50µ" gold-plated copper alloy contacts
- Category 6 component-rated, high-performance patch cable — 4 unshielded twisted pairs (UTP), 24 AWG, PVC jacket
- Cable speeds up to 550MHz
- Verified to EIA/TIA-568-B.2-1

Fig.1 Snagless Booted

Fig. 2 Non-Booted

SNAGLESS, BOOTED CATEGORY 6 PATCH CORDS — FIG. 1
Features snagless boots to prevent cable kinks and bent pins when removing from patch panels.

HA-VIS SMART PATCH CABLES - IP20 CATEGORY 6

RoHS Compliant Available

HARTING

Smart Patch Cable

Smart Patch Cable Detector

- Easy and fast illuminated detection of patch cables
- Capable for Multiport applications
- Transmission performance in accordance with Cat. 6 ISO/IEC 11 801

- Compact and space saving plug by dual boot design
- Good shielding against EMC influence
- Flame retardant and halogen-free

This RJ45 patch cable comes with illuminated RJ45 Ethernet plugs. The plugs are easy to identify from each other over distances up to 100 meters. Each RJ45 connector has an integrated LED which is illuminated by the detector even of the connectors are not plugged in and has no influence on data transmissions.

CAT 6

CAT 6A

These 4 pairs, 26 AWG, 100 Ohm SFTP round patch cables are designed to the ISO / IEC 11801 Category 6 and 6A requirements. The cable contains 4 twisted pairs individually shielded, cabled, double shielded with kevlar reinforcement strands, jacketed in black UV resistant Polyurethane HFFR. Designed for fixed or portable applications in harsh environments. Cable also available separately; see below.

DATATUFF IP20 RJ45 INDUSTRIAL ETHERNET CORD SETS

RoHS Compliant Available

BELDEN SENDING ALL THE RIGHT SIGNALS

NEW

- UL 1863 Listed communication circuit accessory
- UL 1277 Listed, Type TC 600V cable
- UL 444 CMR/CMX outdoor
- Foil and braid shield for excellent EMI/RFI noise immunity
- Bonded-Pair technology for robust electrical performance
- Oil Res II and sunlight-resistant TPE Jacket
- C(UL) CMG, IEEE 1202 & FT4 flame rating
- MSHA mining approved
- UL 1581 -40°C cold bend
- UL rated to 90°C
- RoHS compliant, CE approved

Belden's **DataTuff** TC cord sets with TC Listed industrial Ethernet cable* address a long-standing challenge—the ability to easily route industrial Ethernet cables in the most demanding heavy-industrial environments using existing 600V cable trays. In addition, the new cord sets are shielded to provide maximum performance in high-noise areas.

INSTRUMENTATION CABLE ASSEMBLIES • INDUSTRIAL CORD SETS

IEEE-488 GPIB CABLE ASSEMBLIES

RoHS Compliant Available

L-com Global Connectivity

- Cable meets IEEE-488 standards for connecting peripherals where EMI is an issue
- 30 microinch gold contact plating provides reliable connections with repeated mating cycles
- Custom stamped steel internal enclosure provides 100% shielding and a robust strain relief
- Molded backshells provide durability and increased strength at cable entry point

L-com IEEE-488 cable assemblies use double shielded cable that is adequate for many applications. Featuring all-molded connector ends which contribute to a long life expectancy and are impervious to breakage at the point where the cable enters the connector housing. A unique stamped steel internal enclosure provides 100% shielding and a robust strain relief. The CMB Cable Series meets all standards of the IEEE-488 interface, conforms with normal mounting procedures and is directly compatible with HP, AMP, and Amphenol.

SINGLE KEYWAY MICRO-CHANGE® MOLDED AND ATTACHABLE CONNECTORS

UL CSA RoHS Compliant Available Brad®

Straight Male Receptacle

Straight Female Receptacle

Single-Ended Cordsets

Field Attachable

- Current Rating, 4A
- Designed for 12mm and 18mm sensor applications
- Field attachable
- IP68; NEMA 6 watertight rating

Used with 12 and 18mm tubular proximity sensors, tubular photoelectric sensors, and modular controls. Mechanically-keyed mating parts eliminate mismating. Diameter, 0.57″ and length, 1.84″. Rated 4A, 300V. Oil-resistant, PVC jacketed cable. UL listed, CSA certified. Meets NEMA enclosure Type 6 and IEC enclosure IP68.

ATTACHABLE CONNECTORS

Route cable through tight places where molded-on connectors won't fit. Replace damaged molded connectors quickly. Micro Change® enables quick-disconnect wiring on specialty cable and pre-wired control system devices. Current rating: 4A. Meets IEC enclosure IP68 classification. Field wireable with a screwdriver.

MICROBOSS™ CABLE ASSEMBLIES

Amphenol SINE SYSTEMS

Male Receptacle to Pigtails

Single Ended Male Cordset

Single Ended Female Cordset

Double Ended Cordset

Amphenol Sine Systems factory automation solutions offers cable assemblies for use in all robotic and material handling systems, such as: conveyors, sorting, automated storage and retrieval, packaging, overhead transport, palletizing and any other options imaginable. The microBOSS™ M12 system is offered in 3, 4, and 5 pin configurations that deliver signal to a wide variety of devices, utilizing both UL AWM-style 2661 and CSA AWM I/II A/B cable. Characteristics: 22AWG, 4A, 300V.

Molded Straight Male

Field Attachable Straight Female

- 4 AMPS at 60VAC/75VDC
- Standard M8 sensor connector
- Connector dimensions (inches): Molded Straight Male .39D x 1.46L, Field Attachable Straight Female .457D x 1.772

Connector Face Views

Smallest family of multipin connectors designed for fast, error-free wiring in all types of industrial settings. Threaded couplings meet NEMA 6 & IP67 ratings for water resistance. Cordsets are 12' long and have a molded connector on one end and stripped wire leads on the other. Receptacles mount in a ½" knockout and have 12" stripped wire leads. Field attachable connectors have solder terminals and are used to repair cordsets in the field. 90° versions are available; *go online or call.*

MINI-CHANGE® MOLDED CONNECTORS

RoHS Compliant Available

Brad

- Current rating, 8A-13A
- Connector size (inches): Straight Female Plug .56D x 4.46L, 90° Female Plug .56D x 3.53L x 1.56W, Straight Male Plug .70D x 4.50L and 90° Male Plug .70D x 3.53L x 1.60W
- For 12mm and 18mm proximity sensors

Used with: 18mm and 30mm tubular proximity sensors, limit switches, rectangular proximity and photoelectric sensors, and solenoids. Applications include: sensors on conveyors, hydraulic valves, packing equipment, and material handling equipment. Quad-Beam® contact maintains constant pressure on the male pin to ensure optimum conductivity. High-performance, long-lasting gold over palladium-nickel plating on contact. An epoxy-coated coupling nut provides up to 500 hours of corrosion resistance and an anti-vibration guard. Plugs are straight or 90° and can be lighted. Rated 7-13A, 600V. Rated NEMA 6P. UL recognized, CSA certified.

MINIBOSS™ CABLE ASSEMBLIES

Amphenol SINESYSTEMS

Male Receptacle to Pigtails

Female Receptacle to Pigtails

Single Ended Male Cordset

Single Ended Female Cordset

Double Ended Cordset

Amphenol Sine Systems factory automation solutions offers cable assemblies for use in all robotic and material handling systems, such as: conveyors, sorting, automated storage and retrieval, packaging, overhead transport, palletizing and any other options imaginable. The miniBOSS™ system is offered in 2, 3, 4, 5 and 6 position configurations. This system allows for cost-effective power and signal distribution, utilizing UL STOOW/CSA Type ST cable, as well as High Flex TPE jacketed UL Listed TC-ER cable. Characteristics: 16AWG, 600V, up to 13A.

DUAL KEYWAY MICRO-CHANGE® MOLDED CONNECTORS

RoHS Compliant Available

Brad

Male & Female Connectors

Male

Female

- Current Rating, 4A
- Designed for 12mm and 18mm sensor applications
- IP68; NEMA 6P water-tight rating

Used with 12 and 18mm tubular proximity sensors, tubular photoelectric sensors, and modular controls. Mechanically-keyed mating parts eliminate mismating. Diameter, 0.57″ and length, 1.84″. Rated 4A, 300V. Oil-resistant, PVC jacketed cable. UL listed, CSA certified. Meets NEMA enclosure Type 6 and IEC enclosure IP68.

XS2 & XS3 ROUND CABLE ASSEMBLIES WITH STAINLESS STEEL NUTS

RoHS Compliant Available

OMRON. ELECTRONIC COMPONENTS

XS2F SERIES FEATURES:
- M12 Connector
- Degree of protection: IP69K
- Specifications: 3 A, 125 VDC
- Fire-retardant Robot: -25°C to 70°C, Heat Resistant: -25° to +105°C
- 6mm Outer Diameter, 20AWG

XS3F SERIES FEATURES:
- M8 Connector
- Degree of protection: IP67 (IEC529)
- Specifications: 1 A, 125 VDC, -25°C to 70°C
- 4mm Outer Diameter

SEOPRENE® PORTABLE OUTDOOR FLEXIBLE POWER CABLE

RoHS Compliant Available

CCI Coleman Cable Inc.

Seoprene®

- Types SEOOW and SJEOOW portable cord
- Lightweight — easy -to-handle
- Excellent flexibility and toughness
- Abrasion-, ozone-, sunlight-, chemical- and oil-resistance
- Water-resistant with high-dielectric insulation — approved for submersion in water
- Flame-resistance — MSHA approved for mining applications
- Recyclable
- UL listed, CSA certified

Flexible and tough Seoprene® thermoplastic elastomer jacket. Water- and mold-resistant non-wicking, lightweight polypropylene fillers. Stranded bare copper conductors are color coded for easy identification. Meets Federal and Military specifications JC-580B. Temperature range: -50° to 105°C. Jacket color: black. **Sold in 250 ft. spools.** 500 ft. and 1000 ft. spools also available; *go online or call.*

POWER CORDS

POLAR/SOLAR PLUS® OUTDOOR EXTENSION CORDS

RoHS Compliant Available

CCI Coleman Cable Inc.

OSHA

- Lightweight and flexible to -67°F
- Lighted end shows power is on
- Oil-, chemical- and abrasion-resistant
- Meets OSHA standards for outdoor use
- UL listed, CSA certified
- Made in the U.S.A.

Polar/Solar Plus® outdoor extension cords feature clear PVC NEMA 5-15P plug and neon power indicator light in the clear NEMA 5-15R female receptacle lights when power is on. 3-conductor, type SJEOW cord rated hard usage per National Electrical Code. Its rugged T*Prene insulation provides superior resistance to abrasion, ozone, oil, grease and chemicals. Plus, the TPE outer jacket is flame retardant and water resistant. Temperature rating: -55° to +90°C.

Use in conjunction with **mfg. part nos. 2160** and **2161** AC power plug assemblies, *ordered separately online or call*, to help prevent accidental removal of the power cord from screw mount IEC-C14 power inlet or IEC-C13 power outlet. Stainless steel clip comes with 2 each: threaded post, threaded nut, and washer.

V-LOCK POWER CORDS, INLETS AND DISTRIBUTION UNIT (CONT.)

- Innovative lock-release button secures positive-locking connector to mating inlet for a reliable connection
- Rated: 10A, 250V, 50/60 Hz
- NEMA5-15P, IEC-320-C13, -C14 and -C-19

V-Lock positive-locking power products include power cords, mating power inlets and a power distribution unit all suitable for networking and computer servers, lighting and entertainment equipment, switch and router applications. Color: black. UL listed, CSA certified, VDE approved, BSI approved. Order AC Inlets separately below.

IEC 60320-C20 Inlet (Screw)

V-LOCK POWER CORD AND INLET KITS

V-Lock kits include: one V-Lock power cord (selected from table below) and one **mfg. part no. IN-VAC14KS-001** V-Lock screw-in power inlet.

BRILLIANCE® CMR RATED AUDIO SNAKE CABLE

RoHS Compliant Available

BELDEN — SENDING ALL THE RIGHT SIGNALS

Brilliance®

1814R

Brilliance® snake cable specially designed for the broadcast industry and used to connect multiple audio channels in low-level (microphone) and high-level (line) componentry. Typical applications include console board equipment for recording studios, radio and TV stations, post-production facilities and sound system installations. Pairs are individually shielded and jacketed. Jacketed pairs are individually numbered and color coded. Tinned-copper, polyolefin insulated pairs, color-coded red and black. Each pair individually shielded with bonded Beldfoil® aluminum-polyester shield. Overall black PVC jacket with nylon ripcord. Nominal capacitance: 31pF/ft. Nominal impedance: 50Ω. **Sold in 500′ and 1000′ spools.**

BRILLIANCE® FLEXNAKE™ AUDIO SNAKE CABLE

RoHS Compliant Available

BELDEN — SENDING ALL THE RIGHT SIGNALS

1902A

Brilliance®

1904A

New super-flexible multiple-pair audio snake cable has a long flex life and exhibits an extremely low level of microphone triboelectric noise. Features exclusive "French Braid Double Shield" (U.S. Patent Number 5,303,630), for unsurpassed flexibility and excellent EMI/RFI shielding capabilities. Ultra-flexibile FlexNake™ cable lays absolutely flat with no kinking. Bare copper, polyolefin insulated twisted pairs, color coded red and black. Each pair individually shielded with bare- copper double-serve "French Braid". Individual pairs with numbered and color coded PVC jackets. Overall black PVC jacket. Nominal impedance: 60Ω. Nominal capacitance: 26.0pF/ft.

8412

8427

8422

1804A

Designed for flexibility, service and reliable signal transmission at audio frequencies. Shielded multiconductor cable is used in low impedance applications. Rubber jacketed cable is recommended for abrasion and impact resistance offering extra limpness so cable lies flat. Hypalon® jacketed cable are recommended for outside use, cold weather applications. Sun-, oil-, and-ozone resistant. PVC jacketed cable is recommended for lower capacitance, lower loss, and is lighter weight, smaller in diameter and ozone- and oil-resistant. **Mfg. part nos. 8408, 8412, 8418, 8424-27** tinned copper conductors, rubber insulated, rayon and tinned copper braid shields. **Sold in spool sizes indicated in table below.** 1000′ spools are also available; *go online or call.*

AlphaWire — Cables you trust. Service you deserve.

HIGH-PERFORMANCE, SYMMETRICAL DESIGN FLEX MOTOR SUPPLY CABLE

Features:
- Reduced cable cost
- Small outer diameter
- Supra-Shield® superior shielding
- Flexibility and ease of handling over conventional motor cable
- Round geometrical shape to facilitate environmental seal
- Jacket durability
- Oil, abrasion and sunlight resistance
- Suitable for direct burial

Specifications:
- Bend Radius 10X Static, 15X Dynamic
- UL Standard 1277, Type TC-ER, 90°C, 600 Volt
- UL Exposed Run (-ER)
- UL Standard 1063, Type MTW, 90°C, 600 Volt
- UL Direct Burial
- UL Sunlight Resistant
- UL 1581 Vertical Tray Flame Test
- UL WTTC
- CSA AWM I A/B II A/B FT 4
- CSA FT4 Flame Test
- Oil res I
- UL listed, CSA certified, CE compliant

Applications:
- Servo Motor, AC Drives
- Variable Frequency Drive
- Medical, Robotic,
- Packaging, Conveying
- Machine Tool, Welding
- Fluid Movement, Waste Water
- UL compliant to NEC Article 336.10 (7) for exposed runs exiting the cable tray
- Suitable for use in Class 1, Division 2 locations per NEC Article 501

High-performance, symmetrical design flex motor supply cable features four finely stranded bare copper conductors, PVC/nylon insulation, and specially-formulated, oil-resistant black PVC jacket. Aluminum/polyester/aluminum shield plus overall tinned copper braid (70% coverage) and four symmetrical stranded tinned copper drain wires. Voltage rating: 600V UL Type TC-ER, MTW. Operating temperature: -5°C to 90°C (flexing), -20°C to 90°C (stationary). This flexible motor supply cable complements Series V high-performance variable frequency drive (VFD) cable; *order separately*. FIT®-321 and FIT®-600 heat-shrink tubing is recommended; *order separately on* [6506], and [6405] .

AlphaWire — Cables you trust. Service you deserve.

SERIES V HIGH-PERFORMANCE, LARGE AWG VARIABLE FREQUENCY DRIVE (VFD) CABLE

Features:
- Three stranded tinned-copper conductors
- Dual spiral copper tape shield
- Stranded bare copper ground wires
- Specially-formulated, cross-linked polyethylene (XLPE) insulation
- Oil- and corona-resistance
- Low capacitance for improved signal transmission
- Voltage rating: 600V/1000V
- Operating temperature range: -40°C to 90°C
- Suitable for direct burial

Applications:
- UL Exposed Run (-ER) compliant to NEC section 336.10 (7)
- Multi-axis control systems
- Automotive assembly equipment
- Robotics
- Machine tools
- Stationary track/tray
- Conveyor systems
- Factory equipment interconnects

Specifications:
- UL Standard 1277, Type TC-ER, 90°C, 600V
- UL Exposed Run (-ER)
- UL Direct Burial
- UL Sunlight Resistant
- UL Type XHHW-2
- UL 1000V Flexible Motor Supply Cable
- UL 1581 and CSA FT-4 Vertical Tray
- CSA AWM I/II A/B XHHW-2 Singles
- IEEE 1202/383 Vertical Tray
- CE-LVD: 73/68/EEC Amend. 93/68/EEC
- MSHA

Series V symmetrical design, 3-conductor variable frequency drive (VFD) cable, in large AWG conductor sizes, is ideal for interconnection of VFD systems and motors for extended duty-cycle performance requirements. Feature bare copper ground wires placed in the interstices of the conductors, resulting in uniform conductor-to-ground capacitance and impedance. This unique arrangement minimizes the probability of motor damage from common mode current flow. Plus the dual layer copper tape shield provides 100% shielding with low shield impedance. Suitable in Class I and II: Division 2 hazardous locations where the round outer jacket provides a good seal with glands and grommets where IP67 requirements must be met. Color: black. **Priced per foot minimum order 100′.**

AlphaWire — Cables you trust. Service you deserve.

SERIES SF FLEXIBLE SERVO CABLE

- Two configuratuions: Power or Composite for power and control
- High flexibility — 10x bend radius
- UL sunlight resistant
- UL oil resistant I/II
- Suitable for use in Class I, Div. 2 locations per Article 501 of NEC
- UL listed, CSA certified

Series SF flexible servo cable provides the same high performance as Series S cable, but offers enchanced flexibility in flexing applications that require continuous movement. Features tinned copper conductors, PVC/nylon insulation, aluminum/polyester foil shield with tinned copper braid, and an orangeTPE (thermoplastic elastomer) outer jacket. Operating temperature range: -25°C to +90°C (static), -5°C to +90°C (dynamic). Rated UL TC-ER (600V), UL WTTC (1000V), CSA AWM I/II A/B FT4. **Sold in 100′ spools.**

DEVICENET™ INDUSTRIAL AUTOMATION SHIELDED PAIRED CABLE

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

- Fully compliant with ODVA thick and thin specifications
- Allows use of device level diagnostics
- Reduced installation costs compared with traditional "home run" wiring practices
- Complies with Allen-Bradley part nos. 1485 CPI-A and 1485 CPI-C
- High data rates: supports 500kbps @ 100m and 125kbps @ 500m
- Superior quality to improve system reliability
- UL listed

6452

DeviceNet™ thick or thin cable provides reliability and performance with the integration of power and data functionality in a single rugged cable that meets ODVA specifications. Features stranded tinned copper power and data conductors, individual foil shield plus 65% tinned copper braid overall, power conductor is PVC insulated, data conductor is FPE insulated, and slate sunlight- and oil-resistant PVC jacket. Operating temperature: 0°C to 80°C (static), -20°C to +75°C (dynamic). Rated: 300V Class 2. **Sold in spools sizes indicated in table below.**

FIELDBUS AND PROFIBUS INDUSTRIAL AUTOMATION SHIELDED PAIRED CABLE

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

6461

6463

- Suitable for use in Class 1 Division 2 locations per NEC Article 502
- Complies with IEC 61158 standard
- Superior quality to improve system reliability
- UL listed, CSA certified

Fieldbus and PROFIBUS industrial automation cable meet the ruggedness, performance and quality requirements of Type A, Type B and High Speed Fieldbus and PROFIBUS DP application environments. **Sold in spools sizes indicated in table below.**

FIELDBUS
Fieldbus cable features stranded tinned copper conductors, foil shield, and orange sunlight-resistant PVC jacket. Types A and B have polyolefin insulation and High-Speed has foam high-density polyethylene (HDPE) insulation. Operating temperature: -30°C to +105°C except for **mfg. part no. 6461** which is -40°C to +75°C. Industry approvals: UL:PLTC, CM, ITC; CSA: CM.

INDUSTRIAL TWINAX SHIELDED CABLE

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

- Foil/braid shield for maximum signal integrity and run length
- Excellent electrical characteristics
- May be installed in the same tray or conduit as 600V power cable
- Suitable for use with Allen-Bradley Data Highway networks
- Superior quality to improve system reliability
- UL listed

Industrial twinax cable provides a robust physical media for the transmission of PLC/DCS signals that meet the needs of real-time, high-throughput industrial applications. Features 18 AWG 7x26 stranded tinned copper conductors, foil shield plus 55% tinned copper braid shield, and blue UL sunlight-resistant PVC jacket. Nominal impedance: 78Ω. Rated: 600V. Operating temperature: -40°C to +75°C. Industry approvals: UL: TC PLTC CMG, ITC; CSA: CMG FT4. **Sold in spools sizes indicated in table below.**

RS-485 INDUSTRIAL AUTOMATION SHIELDED PAIRED CABLE

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

- UL type PLTC and CM listed
- Sunlight- and oil-resistant
- Suitable for use in Class 1 Division 2 locations per NEC Article 501
- Superior quality to improve system reliability
- UL listed

6457

Alpha Wire RS-485 cable brings proven data transmission protocol to the factory floor in a rugged design. Reduces electrical noise sensitivity to keep reliability and performance at world-class levels. Features 22 AWG 7x30 stranded tinned copper conductors, foil shield plus 65% tinned copper braid shield, foam high-density polyethylene (HDPE) insulation and black UL sunlight-resistant and oil-resistant PVC jacket. Voltage rating: 300V. Operating temperature: -20°C to 60°C. Industry approvals: UL: CM PLTC; CSA: CM FT1. **Sold in spools sizes indicated in table below.**

10GX CATEGORY 6A TWISTED PAIRED LAN CABLE

RoHS Compliant Available

BELDEN SENDING ALL THE RIGHT SIGNALS

- Available in riser and plenum versions
- Choice of bonded- and nonbonded-pair construction
- RoundFleX H-web design separates pairs and maintains stability, improving ANEXT, NEXT and impedance performance
- Small 0.295″ diameter minimized for compactness of installations
- Guaranteed electrical performance that goes well beyond Category 6A
- Strong signal strength due to improved noise attenuation
- Maximized bandwidth and signal-to-noise margin for mission-critical applications
- Reduced Alien Crosstalk and less susceptibility to noise due to improved balance/symmetry on Bonded-Pair products
- Truly backward compatible with Cat 6 and Cat 5e components
- Matching tip and ring color code for ease of installation

10GX® paired cable is designed to meet the needs of demanding networking arenas that require both high-density connections and superb mechanical and electrical performance. Ideal for use in horizontal cable installations in data centers, high-speed Local Area Networks (LANs), server farms, storage area networks (SANs), network access nodes (NANs), campus backbones, metropolitan area networks (MANs) and short-distance backbone connections. This unshielded cable consists of four bonded- or nonbonded-pairs of 23 AWG solid copper conductors. Bonded-pairs feature a patented design in which the individual conductors are securely bonded along their longitudinal axis to guarantee uniform spacing within each twisted pair to maintain consistently high electrical performance. Meets Category 6A requirements as per TIA/EIA-568-B.2-10-2008, and ISO/IEC 11801 Ed.2 Draft Amd 2 Class EA. Exceeds Cat 6 requirements per ANSI/TIA/EIA-568-B. Exceeds Cat 5e requirements per ANSI/TIA/EIA-568-A.5 or ANSI/TIA/EIA-568-B. Available in assorted popular colors. **Sold in 1000′ spools.**

DATATUFF CATEGORY 5e AND 6 ETHERNET CABLE FOR INDUSTRIAL NETWORKS

RoHS Compliant Available

BELDEN SENDING ALL THE RIGHT SIGNALS

- 4-Pairs
- Twisted-pair construction
- Patented bonded-pair technology
- High performance
- Heavy-duty, industrial-grade jackets

For peak network efficiency and reliability, DataTuff® Category 5e and 6 Ethernet cable is made for tough industrial environments. Category 5e and enhanced Category 5e cable feature twisted- or bonded-pairs. Category 6 and enhanced Category 6 cable have bonded-pairs. Bonded-pair construction features a patented technology that affixes the conductors of the cable pairs along their longitudinal axes preventing gaps and keeping the conductor-to-conductor spacing uniformed, thereby offering excellent and consistently reliable electrical performance even after the cable has been subjected to the bending, pulling and twisting inherent in the installation process. Choice of solid or stranded bare copper conductors (unless otherwise noted), shielded or unshielded construction. Heavy-duty industrial-grade jackets are UV sunlight- and oil-resistant. FEP jackets are also gas-resistant. TPE (thermoplastic elastomer) jackets are also weldsplatter-resistant. Outer jacket color: black (unless otherwise noted). **Sold in spool sizes indicated in table below.**

DATATWIST 1200 CATEGORY 5e TWISTED PAIRED LAN CABLE

RoHS Compliant Available

BELDEN SENDING ALL THE RIGHT SIGNALS

- Available in riser and plenum versions
- Excellent mechanical and electrical performance for Cat 5e networks
- Minimized skew for parallel transmission protocols
- High-flexibility design eases cable installation and dressing
- Small diameter minimized for compactness of installations
- Descending distance marking for cable length reduces waste
- Matching tip and ring color code for ease of installation

DataTwist® 1200 cable is intended to be used for horizontal cable installations of high-speed Local Area Networks (LANs), such as Gigabit Ethernet, for transmission speeds up to 1.2 Gb/s in systems with a bandwidth of 160 MHz. Ideal for supporting up to 1000BaseT, this cable was designed to exceed current standards, providing built-in margin and optimizing network performance. This unshielded cable consists of four twisted pairs of 24 AWG solid-copper conductors with a round flexible core construction. These insulated conductors are matched on all four pairs, which provides extremely stable electrical performance. Meets or exceeds the Category 5e requirements per ANSI/TIA/EIA-568-A.5 or TIA/EIA-568-B.2, has excellent PSNEXT and PSACR characteristics, and is easy to install. Available in assorted popular colors. **Sold in box or spool sizes indicated in table below.**

DATATWIST 2400 CATEGORY 6 TWISTED PAIRED LAN CABLE

RoHS Compliant Available

BELDEN SENDING ALL THE RIGHT SIGNALS

- Available in riser and plenum versions
- Exceed TIA/EIA requirements for Category 6 Installations
- Provide for transmission speeds up to 2.4Gb/s
- Increased bandwidth and signal-to-noise margin
- Optimized balance of transmission performance for simultaneous parallel transmission protocols
- Small diameter for higher density installations
- Descending distance marking for cable length reduces waste
- Matching tip and ring color code for ease of installation

DataTwist® 2400 paired cable is intended to be used for horizontal cable installations of high-speed Local Area Networks (LANs) for transmission speeds up to 2.4 Gb/s. This unshielded cable consists of four twisted pairs of 23 AWG solid copper conductors with a round flexible core construction. The patented design features a central tape to provide pair separation, and matched conductors on all four pairs, which provide for extremely stable electrical performance. Meets or exceeds Category 6 requirements per TIA/EIA-568-B.2-1. Exceeds Category 5e requirements per ANSI/TIA/EIA-568-A.5 or TIA/EIA-568-B.2. Exceeds the Category 5 requirements per ANSI/TIA/EIA-568-A, CSA T529-95 and ISO/IEC 11801-1995. Exceeds the Category 5 requirements per NEMA Standard WC 63.1-1996. Exceeds the Category 5 requirements of ICEA S-90-661-1997. Available in assorted popular colors. **Sold in spool sizes indicated in table below.**

DATATWIST 4800 CATEGORY 6 TWISTED PAIRED LAN CABLE

RoHS Compliant Available

BELDEN SENDING ALL THE RIGHT SIGNALS

- Available in riser, plenum and low-smoke zero halogen versions
- Choice of bonded- and nonbonded-pair construction
- Central spline design separates pairs and maintains stable pair position, to improve NEXT and impedance performance
- Stable pair position provides built-in resilience to installation stresses
- Improved attenuation provides stronger signal power
- Maximized bandwidth and signal-to-noise margin for mission-critical applications
- Larger 23 AWG conductors are ideal for PoE and PoE+ applications
- Descending distance marking for cable length reduces waste
- Matching tip and ring color code for ease of installation

DataTwist® 4800 unshielded twisted paired LAN cable is intended to be used for horizontal cable installations of high speed Local Area Networks (LANs) for transmission speeds up to 4.8 Gb/s. This enhanced Category 6 cable provides significant headroom and delivers robust data transmission performance for today's and the future's most demanding applications. This unshielded cable consists of four twisted bonded- or nonbonded-pairs of 23 AWG solid copper conductors. A unique central spline separates and holds the twisted pairs firmly in position, at a uniform distance from each other, resulting in very stable transmission and improved Power Sum Crosstalk performance. The bonded-pairs feature a patented design in which the individual conductors are securely bonded along their longitudinal axis to guarantee uniform spacing within each twisted pair to maintain consistently high electrical performance. Meets Category 6 requirements per TIA/EIA-568-B.2-1, ISO/IEC 11801 ed 2.1 (2008) Class E. Riser: ITS/ETL Certified as CMR, and listed as NEC Type CMR per UL Standard 444. Plenum: ITS/ETL Certified as CMP, and listed as NEC Type CMP per UL Standard 444. Low smoke zero halogen: ISO/IEC 332-1, 754-2 and 1034-2. Available in assorted popular colors. **Sold in spool sizes indicated in table below.**

CONTROLNET™ INDUSTRIAL AUTOMATION COAXIAL CABLE

RoHS Compliant Available

AlphaWire Cables you trust. Service you deserve.

- Foil/braid/foil/braid shielding for maximum signal integrity and run length
- Fully tested to meet the requirements of the ControlNet physical layer specification
- Superior quality to improve system reliability
- UL listed, CSA certified

ControlNet™ cable is low-loss RG-6/U type coax designed to meet the high-speed, time-critical requirements necessary for the operation of modern ControlNet factory-floor automation systems. Feature 18 AWG solid copper-plated steel conductor, foam polyethylene insulation and black sunlight-resistant PVC jacket. Operating temperature: -30°C to 75°C. Industry approvals: UL: CL2R CMR; CSA: CMG FT4. **Sold in spools sizes indicated in table below.**

SERIES 6 DIRECT BROADCAST SATELLITE (DBS) COAXIAL CABLE

RoHS Compliant Available

BELDEN SENDING ALL THE RIGHT SIGNALS

1829A

Direct broadcast satellite (DBS) cable is sweep-tested to 3GHz and meets all requirements for the new frequency spectrum allocated to DBS. All feature solid, bare copper-covered steel conductors except **mfg. part nos. 7915A** and **7916A** that are bare copper and **mfg. art no. 1840A** that is bare copper with anticorrosion treatment. All feature gas-injected foam polyethylene insulation and Duobond® II shield with aluminum braid except **mfg. part no. 7915A** that has a Duobond Plus® shield with aluminum braid and **mfg. part no. 7916A** that has a Duobond® IV shield with two aluminum braids. All feature PVC jackets except **mfg. part no. 1843A** that is polyethylene. Nominal impedance: 75±3Ω. Nominal velocity of propagation: 83%. Nominal capacitance: 16.2pF/ft. All pass flame test UL-1685. **Sold in spool quantities indicated in table below.**

84316 series RG-316/U coaxial cable features 0.02″ silver-plated copper-covered steel conductor with TFE Teflon® insulation, silver-plated copper braid shield, and brown FEP (fluorinated ethylene propylene) jacket. Meets M17/113-RG316 military specifications. UL flame test: UL1685 UL loading, VW-1. Nom. inductance: 0.067 µH/ft. Operating voltage (military spec.): 900VRMS. Operating temperature range: -70°C To +200°C. **Available in spool sizes listed in table below.**

ALPHA WIRE INDUSTRIAL SERIES

RoHS Compliant Available

AlphaWire
Cables you trust. Service you deserve.

SERIES M HIGH PERFORMANCE STATIONARY CONTROL CABLE

Features:
- Cable extending from cable tray for an unlimited distance — UL Types PLTC or TC
- Improved cable life
- Reduced cable cost
- Superior resistance to oil and abrasion
- Jacket durability

Applications:
- Extended runs exiting the cable tray —UL compliant to NEC Section 336.10 (7)
- Stationary track/cable tray
- Factory equipment interconnects
- Robotics
- Machine tools
- Automotive assembly equipment
- Conveyor systems
- Control panels

Series M is the ultimate cable solution for stationary/cable tray and some minimal flexing applications. Insulation color code: **RW** in mfg. part no. number indicates red insulated conductors with alphanumeric printing, neutral conductor is white with red stripe and ground wire is green/yellow; **LW** in mfg. part no. number indicates blue insulated conductors with alphanumeric printing, neutral conductor is white with blue stripe and ground wire is green/yellow. Oil-resistant PVC slate jacket. Operating temperature: -5°C to 90°C (dynamic), -25°C to 90°C (static). UL Type TC-ER, 600 volt, CSA AWM I/II A/B 600V FT4, UL WTTC. **Sold per foot.**

FOIL-SHIELDED PLENUM-RATED MULTIPAIR AND MULTICONDUCTOR CABLE

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

- UL Type CL2P
- Plenum Applications without Conduit
- Passes Steiner Tunnel Test
- CSA CMP FT6

Plenum-rated PVC cable has stranded bare copper conductors. Shielding is constructed of aluminum/polyester foil. Drain wire is stranded tinned copper. Maximum operating temperature: -5°C to +75°C. Rated 150 or 300 volts. Applications include remote control and intercom systems, burglar alarms, cash registers, and other low-voltage systems. UL listed. **Sold in 500′ and 1000′ spools**

MANHATTAN™ RETRACTILE COMMUNICATIONS CORDS

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

- UL AWM Style 2464

Unshielded multiconductor retactile communication cords consist of stranded 21x36 23 AWG tinned copper conductors, color-coded polypropylene insulation with an overall, black PVC jacket. Features a lead at each end. Rated: 300V, 1A. Operating temperature: -20°C to +80°C.

LENGTH — 1 FT. (0.3M) RETRACTED, 5 FT. (1.5M) EXTENDED, 12 IN. (0.304MM) LEADS

MILITARY-GRADE BRAIDED SHIELD MULTICONDUCTOR CABLE

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

Stranded tinned-copper insulated conductors meet MIL-W-16878 Type C specifications. Features color-coded PVC insulation, braided tinned-copper shield, 90% coverage, and slate PVC jacket. Typical applications include electronic equipment interconnection, remote control of sensitive recording instruments and controls, and telemetry data. Rated 1000V, –55°C to +105°C. Also available in 16 AWG; *go online or call.*

MULTIPAIR FOIL-SHIELDED CABLE

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

22 AWG solid tinned copper conductors with color-coded PVC insulation. Shield is aluminum/polyester tape with foil facing inward. Stranded tinned copper drain wire. Voltage rating: 300V. Temperature range: –20°C to +80°C-AWM (75°C - CM, 60°C - CMG). Slate PVC jacket. Passes UL VW-1 flame test. UL listed Type CM, UL recognized AWM Style 2464, CSA certified CMG FT4. **Sold in 500′ and 1000′ spools.** Also available in 100′ spools; *go online or call.*

MULTIPAIR INDIVIDUALLY FOIL-SHIELDED CABLE

RoHS Compliant Available

AlphaWire
Cables you trust. Service you deserve.

Feature stranded tinned copper conductors with color-coded polypropylene insulation. Individual pairs are shielded with aluminum/mylar tape, foil facing inward. Stranded tinned copper drain wire. Slate PVC jacket. Rated: 300V. Temperature range: –20°C to +60°C - AWM, CMG; 75°C - CM. UL listed Type CMG, CM. UL 2493. CSA CMG FT4. Passes UL VW-1 flame test. 500′ spools are also available; *go online or call.*

DATA/COMMUNICATION, CONTROL & INSTRUMENTATION CABLE

PAIRED FOIL-SHIELDED DATA CABLE

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

Single Pair — Four-Pair

Applications:
- Audio pulse or RF signal transmission
- Computer or electronic peripheral interconnectors in areas of high noise interference
- Banking systems

This paired data cable features stranded tinned copper conductors, aluminum/polyester foil shield, color-coded high-density polyethylene insulation, except **mfg. part nos. 2463C, 2466C, 2467C** and **1243/2C** which have polypropylene insulation, and slate PVC jacket. All have stranded tinned copper drain wire with each pair except **mfg. part nos. 2463C** and **2466C** which have a common drain wire. Ideal for use with FIT®-221 heat-shrink tubing; *ordered separately, go online or call.*

MULTICONDUCTOR BRAIDED SHIELD COMMUNICATION AND CONTROL CABLE

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

- Meets MIL-DTL-16878/1 Type B military specifications
- Irradiated PVC insulation resists shrink-back, melting or charring during production line soldering

Multiconductor communication and control cable is ideal for crowded circuit boards where terminals must be soldered. Features stranded tinned copper conductors, color-coded irradiated PVC insulation, clear polyester wrap, braided tinned copper shield and white PVC jacket. Operating temperature: -55°C to 105°C. Voltage rating: 600V.

MULTICONDUCTOR FOIL SHIELDED CABLE

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

Conductor is made of stranded tinned copper. Insulation is color coded polyethylene. Shield is aluminum/polyester tape, foil facing outward; 100% coverage. Stranded tinned copper drain wire. Slate PVC jacket for except **mfg. part nos. 2411C, 2421C** which are black and **2412C, 2422C** which are natiural. UL Type CMG, AWM 2092, 2093, 2094. Rated 300V. Temperature range: –20°C to +60°C - AWM, 75°C - CMG. UL listed. **Mfg. part nos. 2460C** and **2461C** are color coded polypropylene insulated. Stranded or solid tinned copper conductor. Stranded tinned copper drain wire. UL Type CM. Rated 300V. Temperature range: –20°C to +60°C - CMG, 75°C-CM. CSA CMG FT4. **Sold in 100′ and 1000′ spools.** Also available in 500′ spools; *go online or call.*

MULTICONDUCTOR UNSHIELDED CABLE — 600 VOLT

RoHS Compliant Available

AlphaWire
Cables you trust. Service you deserve.

- UL 2463
- -20°C to 80°C
- Passes UL VW-1 flame test
- UL recognized

Features stranded tinned copper conductors, PVC insulation, clear polyester wrap and slate PVC jacket. **Sold in 100′ and 1000′ spools.** 500′ spools are also available; *go online or call.*

MULTICONDUCTOR, FOIL/ BRAID-SHIELDED CABLE

RoHS Compliant Available

AlphaWire
Cables you trust. Service you deserve.

Applications: EIA RS232C interface, CAD/CAM. Stranded tinned copper conductors. Aluminum/polyester foil/65% tinned copper braid shield. Color-coded SR-PVC insulation. Slate PVC jacket. Voltage rating: 300V. Operating temperature: –20°C to +80°C - AWM, 75°C - CM, 60°C - CMG. UL listed type CM, UL recognized AWM style 2464; CSA certified CMG FT4. **Sold in 500′ and 1000′ spools.** 100′ spools are also available; *go online or call.*

DATA/COMMUNICATION, CONTROL & INSTRUMENTATION CABLE

XTRA-GUARD® 1 MULTICONDUCTOR SUPRA-SHIELD® CABLE — 300V

RoHS Compliant Available

AlphaWire
Cables you trust. Service you deserve.

VW-1

Ultraviolet Light

EMI Noise

Extreme Performance in Critical, High-Technology Electronic Signal Applications

EXTREME PERFORMANCE BENEFITS:
- Unique premium-grade PVC insulation and jacket provides easier routing of cable in tight spaces
- Fast, easy stripping of insulation and jacket to reduce installation and connectorization time and cost
- Light-duty resistance to most oils per UL Oil Res and Class 43
- Resistance to ambient temperatures up to 105°C (221°F)
- Ultraviolet stabilized, all colors
- Extreme performance against EMI/RFI with Supra-Shield® high-performance shielding system

XTRA-GUARD® 1 APPLICATIONS:
- EIA RS 232C Interface (24, 22 AWG)
- High-technology applications in controlled environments
- Point-of-sale equipment
- Computer peripherals
- Industrial process controls

XTRA-GUARD® 1 SPECIFICATIONS:
- UL AWM Style 2464 overall; UL AWM Style 10002 conductors
- CSA CMG FT4
- Passes UL VW-1 and CSA FT4 Flame Tests
- UL listed, CSA certified, CE compliant

Stranded tinned copper conductors and color-coded premium PVC insulation. Supra-Shield® aluminum/polyester/aluminum foil shielding with stranded tinned copper drain wire plus 70% overall tinned-copper braid. Voltage rating: 300V. Operating temperature: -30°C to 105°C CM and CMG, -30°C to 80°C AWM 2464. Slate premium PVC jacket; other colors available; *go online or call.* FIT®-221 and FIT®-321 irradiated polyolefin heat-shrink tubing is recommended; *order separately on [6504], and [6506].* **Sold in spool sizes indicated in table below.**
